ANALYTICAL INVESTIGATION OF ORGANIC ENVIRONMENTAL POLLUTION

Thesis

BI ESYA

Presented for the partial fulfilment of the degree of
MASTER OF PHARMACEUTICAL SCIENCES

BY

Safaa Mohamed Riad

(B.pharm.sci.,1990)

Department of Analytical Chemistry
Faculty of pharmacy
Cairo University

Under Supervision of :

Prof.Dr.Abd.El.Kader.S.Ahmad
Professor of Analytical Chemistry
Faculty of Pharmacy
Cairo University

Prof.Dr.Laila.S.Abd El Fattah
Professor of Analytical Chemistry
Faculty of Pharmacy
Cairo University

Prof.Dr.Abd.El.Aziz.EL.Bayoumi
Professor of Analytical Chemistry
Faculty of Pharmacy
Cairo University

2000

بسم الله الرحمن الرحيم

"وما توفيقي إلا بالله"

صدق الله العظيم

Approval Sheet

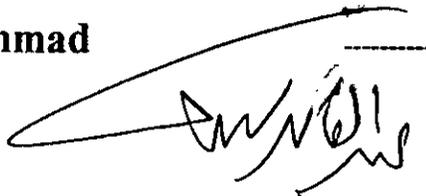

This thesis has been approved on / / 2000 by the committee in charge :-

Prof. Abd . EL . Kader .S.Ahmad

Prof.Dr Of Analytical Chemistry

Faculty of Pharmacy

Cairo University

Prof. Laila.S.Abd.El.Fattah

Prof.Dr. Of Analytical Chemistry

Faculty of Pharmacy

Cairo University

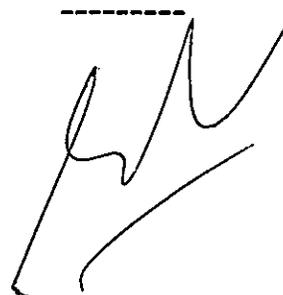

Prof. Said .F. Belal

Prof.Dr. Of Analytical Chemistry

Faculty of Pharmacy

Alexandria University

Prof. Badr.El.Din.El.Zeany

Prof.Dr. Of Analytical Chemistry

And Vice Dean of the Faculty of Pharmacy

Cairo University

Acknowledgement

First I feel always indebted to my "GOD" "Allah", the most kind and the most merciful.

I wish to express my sincere gratitude to **Prof. Dr. Abdel kader S. Ahmad** , Professor of Analytical Chemistry, Faculty of Pharmacy, Cairo university, for suggesting the point continuous encouragement and constructive criticism throughout the work.

My sincere appreciation to **Prof. Dr. Laila.S.Abdel Fattah**, Professor of Analytical Chemistry, Faculty of Pharmacy, Cairo, university, for supervising the work and for her guidance and valuable advice as well as helpful criticism during the experimental work and preparation of the thesis.

I am deeply grateful to **Prof. Dr. Abdel Aziz El Bayoumi** , Professor of Analytical Chemistry , Faculty of Pharmacy, Cairo, university, for his interest , cooperation and sincere help that he kindly offered during the supervision of the work.

My sincere appreciation and thanks to **Dr. Amira Mabrouk** , Lecturer of Analytical Pharmaceutical Chemistry , Faculty of Pharmacy, Ain Shams university, for her interest and valuable assistance during the stages of this thesis.

I wish to express my thanks and gratefulness to my **Father, Mother, Brothers and Sisters** for their patience, continuous encouragement and prayers.

I am indebted to my **Husband** for his valuable help and great support during the practical work and also for preparing the thesis in spite of the load in his work.

I would like to extend my deep thanks to all my colleagues in the analytical chemistry Department for their cooperation and their continuous support.

Last but not Least, I like to thank my lovely daughters **Shereen and Menat Allah** for their patience, love and kind feeling.

Safaa Mohamed Riad

Contents

PART I

GENERAL INTRODUCTION

I.1. Environment.....	1
I.2. Definition of water pollution.....	1
I.2.1. Classification of water pollution.....	2
I.2.2. Sources of water pollution.....	3
I.3. Organic pollutants.....	6
I.3.1 Toxicological effects of phenolic pollutants.....	6
I.3.2 Limits of phenol in water.....	7
I.4. The aim of this work.....	7

