***Bone changes under osseointegrated
implants supporting complete
overdenture with and without
attachments***

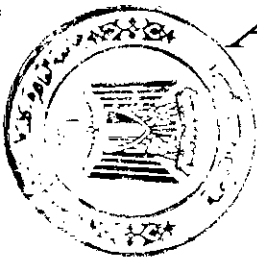

Thesis

Submitted in Partial Fulfillment of the Requirements for
the Doctor Degree in Dental Prosthesis, Prosthodontic
Department

By

Alaa Refai Ahmed

(B.D.S., M.D.S.)

Faculty of Oral and Dental Medicine

Cairo University

2003

Supervisor

Prof. Dr. Ezzat Mohammed Thabet

Professor of Prosthodontics

Faculty of Oral and Dental Medicine, Cairo University

Co- Supervisor

Prof. Dr. Samy Mahmoud El-Sayed

Professor of Prosthodontics

Faculty of Oral and Dental Medicine, Cairo University

Co- Supervisor

Assoc. Prof. Dr. Mohammed El-SHerbini

Associate Professor of Oral Radiology

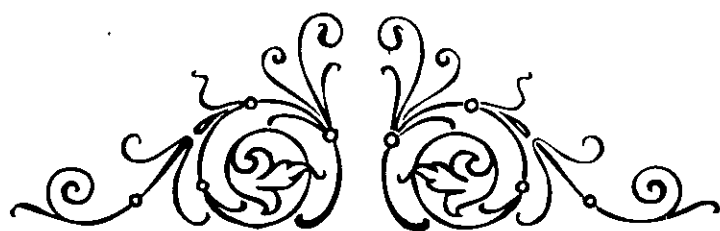

Faculty of Oral and Dental Medicine, Cairo University

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

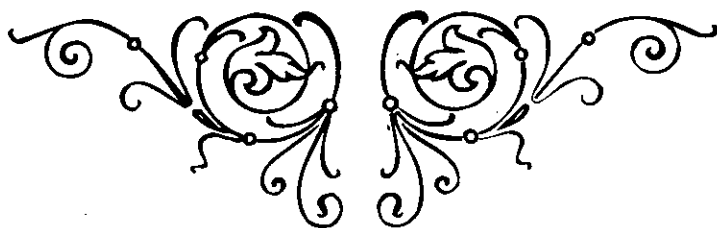

﴿وَعَلَّمَكَ مَا لَمْ تَكُن تَعْلَمُ
وَكَانَ فَضْلُ اللَّهِ عَلَيْكَ عَظِيمًا﴾

سورة النساء " آية ١١٣ "

Acknowledgment

Acknowledgment

I am most thankful to God for all his kindness and grace, for having granted me the patience and perseverance to accomplish the present work.

I would like to express my sincere gratitude to Dr. Ezzat Mohammed Thabet, Professor of Prosthodontic, Faculty of Oral and Dental Medicine, Cairo University, for providing me the opportunity to work on this thesis under his guidance of which I fell most proud. It was through his kind interest and encouragement that this work was finally achieved.

I wish to express my deepest appreciation to Dr. Samy Mahmoud El-Said, Professor of Prosthodontic, Faculty of Oral and Dental Medicine, Cairo University, for his interest, valuable advice and suggestions which enabled me to set a plan throughout the course of this work.

I am especially grateful and thankful for Dr. Mohammed El-Sherbini, Associate Professor of Oral Radiology, Faculty of Oral and Dental Medicine, Cairo University, for his kind supervision and valuable leadership which influenced every thought presented. He has worked many hours, contributed greatly as regards the radiographic and statistic parts of the work and he has always been there when I needed support, guidance and understanding.

My sincere thanks to all staff and members of Prosthodontics Department, Faculty of Oral and Dental Medicine, Cairo University, for their help.

I can not acknowledge adequately the willing Co-operation of my patients, without which this work would not have been possible.

