BIOLOGICAL STUDIES ON SOME FRESHWATER LEECHES IN EGYPT

A THESIS

Submitted For The Award of The
Ph. D. Degree

By

Hanaa Atef Gouda
(M. Sc.)

Under the supervision of

Prof. Dr.
Mohamad A. Hussein
Prof. of Zoology
Faculty of Science
Assiut University

Dr.
Nasser A. El-Shimy
Prof. Ass. of Zoology
Faculty of Science
Assiut University

Assiut University
Faculty of Science
Department of Zoology

1994

B
181C9

ACKNOWLEDGEMENTS

First of all, gratitude and thanks to ALLAH who always helps and guides me.

The present work has been carried out under the supervision of Prof. Dr. Mohamad A. Hussein, Department of Zoology, Faculty of Science, Assiut University, and Dr. Nasser A. El-Shimy, Department of Zoology, Faculty of Science, Assiut University.

To Prof. Dr. Hussein, it is a good chance to express my deep gratitude and record sincere thanks for his kind help, continuous guidance, encouragement and constructive criticisms throughout various stages of the present work.

To Dr. El-Shimy, I am greatly indebted for his helpful guidance, continuous encouragement and help during different steps of the work. His efforts are greatly appreciated.

Thanks to Prof. Dr. Ezzat G. Yoakim, Ex-Head of Zoology Department, and Prof. Dr. Sayed H. Ismail, Head of the Department for their continuous encouragement.

Furthermore, I would like to record my deep thanks to all members of Zoology Department, Faculty of Science, Assiut University.

CONTENTS

	Page
I. INTRODUCTION	1
II. MATERIALS AND METHODS:	
- Collecting	10
- Rearing	10
- Narcotization	11
- Preparation for the ultrastructure study by SEM	12
- Preparation for the histological study by LM	13
- Preparation for counting chromosomes	13
- Studying feeding biology	14
- Studying the reproductive strategy	16
III. RESULTS AND DISCUSSION:	
Taxonomy of the studied species	17
1. THE ULTRASTRUCTURE OF THE BODY SURFACE:	
EXPLANATORY REMARKS:	
- Annulation	21
- Papillation	24
- Bayer's organs	26
- Sensillae	27
- Sensory buds	31
- Labial sense organs	34
- Nephropores	37
RESULTS:	
- <i>Alboglossiphonia polypompholyx</i>	38
- <i>Batracobdelloides tricarinatus</i>	47

- <i>Helobdella conifera</i>	55
- <i>Barbronia assiuti</i>	66
- <i>Salifa delicata</i>	74
DISCUSSION	83
2. COMPARATIVE HISTOLOGICAL STUDY:	
EXPLANATORY REMARKS:	
- Body wall	91
- Connective tissue	93
- Digestive system	95
- Reproductive system	99
- Coelom and vascular system	100
RESULTS :	
- Body wall	102
- Digestive system	113
- Reproductive system	125
- Vascular system	135
DISCUSSION	138
3. CHROMOSOMES' NUMBERS:	
- Explanatory remarks	142
- Results	146
- Discussion	150
4. FEEDING BIOLOGY AND BEHAVIOR:	
EXPLANATORY REMARKS:	
Feeding:	
- Predation	154
- Blood sucking	154
- Factors affecting feeding activity	155

- Prey detection	158
- Foraging behavior	158
- Diet-range	159
- Leeches as preys	161
- Growth	161
Behavior	162
RESULTS:	
- <i>Helobdella conifera</i>	167
- <i>Barbronia assiuti</i>	172
DISCUSSION	178
5. REPRODUCTIVE STRATEGY:	
EXPLANATORY REMARKS:	
- Reproduction and life cycle	180
- Reproductive strategies	181
- Control of breeding	182
- Spermatogenesis	183
- Oogenesis	184
- Fertilization	185
- Glossiphoniid cocoons	186
- Erpobdellid cocoons	186
RESULTS:	
- <i>Helobdella conifera</i>	187
- <i>Barbronia assiuti</i>	195
DISCUSSION	204
IV. SUMMARY	208
V. REFERENCES	214
VI. SUMMARY IN ARABIC	

