DEDICATED TO....

my parents for their countless years of support and encouragement from preliminary School to Drexel University...

my wife, Amal, for her countless hours of assistance, great support and encouragement...

my Son, Marwan, for his presence in my life...

ACKNOWLEDGEMENT

First and foremost, the author wants to thank Prof. Dr. Ahmed Ragab for providing the wonderful opportunity to complete this doctoral studies under his exceptional guidance. Through his patience, constant encouragement, guidance and generous support, Dr. Ragab made an immense contribution to this dissertation .

The author gratefully acknowledges Prof. Dr. Mohamed Adel El-Gammal, whose academic, professional, and personal motivation and support initiated and sustains the continued professional and academic endeavors. It is important to say that without his guidance, this work would not have been possible.

Most special thanks go to Dr. Osama Hodhod, for his practical experience and technical knowledge that made an invaluable contribution to this dissertation, appreciating the time he invested in advising and for his openness, honesty, and sincerity.

The author owes great thanks to Prof. Dr. Ahmed Hamid, Dept. of Civil & Architectural Engineering, Drexel University, USA, who, through his open door policy, has always been willing to provide assistance, give advice, and be a friend. His friendship made this study an enjoyable experience.

All of the technical staff and students at the Department of Civil & Architectural Engineering and Department of Material Engineering at Drexel University also deserve thanks for their help and many fruitful discussions. The time spent at Drexel University has made a lasting impression on life.
