**CLINICAL AND IMMUNOPATHOLOGICAL
STUDY OF ORAL MUCOSAL LESIONS IN
PATIENTS WITH VIRAL HEPATITIS C**

**Thesis Submitted to The Faculty of Dentistry,
Alexandria University in partial fulfillment of the
DOCTOR DEGREE IN ORAL PATHOLOGY**

By

AMANY NOUR EL-DIN ABD ELLATIF

(B.D.S. 1985, M.Sc. 2000)

**FACULTY OF DENTISTRY
ALEXANDRIA UNIVERSITY**

2005

B

1492A

SUPERVISORS

Prof. Dr. Sanaa Foad Abou El-Azm

Professor of Oral Pathology

Faculty of Dentistry

Alexandria University

Prof. Dr. Evelyn A. Younan

Professor of Oral Pathology

Faculty of Dentistry

Alexandria University

Prof. Dr. Galila H. El-Taweel

Professor of General Pathology

Faculty of Medicine

Alexandria University

Prof. Dr. Mohamed Fata

Professor of Maxillofacial and Plastic Surgery

Faculty of Dentistry

Alexandria University

Dedicated To

The Memory of my Father

My Mother, My Husband

And to the Apples of my eyes

Omar & Cherif

Acknowledgment

First of all, thanks to **GOD** for help and strength offered to me during this work.

I would like to reexpress my sincerest appreciation and deep gratitude to **Prof. Dr. Sana F Abou-ElAzm**, Professor of Oral Pathology, Faculty of Dentistry, Alexandria University for her supervision, who willingly gave me much of her experience, effort, time and guided me throughout this work. I owe her a lot.

I am also grateful to my supervisor, **Dr. Evelyn A. Younan**, Professor of Oral Pathology, Faculty of Dentistry, University of Alexandria for her supervision and encouragement and her motherly feelings. Thank you a lot.

Special thanks to **Prof. Dr. Galya El Tawyl**, Professor of Pathology, Faculty of Medicine, University of Alexandria for her help to obtain the material used in this investigation.

I am grateful to **Prof. Dr. Mohamed Fata**, Professor of Plastic Maxillofacial Surgery, Faculty of Dentistry, University of Alexandria for his help, sincere encouragement and his unlimited help.

I would also express my thanks to **Prof. Dr. Helemy Abaza** and **Prof. Dr. Ali Elkady**, Professors of Internal Medicine, Faculty of Medicine, University of Alexandria for their help to obtain data used in this study.

I can not forget the patience of **Dr. Magdy Abou-ElAbas** Director of **Alexandria Dental Research Center** whom I'm very grateful for his continuous help and encouragement and his help to obtain the material used in this research.

My deepest gratitude is offered to all staff members of the Oral Pathology department, Faculty of Dentistry, University of Alexandria and to **Prof. Dr. Tayseer Ali Omar**, Head of the Department for their support and encouragement.

My warm thanks to **Prof. Dr. Shwekas-Abd El Salam** Professor of Microbiology and Virology, Faculty of medicine, University of Alexandria for her great help and co+ operation.

Finally, I would like to thank all the laboratory technicians specially **Mr. Mohamed El Rayes**. Faculty of Dentistry, University of Alexandria for their unlimited help.

LIST OF TABLES

Table		Page
(I)	Extrahepatic Manifestations associated with HCV infection.(Zoulim et al 2003)	24
(II)	Clinicopathological findings in Group IA	44
(III)	Distribution of cases according to diseases liver in relation to oral histological findings and anatomical site	45
(IV)	PCR and Immunohistochemical findings of gp IA	46
(V)	Clinicopathological Findings of Group IB	49
(VI)	PCR and immunohistochemical findings of group IB	50
(VII)	Chi-Square Tests	51
(VIII)	Symmetric Measure	52

