ECOLOGICAL AND PHYSIOLOGICAL STUDIES ON *PYTHIUM* SPP. FROM AQUATIC HABITATS

THESIS

B 15554

Submitted for the Degree of Doctor of Philosophy in Botany (Ph. D.)
(Microbiology)

By

Hani Mohamed Awad Abdelzaher

B. Sc. & M. Sc. (Microbiology)

Supervised by

Prof. Dr. M. A. El-Naghy
Prof. of Microbiology and
Vice President of Minia
University, Egypt.

Prof. Dr. Takio Ichitani
Prof. of Plant Pathology
College of Agriculture
University of Osaka
Prefecture, Japan.

Prof. Dr. S. K. M. Hassan
Prof. of Mycology
Botany Department
Faculty of Science
Minia University
Minia, Egypt.

Dr. E. M. Fadel-Allah
Assoc. Prof. of Microbiology
Botany Department
Faculty of Science
Minia University
Minia, Egypt.

Botany Department
Faculty of Science
Minia University

**This Thesis Has Not Previously Been Submitted
For Any Degree At This Or Any
Other University.**

**DEDICATED TO MY PARENTS, MY WIFE AZZA AND MY
SONS AHMED & KHALED**

ACKNOWLEDGMENTS

ACKNOWLEDGMENTS

I wish to express my gratefulness and deepest appreciation to Prof. Dr. Mohamed A. Elnaghy, Vice President of El-Minia University, El-Minia, Egypt, and Prof. Dr. Takio Ichitani, Head of Plant Pathology Laboratory, College of Agriculture, University of Osaka Prefecture, for suggesting and supervising this work as well as their continuous guidance. I would also like to express my gratitude to Prof. Dr. Tosiro Yasuda, Head of Entomology Laboratory, and Prof. Dr. Hironori Mimoto, Head of Crop Science Laboratory, for their suggestions and valuable help. I would like to express my thanks to Prof. Dr. Samy K. M. Hassan, Professor of Mycology and to Dr. Ezzat M. M. Fadel-Allah, Associate Professor of Microbiology, Botany Department, Faculty of Science, Minia University for co-supervising and supporting this work. Sincere thanks and gratitude to Dr. M. S. El-Katatny, Head of Botany Department and to Prof. Dr. Fouad T. Abdel-Haleim, Dean of Faculty of Science, Minia University, for their kind help and facilities provided.

I also wish to thank Dr. Takeshi Osaki, Assoc. Prof., and Dr. Motoaki Tojo, Res. Assoc., Laboratory of Plant Pathology, College of Agriculture, University of Osaka Prefecture. In particular, my thanks are due to Dr. Satoshi T. Ohki, Assist. Prof., Plant Pathology Laboratory, University of Osaka Prefecture, who aided me in the understanding of different systems of Apple Macintosh Computer as well as his helping in collecting water samples.

Finally, I desire to express my cordial thanks to Dr. Toshinobu Morikawa, Assist. Prof., Genetics and Plant Breeding Laboratory, for the valuable discussion and suggestions concerning studies on fungal protein and isozymes, to Mr. Junji Katayama, Osaka Prefectural Agricultural and Forestry Research Center, for the useful discussion about pond water pollution, and also to staff members of Agricultural Administration Section, Sakai City Hall. The

kind help of my colleagues at Botany department, Faculty of Science, Minia University is greatly appreciated.

CONTENTS

CONTENTS

AIM OF THE WORK.....	1
INTRODUCTION.....	3
MATERIALS AND METHODS.....	15
I . Isolation of <i>Pythium</i> species from pond waters and mud soils.....	15
* Sampling sites.....	15
* Isolation.....	15
* Hydrogen-ion concentration of the water.....	26
* Temperature.....	26
* Total salinity, transparency and COD for the pond waters.....	27
* Method for obtaining bacteria-free isolates.....	29
* Isolation and seasonality of <i>Pythium fluminum</i>	30
* Qualitative isolation.....	30
* Quantitative isolation.....	31
* Isolation of <i>Pythium marsipium</i>	32
* Method for obtaining sexual structures.....	33
* Characterization of <i>Pythium</i> 'group F' by protein and isozyme analyses.....	33
* Morphological studies.....	33
* Evaluation of culture characteristics.....	33
* Cultural conditions and protein extraction.....	34
* Polyacrylamide gel electrophoresis of soluble protein.....	35
* Starch gel electrophoresis and enzyme staining.....	35
II. Factors affecting zoospore formation by <i>Pythium</i> species.....	36
III. Factors affecting oospore germination of <i>Pythium</i> species.....	38

IV. Testing virulence of <i>Pythium</i> isolates.....	40
V. Cellulolytic and pectinolytic abilities of aquatic <i>Pythium</i> spp.....	42
* Fungi and isolates tested.....	42
* Factors affecting production of CMC-ase and Polygalacturonase.....	43
a- Effect of the medium type.....	43
b- Time course of CMC-ase production.....	44
c- Effect of temperature.....	44
d- Effect of pH.....	45
e- Effect of carbon source.....	45
f- Effect of nitrogen source.....	45
g- Effect of thiamine and yeast extract.....	46
h- Effect of wheat-bran on enzyme production.....	47
i- Effect of Ashour's and Wood & Guptas' media on enzyme production.....	47
* Weight loss of filter paper.....	47
a- Effect of medium type.....	47
b- Time course study.....	48
c- Effect of temperature.....	48
d- Effect of pH.....	48
e- Effect of nitrogen source.....	49
f- Effect of thiamine and yeast extract.....	49
* Enzyme assays.....	50
I- CMC-ase (Cx).....	50
1. Viscometric assays (endo-CMC-ase).....	50
2. Method of assaying reducing groups (exo-CMC-ase).....	50
II- Avecilase (C1).....	51
III- Polygalacturonase (PG).....	51
1. Viscometric assays (endo-PG).....	51
2. Method of assaying reducing groups (exo-PG).....	51
IV- Pectin methyl estrase (PME).....	52
RESULTS.....	53
I. Isolation of <i>Pythium</i> spp. from pond water and mud soil.....	53
* Description of isolated <i>Pythium</i> species.....	56
