HEAT TRANSFER ENHANCEMENT AND FRICTION FACTOR BEHAVIOR INSIDE A RECTANGULAR DUCT EQUIPPED WITH TRANSVERSE PERFORATED BAFFLES FIXED ON TWO OPPOSITE WALLS

by

Essam El-Din Mouguib Saleh Abdel-Rahman

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
MASTER OF SCIENCE
in
MECHANICAL ENGINEERING

FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT
24 April 2004

ACKNOWLEDGEMENT

I would like to express my deep appreciation to my dear professor, Prof. Dr. **Mahmoud Ahmed Fouad** – Professor of Mechanical Power Engineering, Faculty of Engineering, Cairo University, who was the leader of this work and also for his continuous advice not only for the present work, but also for my special practical life too, as I consider him the ideal picture of success in life.

Deep appreciation to my dear associate professor, Dr. **Reda Ibrahim Afify** – Associate Professor of Mechanical Engineering, Shoubra Faculty of Engineering, Zagazig University, who showed me the way and taught me how to work and for his great assistance, patience and encouraging, without which, the present work would never be accomplished.

Deep thanks and appreciations to the the staff of the Fluid Mechanics lab -Chair of Mechanical Power Engineering – Faculty of Engineering - Cairo University, who give me a great support and provide me with all possible facilities and help to accomplish the experimental study.

I would like to thank my colleagues in the Egyptian Air Force, who give me assistance and help.

Finally, I would like to thank my family for the continuous encouraging and great support during difficult times.