*To my everlasting streams of love,
to my hopes, dreams and future,
to the time they sacrificed for the achievement of
this work,
to my precious family,
every moment of my life is in debt.*

Introduction	1
Dental Implant:	3
Classification of dental implants	3
I. According to the position	3
II. According to implant materials	8
III. According to the manner of implant insertion	11
IV. According to surgical techniques	11
Surgical Guide	12
Implant abutments	13
Attachments	15
I. Definition	15
II. Types of attachments	15
III. Attachment selection and classification	15
1) According to Location	16
a- Intracoronaral	16
b- Extra coronal attachment	16
c- Stud attachments	16
Types of stud attachments	17
Methods of assembling of stud attachments	20
d- Bar attachments	20
e- Auxiliary attachments	21
2) According to Function	21
3) According to Retention	22
1) Frictional retention	22
2) Mechanical retention	24
3) Frictional and mechanical retention	25
4) Magnets retention	25
5) Suction retention	25
IV. Damage of the attachments	25

Implant supported overdenture	27
Classification of implant overdentures	29
1- Mucosally supported implant overdenture	29
2- Implant-supported overdenture	30
3- Combined mucosa implant-supported overdenture	30
Impressions for implant supported overdentures	31
Factors related to longevity of implant prosthesis	34
Maintenance of dental implant prosthesis	38
Bone changes under osseointegrated implants	39
Available bone for implantaion	39
Quantity of available bone	39
Quality of available bone (bone density)	39
Behaviour of bone in relation to the implant	41
Bone level changes	44
Bone density changes	47
Oral implant failure	48
Oral implant success	50
Methods Of Evaluation	56
I. Evaluation of Stability	56
II. Periodontal Parameters	56
III. Stress analysis evaluation	57
IV. Patient Satisfaction	57
V. Radiographic Evaluation of Bone Changes	58
I. Conventional radiography	58
II. Digital radiography	62
Aim of the Work	66
Materials and Methods	67
I. Patient selection	67
II. Patient approval	68
III. Denture construction	69
IV. Presurgical radiographic examination	69
V. Surgical preparation	73
Implant surgical instruments and equipments	74

Surgical phases	77
Drilling technique	81
Implant placement	87
Post-operative treatment	95
Second surgical procedure	95
Relining of the mandibular overdenture with hared acrylic resin	97
Definitive prosthetic procedure and assembling of the O-Ring attachments for Group I	100
Definitive prosthetic procedures for group II (telescopic crown) patients	106
Definitive prosthetic procedures for group III (dome shaped abutments) patients	108
Follow-up and patient maintenance procedures	109
Radiographic examination after implants insertion (follow-up period) ...	120
Results	127
Radiographic evaluation	128
1. Bone density changes	128
2. Bone height changes	137
Discussion of Materials and Methods	146
Patient selection	146
Follow-up	158
Radiographic evaluation	160
Statistics	161
Discussion of Results	163
Radiographic evaluation	164
Correlation between changes in bone density and height at the end of study	168
Summary and Conclusions	169
Recommendation	172
References	173
Arabic Summary	-

List of Tables

	Page
Table (1) Mean bone density values of the three groups at different study intervals both mesially and distally	129
Table (2) Mean bone density difference in group I at 2, 5, 12 and 18 months from baseline and from previous measurements	131
Table (3) Mean bone density difference in-group II at 2, 5, 12 and 18 months from baseline and from previous measurements	132
Table (4) Mean bone density difference in-group III at 2, 5, 12 and 18 months from baseline and from previous measurements	132
Table (5) Comparison between mean bone density differences of the three groups from baseline	134
Table (6) Comparison between mean bone density differences of the three groups from previous readings	135
Table (7) Mean bone density difference in 18 month from baseline in each group at mesial and distal sides	136
Table (8) Show mean bone height values of the three groups at baseline and at 18 month in mesial, distal, buccal and lingual sides	137
Table (9) Mean bone differences at 18 month from baseline in-group I	139
Table (10) Mean bone differences at 18 month from baseline in group II ...	140
Table (11) Mean bone differences at 18 month from baseline in group III ..	140
Table (12) Show comparison of mean differences at 18 month from baseline between the three groups	141
Table (13) Comparison between mesial and distal mean bone differences at 18 month in the three groups	143
Table (14) Correlation between mean bone density and height differences at 18 month in mesial and distal sides of the three groups	144
