

# **Evaluation & Processing of Egyptian Diatomite for Insulation**

**A Thesis Submitted in partial fulfillment of Master Degree  
In  
Inorganic and Analytical Chemistry**

**By  
Nehal Mahmoud Abdallah Mahmoud**

B. Sc. Chemistry & Physics, Ain Shams University, (2008)

**To**  
Chemistry Department, College of Girls For Arts, Science and  
Education Ain Shams University

**Supervised by**

**Prof. Dr. Suzan S. Ibrahim**  
Professor of Minerals Processing

**Prof. Dr. Faten Z. Mahmoud**  
Assistant Professor of  
Physical Chemistry

**Dr. Tamer S. Abdel Kader**  
Department of Refractories, ceramics and Building Materials,  
National Research center, Cairo, Egypt

**(2019)**

# **"Evaluation& Processing of Egyptian Diatomite for Insulation"**

**Thesis Advisors**

**thesis Approved**

**Prof. Dr. Faten Zakaria Mahmoud**

.....

Assistant Professor of Physical Chemistry,

Department of Chemistry, College of Girls For Arts, Science and  
Education, Ain Shams University.

**Prof. Dr. Suzan Sami Ibrahim**

.....

Professor of Minerals Processing, Central Metallurgical Research  
and Development Institute (CMRDI), Helwan, Cairo, Egypt

**Dr. Tamer Samy Abdel Kader**

.....

Department of Refractories, ceramics and Building Materials,  
National Research Centre.

Head of chemistry Department

**Prof. Dr Mansoura Esmael**

.....

**Approval of Chemistry Department Council** / / 2019

**Approval of Faculty Council** / / 2019

**Approval of University Council** / / 2019

---

---

---

## **QUALIFICATIONS**

**Student Name:** Nehal Mahmoud Abdallah Mahmoud

**Scientific Degree:** B.Sc

**Department:** Chemistry and Physics

**Name of college:** College of Girls For Arts, Science and  
Education

**University:** Ain Shams University

**B.Sc. Graduation Year:** 2008

---

---

---

---

## **Note**

The candidate has attended courses for one year, covering the following topics:

- Spectroscopy.
- Structural inorganic chemistry.
- Advanced inorganic chemistry.
- Advanced coordination chemistry.
- Advanced reaction mechanisms.
- Photochemistry.
- Kinetics and catalysis chemistry.
- Quantum chemistry.
- Thermodynamics.
- Instrumental analysis.
- English language.

She has successfully passed a written examination in these courses, in partial fulfillment for the master degree of science.

---

---

## ACKNOWLEDGEMENT

I am deeply thankful to Allah, Lord of the world for showing me the right path and helping me to complete this work.

I would like to express my deep gratitude to **Prof. Dr. Faten Zakaria Mahmoud**, Assistant professor of physical Chemistry, Department of Chemistry, College of Girls For Arts, Science and Education, Ain Shams University for her kind supervision, continuous encouragement, valuable advice and facilities which she offered me through the progress and finishing this work.

With sincere respect and gratitude, I would like to thank **Prof. Dr. Suzan Sami Ibrahim**, professor of Minerals Processing, Central Metallurgical R &D Institute for her supervision, kind help, serve raw materials and encouragement, valuable assistance for helping me in revision, The guidance and support especially during the latest phase of the present work.

---

---

I really appreciate the efforts of **Dr. Tamer Samy Abdel Kader**, Researcher of Chemistry, Department of Refractories, ceramics and Building Materials, National Research Centre, for his continuous help in my entire experimental work, encouragement and support during carrying out this work.

I wish to express my deep appreciation from my deeply heart to **Prof. Dr. Samir Bushra Hanna**, Professor of Chemistry and Technology of Refractories, National Research Centre, for his respective suggestions and valuable planning the points and scheme of the present work his fatherly guidance, supervision, fruitful discussion, great criticism, constructive criticism, correcting the manuscript and continued help during the course of this work.