PART II

LITERATURE REVIEW

II. Methods of analysis of phenolic pollutants.....	9
II.1. Titrimetric methods.....	9
II.2. Spectroscopic methods.....	10
II.2.1 Ultra violet spectrophotometric methods.....	10
II.2.2 Colorimetric methods.....	11
II.2.3. Spectrofluorometric methods.....	13
II.2.4. I.R spectrophotometric methods.....	15
II.2.5. Raman spectroscopic methods.....	15
II.2.6. Atomic absorption methods.....	15
II.2.7. Mass spectroscopic methods.....	15
II.2.8. NMR methods.....	16
II.3. Chromatographic methods.....	16
II.3.1. High performance liquid - chromatography (HPLC).....	16
II.3.2. Gas chromatographic methods (GC).....	18
II.3.3. Thin layer chromatography (TLC).....	20
II.4. Electrophoresis.....	21
II.5. Electrochemical methods.....	22
II.5.1 Direct potentiometry.....	22
II.5.2. Potentiometric titration.....	22
II.5.3. Polarography.....	23
II.5.4. Amperometry.....	24
II.6. Flow injection analysis methods (FIA).....	25

PART III

SAMPLING AND PRECONCENTRATION

III. Section A

III.A.1.	Objective of sampling.....	26
III.A.2.	Precautions for sampling.....	26
III.A.3.	Sampling locations.....	27
III.A.4	Sampling intervals.....	27
III.A.5.	Collection of samples.....	27
III.A.5.1.	Grab or catch sampling.....	27
III.A.5.2.	Composite sampling.....	28
III.A.5.3.	Integrated sampling.....	28
III.A.6.	Sampling methods.....	28
III.A.6.1.	Manual sampling.....	28
III.A.6.2.	Automatic sampling.....	28
III.A.7.	Sample containers.....	28
III.A.8.	Sample preservation and storage.....	29

III. Section B

III.B.	Preconcentration methods for phenolic comounds...	30
III.B.1.	Solvent extraction methods.....	30
III.B.2.	Distillation methods.....	31
III.B.3.	Chromatographic separation.....	31

PART IV

EXPERIMENTAL

SECTION 1

EVALUATION OF ORGANIC COMPOUNDS

IV.1.1.	Introduction.....	34
IV.1.2.	Experimental.....	36
IV.1.2.1	For Total Organic Carbon (TOC).....	36
IV.1.2.1.1	Samples.....	36
IV.1.2.1.2.	Reagents.....	36
IV.1.2.3.	Instruments and apparatus.....	36
IV.1.2.1.4.	Procedures.....	37
IV.1.2.2.	For Biochemical oxygen demand (BOD).....	37
IV.1.2.2.1.	Samples.....	38
IV.1.2.2.2.	Reagents.....	38
IV.1.2.2.3.	Instruments and apparatus.....	38

IV.1.2.2.4.	Procedure.....	38
IV.1.2.3.	For chemical oxygen demand (COD).....	39
IV.1.2.3.1.	Samples.....	40
IV.1.2.3.2.	Reagents.....	40
IV.1.2.3.3.	Instruments and apparatus.....	40
IV.1.2.4.	Procedure.....	40
IV.1.3.	Results and discussion.....	41

SECTION 2

NOVEL POLY (VINYL CHLORIDE) MATRIX MEMBRANE ELECTRODES FOR THE DETERMINATION OF PHENOLIC POLLUTANTS IN WASTE WATER

IV.2.1.	Introduction.....	49
IV.2.2.	Experimental.....	50
IV.2.2.1.	Samples.....	52
IV.2.2.1.1.	Pure samples.....	52
IV.2.2.1.2.	Waste water samples.....	52
IV.2.2.2.	Reagents.....	52
IV.2.2.3.	Standard solutions.....	52
IV.2.2.4.	Instruments.....	52
IV.2.2.5.	Procedures.....	53
IV.2.2.5.1.	Fabrication of PVC membrane sensors.....	53
IV.2.2.5.2.	Application on pure samples.....	53
IV.2.2.5.3.	Application on synthetic mixtures of o-cresol and Phenol.....	54
IV.2.2.5.4.	Application to waste water samples.....	54
IV.2.2.6.	Study of the experimental conditions.....	55
IV.2.2.6.1.	Identification of slope , response time , and operative life of the studied electrodes.....	55
IV.2.2.6.2.	Effect of pH.....	56
IV.2.2.6.3.	Effect of temperature.....	56
IV.2.2.6.4.	Effect of foreign compounds.....	56
IV.2.3.	Results and discussion.....	57

SECTION 3

SPECTROPHOTOMETRIC DETERMINATION OF PHENOLIC POLLUTANTS IN WASTE WATER

(A)

