ASSESSMENT OF THE ROLE OF Nd:YAG LASER IN MANAGEMENT OF POSTERIOR CAPSULE OPACIFICATION

B13301

Thesis

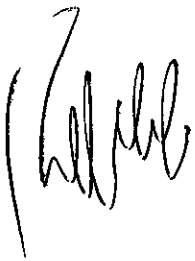

Submitted for partial fulfillment of
M.Sc. degree in Ophthalmology

By

Hatem Mohamed Gad Marey
(M.B.B.ch.)

Resident of Ophthalmology
Faculty of Medicine – Menufiya University

Supervisors

Dr. Mostafa Kamal Nassar
Assist. Prof. of Ophthalmology
Faculty of Medicine – Menufiya University

Dr. Abdel-khalik Ibrahim El-Saadani
Assist. Prof. of Ophthalmology
Faculty of Medicine – Menufiya University

Dr. Hoda Mohamed Kamel El-Sobky
Lecturer of Ophthalmology
Faculty of Medicine – Menufiya University

Faculty of Medicine
Menufiya university
2002

1402.1.1

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

"...وَقُلْ رَبِّ زِدْنِي عِلْمًا"

صَدَقَ اللَّهُ الْعَظِيمُ

"سُورَةُ طه آيَةُ ١١٤"

Acknowledgments

All praise is due to *Allah* the most gracious, most merciful, free of all needs and most generous.

I would like to express my deepest gratitude and sincerest thanks to *Prof. Dr. Saber Hamed El-Sayed* professor and head of ophthalmology department, Menufiya University for the valuable supervision, kindness and encouragement he offered me in this work.

I wish also to express my appreciation to *Dr. Mostafa Kamal Nassar* assistant professor of ophthalmology, Menufiya University for his skillful supervision and guidance.

I am greatly indebted to *Dr. Abdel-Khalik Ibrahim El-Saadani* assistant professor of ophthalmology, Menufiya University for the great efforts and valuable instructions.

I wish to thank *Dr. Hoda Mohamed Kamel El-Sobky* lecturer of ophthalmology, Menufiya University who helped me to accomplish this work.

Finally *I* Would like to thank every member in Ophthalmology department, Menufiya University for their contribution to make this work come to light in its final form.

Hatem Marey

List of abbreviations

AHC	<i>Anterior hyloid face</i>
BAB	<i>Blood aqueous barrier</i>
CCC	<i>Continuous curvilinear capsulorhexis</i>
CME	<i>Cystoid macular edema</i>
ECCE	<i>Extra capsular cataract extraction</i>
EMFS	<i>Electromagnetic field stress</i>
eV	<i>electron volts</i>
ICCE	<i>Intracapsular cataract extraction</i>
IL-1	<i>Interleukine 1</i>
IL-6	<i>Interleukine 6</i>
IOL	<i>Intraocular lens</i>
IOP	<i>Intraocular pressure</i>
mm	<i>Millimeter</i>
mmHg	<i>Millimeter mercury</i>
mrad	<i>Milliradians</i>
Nd: YAG	<i>Neodymium:Yetrium-Aluminium-Garnet</i>
nm	<i>Nanometer</i>
nsec	<i>Nanosecond</i>
PAS	<i>Periodic acid-schiff</i>
PCO	<i>Posterior capsule opacification</i>
PMMA	<i>Poly methyl metacrylate</i>
psec	<i>Pico second</i>
RD	<i>Retinal detachment</i>
SEM	<i>Scanning electron microscope</i>
TEM	<i>Transmission electron microscope</i>
TNF	<i>Tissue necrosis factor</i>
μ	<i>Micrometer</i>
UVR	<i>Ultra violet rays</i>

List of tables

Table number	Table name	Page number
I	Classification of PCO	26
II	Parameters of Nd: YAG laser	43
III	Master table	76-79
IV	Age distribution	81
V	Sex distribution	82
VI	Distribution of cases according to the phakic state	84
VII	Distribution of cases according to the density of the posterior capsule opacification	86
VIII	Distribution of cases according to the time lapsed between surgery and laser application	88
IX	Distribution of cases according to the shape of capsulotomy	90
X	Distribution of cases according to number of shots in each case	93
XI	Distribution of cases according to the amount of energy in each case	95
XII	Distribution of cases according to the total energy in each case	97
XIII	Change in the best corrected visual acuity	100
XIV	Change in the contrast sensitivity test results	102
XV	Distribution of cases according to the complications	104

List of figures

Figure number	Figure name	Page number
1	Stages of growth of the embryonic lens	5
2	Diagrammatic illustration of the major components of the adult lens	10
3	Variation in the thickness of the lens capsule	10
4	Optical delivery system of photodisruptive YAG laser instrument	31
5	Initiation, growth, and shielding effect of plasma formation by optical breakdown	36
6	Plasma shielding of a train of mode-locked pulses by breakdown in a gas and liquid	37
7	Simulation of pseudophakic vision by a camera fitted with an IOL lens, with intact capsule and 1 mm capsular opening	46
8	Simulation of pseudophakic vision by a camera fitted with an IOL lens, with 2mm, 3mm, and 4 mm capsular opening	47
9	An opaque capsule opened in the presence of posterior chamber pseudophakos	51
10	Demonstration plate (stripped) of the Cambridge low contrast gratings	69
11	Demonstration plate (non-stripped) of the Cambridge low contrast gratings	70
12	Alcon series 3000 Nd: YAG laser	72
13	Percentage distribution of cases according to the phakic state	85
14	Percentage distribution of cases according to the density of the posterior capsule opacification	87
15	Percentage distribution of cases according to the time lapsed between surgery and laser application	89
16	Percentage distribution of cases according to the shape of capsulotomy	91
17	Percentage distribution of cases according to number of shots in each case	94
18	Percentage distribution of cases according to the amount of energy in each case	96
19	Percentage distribution of cases according to the total energy in each case	98
20	Change in the best corrected visual acuity	101
21	Change in the contrast sensitivity test results	103
22	Percentage distribution of cases according to the complications	105
