University of Alexandria

ACKNOWLEDGEMENT

First of all, thanks to *Allah* for help and strength offered to me to complete this work.

Words can not express the feeling for gratitude that I have for the professors who honored me by supervising this thesis.

I would like to express my deepest appreciation and gratitude to my **Professor Dr. Laila Mohamed Nofal**, Professor of Biostatistics, High Institute of Public Health, University of Alexandria, for her continuous encouragement, guidance, support and valuable suggestions throughout the work.

I am greatly indebted and grateful to **A. Professor Dr. Mona Hassan Ahmed**, Assistant Professor of Biostatistics, High Institute of Public Health, University of Alexandria, who very kindly and generously gave much of her time in advice and guidance. It was a great chance for continuous learning to me.

I owe special ever lasting thanks and unlimited gratitude to **Dr. Saleh Mesbah Elkaffas**, Lecturer, Dept. of Environmental Studies, Institute of Graduate Studies and Research, University of Alexandria, for his laborious effort, continuous help, patience and encouragement which made his supervision a great pleasure to me.

My sincere appreciation is especially expressed to **Dr. Magdi Sharaf**, the head of Health Information Center of Alexandria, for his assistance in data collection during the practical part of this work.

I wish to express my heartfelt thanks and endless gratitude to my family who loved and faithfully supported me throughout this work.