SPECTROPHOTOMETRIC DETERMINATION OF PHENOLIC POLLUTANTS IN WASTE WATER VIA COUPLING WITH FAST RED AL SALT

IV.3.A.1.	Introduction.....	77
IV.3.A.2.	Experimental.....	78
IV.3.A.2.1.	Samples.....	78
IV.3.A.2.2.	Reagents.....	79
IV.3.A.2.3.	Standard solutions.....	79
IV.3.A.2.4.	Instruments.....	79
IV.3.A.2.5.	Procedures.....	80
IV.3.A.2.5.1.	Preconcentration of waste water samples.....	80
IV.3.A.2.5.2.	Spectrophotometric determination of phenol via coupling with fast red AL salt.....	80
	(1) Spectral characteristics of the reaction product.....	80
	(2) Linearity.....	80
	(3) Application of the proposed procedures for the determination of the collected waste water samples.....	81
	(a) For sample 1.....	81
	(b) For other samples.....	81
IV.3.A.2.6.	Studying of the experimental conditions of the spectrophotometric determination of phenol via coupling with fast red AL salt.....	81
	(1) Effect of the medium of reaction.....	81
	(2) Effect of concentration of fast red AL salt on the absorbance of the formed azo - dye.....	82
	(3) Effect of time on the reaction.....	82
	(4) Stoichiometry of the reaction.....	82
IV.3.A.3.	Result and discussion.....	83

(B)

**SPECTROPHOTOMETRIC DETERMINATION OF
PHENOLIC POLLUTANTS IN WASTE WATER
VIA COUPLING WITH FAST RED B SALT**

IV.3.B.1.	Introduction.....	101
IV.3.B.2.	Experimental.....	101
IV.3.B.2.1.	Samples.....	101
IV.3.B.2.2.	Reagents.....	102
IV.3.B.2.3.	Standard solutions.....	102
IV.3.B.2.4.	Instruments.....	102
IV.3.B.2.5.	Procedures.....	102
	(1) Spectral characteristics of the reaction product.....	102
	(2) Linearity.....	103
	(3) Application of the proposed procedure for the determination of the collected waste water samples.....	103
	(a) For sample I.....	103
	(b) For other samples.....	103
IV.3.B.2.6.	Study of the experimental conditions of the spectrophotometric determination of phenol via coupling with fast red B salt.....	103
	(1) Effect of pH on the reaction.....	104
	(2) Effect of dilution by different solvents	104
	(3) Effect of concentration of fast red B salt.....	104
	(4) Effect of time on the reaction.....	104
	(5) Stoichiometry of the reaction.....	105
IV.3.B.3.	Results and discussion.....	105

(C)

**SPECTROPHOTOMETRIC DETERMINATION OF
PHENOLIC POLLUTANTS AS AN ION PAIR
BY BASIC DYE TECHNIQUE USING
METHYLENE BLUE**

IV.3.C.1.	Introduction.....	119
IV.3.C.2.	Experimental.....	119
IV.3.C.2.1.	Samples.....	119
IV.3.C.2.2.	Reagents.....	119
IV.3.C.2.3.	Standard solutions.....	120

CONTENTS

IV.3.C.2.4.	Instruments.....	120
IV.3.C.2.5.	Procedures.....	120
(1)	Spectral characteristics of the reaction product.....	120
(2)	Linearity.....	120
(3)	Application of the proposed procedure for the determination of the collected waste water samples.....	121
(a)	For sample I.....	121
(b)	For other samples.....	121
IV.3.C.2.6.	Study of the experimental conditions of the spectrophotometric determination of phenol as an ion - pair by basic dye technique using methylene blue.....	121
(1)	Effect of pH on the reaction.....	121
(2)	Effect of concentration of the basic dye on the absorbance of the formed ion - pair.....	122
(3)	Effect of time on the reaction.....	122
(4)	Stoichiometry of the reaction.....	122
IV.3.C.3.	Results and discussion.....	122

SECTION 4

DENSITOMETRIC DETERMINATION OF PHENOLIC POLLUTANTS IN WASTE WATER

(A)

DENSITOMETRIC DETERMINATION OF PHENOLIC POLLUTANTS IN WASTE WATER VIA COUPLING WITH FAST RED AL SALT

IV.4.A.1.	Introduction.....	138
IV.4.A.2.	Experimental.....	138
IV.3.A.2.1.	Samples.....	138
IV.4.A.2.2.	Reagents.....	138
IV.4.A.3.	Standard Solutions.....	139
IV.4.A.4.	Prepared mixtures.....	139
IV.4.A.5.	Apparatus.....	140
IV.4.A.6.	Procedures.....	140
(1)	Linearity.....	140
(2)	Application of the densitometric method for the determination of the phenolic compounds in a synthetic laboratory prepared mixtures.....	141