LIST OF FIGURES

Figure		Page
(1)	Structure of HCV genome	8
(2)	Geographic distribution of HCV major genotypes and HCV subtypes	11
(3)	Natural history of HCV. (Zoulim <i>et al</i> 2003)	18
(4a)	Omniscript Reverse Transcriptase Kit	30
(4b)	Data taken from PCR kit. The white colour indicates the +ve PCR results	30
(5)	Examination Sheet	35
(6)	HCV +ve patient showing atrophic tongue with white lesions at posterior lateral border of tongue	53
(7)	HCV +ve patient with white lesion involving retromolar area and cheek mucosa	53
(8)	HCV +ve patient showing swelling in submandibular region	54
(9)	HCV +ve patient revealing recurrent squamous cell carcinoma in the lower lip and floor of the mouth	54
(10a)	Distribution of samples according to anatomical location	55
(10b)	Histopathological classification of group IA	55
(11)	A case of leukoplakia with white patch at the vermilion border of lower lip	56
(12)	The above case of leukoplakia showing hyperkeratotic epith. with basilar-hyperplasia, abnormal nuclear cytoplasmic ratio and hyperchromatism of the nucleus (H&E x100)	56

Figure		Page
(13)	Fibrosarcoma of the maxilla showing proliferation of malignant fibroblast cells with hyperchromatic nuclei (H&E x 400)	57
(14a)	A case of lichen planus showing lace-like pattern in cheek mucosa	58
(14b)	The above case showing Wickham's striae in opposite side of the cheek	58
(15)	The same previous case showing erosive lichen planus at lateral border of the tongue	59
(16)	Licken planus with acanthotic epithelium below which a well demarcated dense broad band of lymphocytes is seen (H&E x 100)	60
(17)	A higher magnification of previous case showing basilar liquefaction degeneration (H&E x 400)	60
(18)	Erosive lichen planus showing severe thinning of epithelium and dense lymphocytic band subepithelially. Separation of the epitheliomesenclymal junction can be seen (H&E x 100)	61
(19)	A case of squamous cell carcinoma in cheek mucosa and extending to retromolar area	62
(20)	Another case of squamous cell carcinoma in cheek mucosa and retromolar area	63
(21)	A case of squamous cell carcinoma at the commissure of the mouth extending to cheek mucosa	63
(22)	Classification of squamous cell	64

Figure		Page
(23)	Well differentiated squamous cell carcinoma showing keratin pearls and cell nests proliferating in a fibrous connective tissue stroma heavily infiltrated with chronic inflammatory cells (H&E x 100)	65
(24)	Higher magnification of the previous case revealing cell nests of malignant epithelial cells with hyperchromatic nuclei (H&E x 400)	65
(25)	Moderately differentiated squamous cell carcinoma in HCV +ve patient showing keratin pearls and malignant epithelial nests (H&E x 100)	66
(26)	Another moderately differentiated squamous cell carcinoma showing proliferation of malignant cells in the form of cell nests (H&E x 100)	66
(27)	A moderately differentiated squamous cell carcinoma (H&E x 100)	67
(28)	Higher magnification of the previous case showing the undifferentiated malignant epithelium cells (H&E x 400)	67
(29)	Poorly differentiated squamous cell carcinoma showing the undifferentiated malignant epithelial cells (H&E x 100)	68
(30)	Higher magnification of the above case showing nuclear hyperchromatism and abnormal nuclear cytoplasmic ratio (H&E x 400)	68
(31)	Poorly differentiated squamous cell carcinoma showing the whole stroma infiltrated with embryonic malignant epithelial cells (H&E x 100).	69
(32)	PCR assay	70

Figure		Page
(33)	Immunophotomicrograph of lichen planus with +ve HCV expression revealing perinucleas brownish granules (oil × 1000)	71
(34)	Another field of the above case showing +ve HCV reaction (oil × 1000)	71
(35)	Immunophotomicrograph of a moderately differentiated squamous cell carcinoma showing +ve HCV expression (oil × 1000)	72
(36)	Another field of the above case (oil × 1000)	72
(37)	An immunophotomicrograph of a well differentiated squamous cell carcinoma showing +ve HCV reaction in cell nests (oil × 1000)	73
(38)	Another field of the above case showing +ve HCV expression in the form of brownish perinuclear granules (oil × 1000)	73
(39)	An immunophotograph of another field in the same case of well differentiated squamous cell carcinoma showing the HCV +ve expression (oil × 1000)	74
(40)	Non-Hodgkin's lymphoma with high grade diffuse large cell type (H&E × 400)	75
(41)	Non-Hodgkin's lymphoma (diffuse large cell type) with proliferating undifferentiated lymphocytes (H&E × 400)	75
(42)	NHL with large undifferentiated lymphocytes (H&E × 400)	76
(43)	NHL showing well differentiated cell lymphocytes (H&E × 100)	76
(44)	NHL with small and large lymphocytes (H&E × 400)	77
