Last, but not least, my sincerest thanks to all those who contributed their time and cooperation toward the fulfillment of this thesis.

CONTENTS

CHAPTER	PAGE
I INTRODUCTION	1
* Extent and magnitude of tetanus neonatorum problem	1
* Occurrence of tetanus neonatorum	3
* Infectious process	5
*Socio-cultural factors contributing to the persistence of tetanus neonatorum	7
* Clinical picture of tetanus neonatorum	8
*Complications	10
*Management of new born with tetanus	10
* Prognosis	13
*Neonatal tetanus elimination	14
* Steps for elimination of tetanus neonatorum	15
*Preventive measures	18
II Aim of the Study	20
III Material and Methods	21
IV Results	26
V Discussion	92
VI Conclusion and Recommendation	106
VII Summary	110
VIII References	114
* Appendix	
* Protocol	
* Arabic Summary	

LIST OF TABLES

TABLE		PAGE
Table - I	General characteristics of the sample	29
Table - II	Number and percent distribution of the study sample according to their knowledge regarding definition, prevalence, incidence, causes and manifestation of tetanus neonatorum, and their place of work .	32
Table - III	Number and percent distribution of the study sample according to their knowledge regarding epidemiology of tetanus neonatorum and their place of work.	35
Table - IV	Number and percent distribution of the study sample according to their knowledge about predisposing factors to tetanus neonatorum, availability of treatment and dangers of untreated baby and their place of work.	38
Table -V	Number and percent distribution of the study sample according to their knowledge regarding tetanus immunization and methods of prevention of tetanus neonatorum and their place of work.	41

TABLE	PAGE
Table -VI Number and percent distribution of the study sample according to their knowledge regarding methods of sterilization to prevent tetanus neonatorum and their place of work.	44
Table - VII Number and percent distribution of the study sample according to their knowledge regarding to nursing care of babies with tetanus neonatorum, control of convulsion, factors leading to increase or repeat convulsion, advantage of incubator and counselling given to their mothers and their place of work.	47
Table - VIII Number and percent distribution of the study sample according to their knowledge regarding to tetanus neonatorum preventive measures during pregnancy, labour, puerperium and their place of work.	49
Table - IX Number and percent distribution of the study sample according to their knowledge regarding definition, prevalence, incidence, causes and manifestation of tetanus neonatorum, and their level of education .	52

TABLE		PAGE
Table - X	Number and percent distribution of the study sample according to their knowledge regarding epidemiology of tetanus neonatorum and their level of education .	54
Table - XI	Number and percent distribution of the study sample according to their knowledge about predisposing factors to tetanus neonatorum, availability of treatment and dangers of untreated baby and their level of education .	57
Table - XII	Number and percent distribution of the study sample according to their knowledge regarding tetanus immunization and methods of prevention of tetanus neonatorum and their level of education .	60
Table - XIII	Number and percent distribution of the study sample according to their knowledge regarding methods of sterilization to prevent tetanus neonotorum and their level of education .	62
Table - XIV	Number and Percent distribution of the study sample according to their knowledge regarding to nursing care of babies with tetanus neonatorum, control of convulsion, factors leading to increase or repeat convulsion, advantage of incubator and counselling given to the mothers and their level of education .	65

TABLE	PAGE
Table - XV Number and percent distribution of the study sample according to their knowledge regarding to tetanus neonatorum preventive measures during pregnancy, labour, puerperium and their level of education .	67
Table - XVI Number and percent distribution of the study sample according to their knowledge regarding definition, prevalence, incidence, causes and manifestation of tetanus neonatorum, and their years of experience .	70
Table - XVII Number and Percent distribution of the study sample according to their knowledge regarding epidemiology of tetanus neonatorum and their years of experience .	73
Table - XVIII Number and Percent distribution of the study sample according to their knowledge about predisposing factors to tetanus neonatorum, availability of treatment and dangers of untreated baby and their years of experience .	76
Table - XIX Number and Percent distribution of the study sample according to their knowledge regarding tetanus immunization and methods of prevention of tetanus neonatorum and their years of experience .	79