	<b>LIST OF TABLES</b>	<b>V</b>
	<b>LIST OF FIGURES</b>	<b>VIII</b>
	<b>AIM OF THE STUDY</b>	<b>XI</b>
	<b>ABSTRACT</b>	<b>XIV</b>
	<b>CHAPTER I</b> <b>INTRODUCTION</b>	
I.1.	Refractory Materials	<b>1</b>
I.2.	Types of Insulating Refractories	<b>7</b>
I.3.	Applications and Advantages	<b>8</b>
I.4.	Heat Insulating Materials	<b>9</b>
I.5.	Thermal Insulation	<b>28</b>
	<b>CHAPTER II</b> <b>EXPERIMENTAL</b>	
II.1.	Main starting materials	<b>31</b>
II.1.1.	Chemical Composition	<b>31</b>
II.1.2.	Mineral composition of the investigated diatomite samples	<b>33</b>
II.1.3.	Surface area and particle size distribution of diatomite samples	<b>39</b>
II.2.	Secondary starting materials	<b>43</b>
II.3.	Test – specimen's preparation	<b>46</b>

II.3.1	Part 1: Porous diatomite specimens	46
II.3.2	Part 2: Porous diatomite-mix specimens	47
II.3.3	Part 3: Carbon and Starch Addition	48
II.4.	Testing methods of Investigation	49
II.4.1.	BET and X-ray fluorescence (XRF)	49
II.4.2.	X-ray Diffraction Analysis (XRD)	51
II.4.3.	Measurement of Physical Properties	52
II.4.4.	Scanning Electron Microscopy (SEM)	53
II.4.5.	Pore structure	53
	<b>CHAPTER III</b> <b>RESULT AND DISCUSSION</b>	
III.1.	Part 1: Porous diatomite specimens	56
III.1.1.	Physical properties of Fired diatomite specimens	56
III.1.2	Mineral composition of fired diatomite samples	60
III.2.	Part 2: Porous diatomite mixed specimens	64
III.2.1.	Physical properties	64
III.2.1.1.	Fired Masakheet - Kasr El Sagha 2 Mix Specimens	64
III.2.1.2.	Fired Masakheet – Demia yellow 2 Mix Specimens	69
III.2.1.3.	Fired Masakheet – Demia yellow 1 Mix Specimens	74

III.2.1.4.	Fired Kasr El Sagha 1 – Demia yellow 1 Mix Specimens	79
III.2.2.	Mineral composition	84
III.2.2.1.	Fired Masakheet – Kasr El Sagha 2 diatomite Specimens	84
III.2.2.2.	Fired Masakheet - Demia yellow 2 diatomite Specimens	85
III.2.2.3.	Fired Masakheet - Demia yellow 1 diatomite specimens	86
III.2.2.4.	Fired Kasr El Sagha 1 - Demia yellow 1 diatomite specimens	89
III.3.	Part 3: Carbon and Starch Addition	93
III.3.1.	Masakheet–Kasr El-Sagha 2, and Masakheet–Demia Yellow 2 diatomite specimens	93
III.3.2.	Masakheet – Demia Yellow 1 and Kasr El-Sagha 1 – Demia Yellow 1 diatomite specimens	94
III.3.3.	Porosimetric study	99
III.3.4	Microscopic study	101
III.4.	General Consideration	107
	<b>SUMMARY</b>	114
IV.1.	Samples Characterization	115
IV.1.1.	Chemical analysis of the original samples	115
IV.1.2.	X-ray diffraction results	115
IV.1.3.	Surface area measures	116
IV.1.4.	Particle size distribution	117

<b>IV.2.</b>	<b>Rational mixing process of the samples</b>	<b>117</b>
<b>IV.3.</b>	<b>The Effect of the addition of pore forming agents</b>	<b>119</b>
<b>IV.4.</b>	<b>Work Conclusions and Recommendations</b>	<b>121</b>