LIST OF TABLES

Table No.		Page
(1)	Comparison between the ultrastructures of the body surface of the studied glossiphoniid species.....	65
(2)	Comparison between the ultrastructures of the body surface of the studied salifid species.....	82
(3)	Comparison between the body wall structures of the five studied species.....	112
(4)	Comparison between the internal structures of the studied glossiphoniid species.....	136
(5)	Comparison between the internal structures of the studied salifid species.....	137
(6)	Leech chromosome numbers (after Davies & Singhal, 1987).	144
(7)	Diploid chromosome numbers of the five studied species.	149
(8)	The amount of consumed food (<i>T. tubifex</i>) by three size-classes of <i>H. conifera</i>	170
(9)	The amount of consumed food (<i>T. tubifex</i>) by three size-classes of <i>B. assiuti</i>	176
(10)	Length, width and wet body weight for different chronological groups of <i>H. conifera</i>	194
(11)	Length, width and wet body weight for different chronological groups of <i>B. assiuti</i>	203

LIST OF FIGURES

Fig. No.	Page
(1) The somital theory of leeches, after Mann (1953).	23
(2) The amount of consumed food (<i>T. tubifex</i>) by the glossiphoniid leech; <i>H. conifera</i>	171
(3) The amount of consumed food (<i>T. tubifex</i>) by the salifid leech; <i>B. assiuti</i>	177

LIST OF PHOTOS

Photo No.	Page
(1) Scanning electron micrograph of <i>Alboglossiphonia polypompholyx</i> ; dorsal view, showing external features.....	42
(2) Scanning electron micrograph of <i>A. polypompholyx</i> ; ventral view, showing external features.....	42
(3&4) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing distribution of dome-shaped papillae on the anterior body region with numerous ostia.....	43
(5) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing papillae on mid-body segments with numerous paired and unpaired gland cells pores.....	43
(6) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing medium-sized, dome-shaped and minute papillae on the posterior body region.....	43
(7) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing enlarged sensory bud on the anterior margin of order sucker with numerous openings and S- & G-cilia.....	44
(8) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing enlarged sensory bud on mid-body segment with its cilia.....	44

(9) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing one sensory bud on posterior body region.....	44
(10) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing mouth opening with vertical fissure and nephropores on segments VIII & IX.....	45
(11) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing gonopores, each of which has only one row of genital plates (labia).....	45
(12) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing dome-shaped papillae on posterior body region with numerous ostia on the lateral sides.....	45
(13) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing posterior sucker with much more numerous pores.....	45
(14) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing enlarged sensory bud within the buccal cavity with numerous S- & G-cilia.....	46
(15) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing numerous sensory buds on a mid-body segment.....	46
(16) Scanning electron micrograph of <i>A. polypompholyx</i> ; dorsal view, showing enlarged sensory bud with its S- & G-cilia protruding from numerous pores.....	46
(17) Scanning electron micrograph of <i>Batracobdelloides tricarinatus</i> ; dorsal view showing external features.....	51

(18) Scanning electron micrograph of <i>B. tricarinatus</i> ; ventral view showing external features.....	51
(19) Scanning electron micrograph of <i>B. tricarinatus</i> ; dorsal view showing 3 series of annular papillae throughout the body.....	52
(20) Scanning electron micrograph of <i>B. tricarinatus</i> , dorsal view showing peduncle with small anus and posterior sucker.....	52
(21) Scanning electron micrograph of <i>B. tricarinatus</i> , dorsal view showing both small and large labial sense organs (SL,LL), on the anterior margin of the oral sucker.....	53
(22) Scanning electron micrograph of <i>B. tricarinatus</i> , showing an enlarged large labial sense organ with its S- & G-cilia.....	53
(23) Scanning electron micrograph of <i>B. tricarinatus</i> , dorsal view showing sensory buds near small papilla on one of mid-body segments.....	53
(24) Scanning electron micrograph of <i>B. tricarinatus</i> , showing enlarged sensory bud on mid-body segment.....	53
(25) Scanning electron micrograph of <i>B. tricarinatus</i> , ventral view showing mouth, anterior sucker, gonopores during breeding period and transverse rows of small annular papillae on the anterior body region.....	54
(26) Scanning electron micrograph of <i>B. tricarinatus</i> , showing enlarged large labial sense organ within the buccal cavity with its S- & G-cilia.....	54
