Chemistry Department

Synthesis and Reactions of Some Heterocycles Containing Nitrogen and Sulphur of Anticipated Biological Activity

Thesis Submitted for Ph.D. Degree in Science
Presented by

Nancy Abdel Gawad Hamed

M.Sc.(2005)

Under the Supervision of

Prof. Dr. Mahmoud. R. Mahmoud (The late)

Professor of Organic Chemistry
Chemistry Department, Faculty of Science, Ain Shams University.

Prof. Dr. Magda . I. Marzouk

Professor of Organic Chemistry
Chemistry Department, Faculty of Science, Ain Shams University.

Dr. Mahmoud. F. Ismail

Lecturer of Organic Chemistry
Chemistry Department, Faculty of Science, Ain Shams University

Dr. Mohamed. H. Hussein

Lecturer of Organic Chemistry
Chemistry Department, Faculty of Science, Ain Shams University

Department of Chemistry
Faculty of Science
Ain Shams University
2019

**Faculty of Science
Ain Shams University
Chemistry Department**

Name : Nancy Abdel Gawad Hamed Abdel Gawad

**Scientific Degree : Ph.D. Degree in Science
(Chemistry)**

Department : Chemistry Department

Faculty : Faculty of Science

University : Ain Shams University

Year : 2019

ACKNOWLEDGMENTS

"First of All, Thanks to Allah"

[For the infinite helps and persistent supply with patience and efforts to accomplish this work successfully.

Deep thanks are due to Soul of **Prof. Mahmoud R. Mahmoud**, *Professor of Organic Chemistry, Faculty of Science, Ain Shams University*; I appreciate his vast knowledge and skills. Lucky me that he supervised my work and for choosing me as one of his students.

Also, I would like to express my deepest thanks and sincere gratitude to **Prof. Magda I. Marzouk**, *Professor of Organic Chemistry, Faculty of Science, Ain Shams University*; for her sincere guidance with encouragement, continuous interest, moral Support, sponsorship, constructive criticism and kind helps throughout this work.

Also, I am cordially indebted to **Dr. Mahmoud F. Ismael**, *Lecturer of Organic Chemistry, Faculty of Science, Ain Shams University*; to follow the progress of the work with keen interest and guidance, fruitful and helpful discussions during his direct supervision throughout this work.

Also, I am deeply appreciated to **Dr. Mohamed H. Hekal**, *Lecturer of Organic Chemistry, Faculty of Science, Ain Shams University*; to follow the progress of the work with keen interest and guidance, fruitful and helpful discussions during his direct supervision throughout this work.

I would also like to thank my Family, my friends, my Colleagues for exchanges of knowledge, skills, and venting of frustration during the research, which helped enrich the experience.

Nancy Abdel Gawad Hamed

Dedication

To my parent soul,

I have to thank Allah for choosing both of you to be my parent and I hope to be with you in a good place in paradise.

To my Family,

Thanks, I will never can finish this work without your being near from me and your infinite support.

To my friends and Colleagues

Thank you for helping me, your help make me stronger to complete these work.

Nancy Abdel Gawad Hamed

بسم الله الرحمن الرحيم

(وما أوتيتم من العلم الا قليلا)

صدق الله العظيم

Abstract	I-II
English Summary	i-x
Introduction:	
Introduction Part I	1-34
Introduction Part II	35-71
Discussion:	
Discussion Part I	72-94
Discussion Part II	95-128
Figures	129-250
Experimental	251-265
Reference	266-286
Arabic Summary	ث-ا

List of Tables:

Table	Page
Table 1. Cytotoxicity (IC ₅₀) of the tested compounds on different cell lines	92
Table 2: Cytotoxicity of the chosen compounds toward (HepG2) and (HCT-116) cell lines.	121
Table 3: Antimicrobial activity expressed as inhibition diameter zones in millimeter (mm) of tested compounds against the pathogenically strains based on disc diffusion as assay.	125

List of Photo:

Photo	Page
Photo 1. Cytotoxicity (IC ₅₀) of the tested compounds on different cell lines.	93
Photo. 2: Cytotoxicity of the chosen compounds toward (HepG2) and (HCT-116) cell lines.	122
Photo. 3: Antibacterial activity of compound 27 (A ₂). Placed on disc in a media previously swabbed with Gram positive bacteri <i>Bacillus subtilus</i> (ATCC 6051) culture.	127
Photo. 4: Antibacterial activity of compound 27 (A ₂). Placed on disc in a media previously swabbed with Gram negative bacteria <i>Klebsiella pneumoniae</i> (ATCC 700603) culture.	127

Photo. 5: Antibacterial activity of compound 27 (A ₂). Placed on disc in a media previously swabbed with fungal strain <i>Candida albicans</i> (ATCC 10231) culture.	127
Photo. 6: Antibacterial activity of compound 25 (A ₃₈) and 26 (A ₃₂). Placed on disc in a media previously swabbed with fungal strain <i>Aspergillus niger</i> (ATCC 16404) culture.	128
Photo. 7: Antibacterial activity of compound 24b (A ₃₀) and 24a (A ₅₀). Placed on disc in a media previously swabbed with Gram negative bacteria <i>Klebsiella pneumoniae</i> (ATCC 700603) culture.	128
Photo. 8: Antibacterial activity of compound 24b (A ₃₀) and 24a (A ₅₀). Placed on disc in a media previously swabbed with fungal strain <i>Candida albicans</i> (ATCC 10231) culture.	128
