**SOME STRATIGRAPHICAL AND
SEDIMENTOLOGICAL STUDIES ON THE RAS
BANAS PENINSULA, RED SEA MARGINAL AREA,
SOUTHERN PART OF EGYPT.**

**THESIS PRESENTED
TO THE ASWAN FACULTY OF SCIENCE-ASSIUT UNIVERSITY
FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
IN SCIENCE (GEOLOGY)**

**BY
KAMAL ABOU EL MAGD ALI**

B.SC. , 1979

M.SC. , 1985

SUPERVISED BY

**Dr. EZZAT KHEDR
ASSOC. PROF., GEOLOGY DEP.
ASWAN FACULTY OF SCIENCE**

**Dr. ADEL W. FELESTEEN
LECTURER, GEOLOGY DEP.
ASWAN FACULTY OF SCIENCE**

**Prof. DR. RYO MATSUMOTO
GEOLOGICAL INSTITUTE
FACULTY OF SCIENCE
TOKYO UNIVERSITY**

1994

TO
MY WIFE AMAL
MY SON YASSER
And
MY DAUGHTER SAMAR

ACKNOWLEDGMENTS

The author thanks Allah who guided and help me to present this work.

The author is deeply indebted to Dr. E.Khedr, Assoc. Prof. Geology Department, Aswan Faculty of Science, now at Saudi Arabia, for his supervision, invaluable help and guidance, for critically reading and correcting the manuscript.

The author is greatly indebted to Dr. A.W. Felesteen, Geology Dept., Aswan Faculty of Science, for his supervision , true assistance and critically reading of the manuscript.

My deepest gratitude to Prof.Dr. R. Matsumoto, Geological Institute, Tokyo university for his kind supervision, continuous guidance fruitful discussion and critically reading of the manuscript.

My Deepest thank to Prof Dr. Hassan El Amin, Head of Geology Dept., Aswan Faculty of Science for his continuous interest and kind helps.

The author would like to offers his deep thank to Prof.Dr. M.A. El Maghraby, the Dean, Prof. Dr. A. I. Koreim, Vice- Dean, Dr. M. T. El Hati, Vice- Dean, Aswan Faculty of Science for their Kind assistance, help and supporting .

The author would like to offer his deep thank to Prof. Dr. S. Yoshida, Dr. R. Tada, Dr.S. Ogihara, Mr. Y. Hiroki, Mr. T. Irino, Mr. Y. Ahmed and Mrs. H. Wada, Geological Institute, Tokyo University, Japan, for their technical assistance and kind helps during my study at tokyo university.

Special thanks for the geologists of the Regional planning of Aswan for their sincere help.

My deepest thanks for the staff members and colleagues of the Geology Dept. for their unfailing help.

CONTENTS

CHAPTER ONE

INTRODUCTION

	Page
- Location	1
- Accessibility.....	1
- Climate.....	3
- Geomorphology.....	3
- Previous work	4
- Objectives and scope of the present study	13

CHAPTER TWO

LITHOSTRATIGRAPHY & BIOSTRATIGRAPHY

I. Lithostratigraphy	15
A. The Lower unit.....	19
1- Gebel El Rusas Formation	19
2- Abu Dabbab Formation	31

3- Um Gheig Formation.....	39
4- Samh Formation	39
B. The Upper Unit	45
5- Shagra Formation.....	45
6- Ras Ranga Formation.....	47
7- Holocene Sediments	51
II. BIOSTRATIGRAPHY.....	53
A. General	53
B. Biostratigraphic Zones	54
C. Age Assignment.....	56
Correlation.....	59

CHAPTER THREE

STRUCTURE

- Structural attitude of the study area	65
- Dip directions	66
- Unconformity surfaces	66
- Folding	69
- Faulting	69
- Tectonic setting of the study area.....	76

CHAPTER FOUR

PETROGRAPHY

I. Petrography of Clastic Rocks.....	82
1- Conglomerates.....	82
2- Sandstones	83
3- Claystones.....	87
II. Petrography of Evaporite Rocks.....	90
A. Primary Facies	92
1. Fine precipitated prismatic and lenticular gypsum	92
2. Crusts and beds (banks) of primary gypsum	94
B. Secondary Facies	100
1. Secondary gypsum	100
2. Secondary anhydrite.....	101
3. Carbonate secondary facies	104
4. Sulfur Ore	104
III. Petrography of carbonate rocks.....	106
- Methods of treatment of thin section data.	106
1. Um Hashema Carbonate Member.....	108
2. Um Gheig Formation	121
3. Samh Formation	128
4. Shagra Formation.....	136
5. Ras Ranga Formation	145

CHAPTER FIVE

MINERALOGY

- Method of study	153
-Results and discussion.....	154

CHAPTER SIX

SEDIMENTARY ENVIRONMENTS

I. The lower stratigraphic unit	166
1- Lower cycle of sedimentation	166
2- Middle cycle of sedimentation	168
3- Upper cycle of sedimentation	170
II. The upper stratigraphic unit.....	171
4- Lower cycle of sedimentation	171
5- Upper cycle of sedimentation.....	171
- Sequence of sedimentary events	173
- Factors controlling sedimentary cycles	177

CHAPTER SEVEN

DIAGENESIS AND GEOCHEMISTRY

- Diagenesis of Ras Banas Carbonate sediments.....	180
--	-----

I. Marine diagenesis	180
II. Meteoric water diagenesis	183
III. Dolomitization	185
- Distribution of dolomite	185
- Petrography of dolomite	187
- Geochemistry	193
- Chemical composition of dolomite	193
- Stable isotope results	200
- Proposed mixing zone dolomitization.....	208
- Proposed mechanisms for dolomitization.....	209
- Isotopic composition of limestones	211
- Sulfur isotopes of gypsum-anhydrite sediments	211

CHAPTER EIGHT

SUMMARY AND CONCLUSION

-Summary and conclusion	216
REFERENCES	235
ARABIC SUMMARY	

LIST OF FIGURES

	Page
Fig.(1)-Key map, showing the location of the studied sections.....	2
Fig. (2)- key to lithological, petrographical, and structural symbols, used in the columnar sections.....	20
Fig. (3)- Generalized stratigraphic column of Ras Banas Peninsula.	23
Fig. (4)- Photogeological map of the study area.....	24
Fig. (5)- Columnar section No.15, showing Gebel El Rusas Formation, measured north of Berenice Port.....	25
Fig. (6)-Simple, large scale, low angle cross-stratification in sandstone, Rod Wafi Sandstone Member of Gebel El Rusas Formation.	26
Fig. (7)- Green banded claystone alternated with gypsum bands, El Maghayer Shale Member of Gebel El Rusas Formation.....	26
Fig. (8)- Load casts structure in sandstone, Berenice Sandstone Member.	28
Fig. (9)- Thin and even-bedded sandstones, Berenice Sandstone Member.	28
Fig. (10)- Columnar section No.2, measured at Um Hashema locality.	29
Fig. (11)- Columnar section No.3, measured at Um Hashema locality.....	30
Fig. (12)- Pinching out reefal limestone replaced by gypsum and dolomite, Upper Bed of Um Hshema Member.	33
