Faculty of science
Microbiology Department

Studies on chitinase productivity by some marine fungal isolates.

A Thesis submitted to
Faculty of science
Ain shams university
For the fulfillment of the degree of Doctor Philosophy (PhD) of science
In
(Microbiology)

By

Sarah Helal Ali Mansour

(B.Sc. 2007)

(M.Sc. Microbiology 2011)

Supervised by

Prof. Dr.

Naziha Mohamed Hassanein

Prof. of Microbiology
Microbiology Department
Faculty of Science
Ain Shams University

Prof. Dr.

Mohamed Adel Hussein

Prof. of Entomology
Entomology Department
Faculty of science
Ain Shams University

Prof. Dr.

Mona Abd El- Tawab Esawy

Prof. of Microbiology
Natural and Microbial Products
Chemistry Department
National Research Centre

Prof. Dr

Eman Fadl Ahmed

Prof. of Microbiology
Natural and Microbial Products
Chemistry Department
National Research Centre

Dr. Hend Mohamed Khater

Lecturer of Microbiology, Microbiology Department
Faculty of science, Ain Shams University

(2019)

Faculty of science
Microbiology Department

Approval Sheet

Name: Sarah Helal Ali Mansour.

Title: Studies on Chitinase Productivity by some marine fungal isolates.

**This Thesis for PhD Degree has been approved by the following:
Supervisors**

1. Prof. Dr. Naziha Mohamed Hassanein

Prof. of Microbiology, Microbiology Department, Faculty of Science,
Ain Shams university.

2. Prof. Dr. Mohamed Adel Hussein

Prof. of Entomology, Entomology Department, Faculty of Science,
Ain Shams University.

3. Prof. Dr. Mona Abd El- Tawab Esawy

Prof. of Microbiology, Natural and Microbial Products Chemistry
Department, National Research Centre, Dokki, Cairo.

4. Prof. Dr. Eman Fadl Ahmed

Prof. of Microbiology, Natural and Microbial Products Chemistry
Department, National Research Centre, Dokki, Cairo.

5. Dr. Hend Mohamed Khater

Lecturer of Microbiology, Microbiology Department, Faculty of Science,
Ain Shams University.

Advisory Committee

1. Prof. Dr. Sherif Moussa Hussieny Prof. of Microbiology, Faculty of girls for
science, Ain Shams University.

2. Prof. Dr. Hala Abdallah Farrag Prof. of Medical Microbiology, Egyptian Atomic
Energy Authority

3. Prof. Dr. Naziha Mohamed Hassanein Prof. of Microbiology, Faculty of Science,
Ain Shams university.

4- Prof. Dr. Mohamed Adel Hussein Prof. of Entomology, Entomology Department,
Faculty of Science, Ain Shams University.

Date of examination:

/ / 2019

Acknowledgements

Firstly, and forever, thanks to Allah for helping me to complete this thesis and showing me the right path.

*I wish to express her deep gratitude to Professor Dr. **Naziha Mohamed Hassanein**, Professor of Microbiology, Microbiology Department, Faculty of Science, Ain Shams University for her kind supervision, support, constructive criticism, remarkable observations and careful revision of the thesis.*

*I warmly thank professor Dr. **Mohamed Adel Hussein**, Professor of Entomology, Faculty of Science, Ain Shams University for his continuous encouragement, useful help, valuable suggestions and kind supervision in this work and fruitful discussion.*

*I am heartily thankful to my supervisor, professor Dr. **Mona Abd El –Tawab Esawy** Professor of Microbiology, Chemistry of Natural and Microbial Products Department, National Research center (NRC), Dokki, Cairo, for her continuous encouragement, useful help, valuable suggestions and kind supervision in this work, fruitful discussion and writing the thesis.*

*I warmly thank professor Dr. **Eman Fadel Ahmed**, Professor of Microbiology, Chemistry of Natural and Microbial Products Department, National Research center (NRC), Dokki, Cairo, for her continuous encouragement, useful help, valuable suggestions and kind supervision in this work, fruitful discussion and for critical reading and writing the thesis.*

*The author thanks are due to Lecturer Dr. **Hend Mohamed Khater** Lecturer of Microbiology, Microbiology Department, Faculty of Science, Ain Shams University for her kind supervision, support and remarkable observations.*

Acknowledgement

*I deeply thank professor Dr. **Naiera Ahmed** Professor of Microbiology, Chemistry of Natural and Microbial Products Department, National Research center (NRC), Dokki, Cairo, for her continuous and useful help during the experimental work dealing with the mathematical and statistical modeling.*

*I deeply thank professor Dr. **Azza Abd El-Fatah** Assistant Professor of Microbiology, Chemistry of Natural and Microbial Products Department, National Research center (NRC), Dokki, Cairo, for her useful help and valuable suggestions during the experimental work.*

*I warmly thank professor Dr. **Ahmed Haroun**, Professor of polymers, Chemical Industries Research Division, National Research center (NRC), Dokki, Cairo, for his help in this work.*

*Thanks, are also extended to the members of the **Department of Natural and Microbial Products Chemistry** and authorities of NRC for kind help and facilities provided and I offer my regards and blessings to all of those who supported me in any respect during the completion of the work.*

*And last but not least, Special thanks to my **family** for their great support, help, love, encouragement throughout my entire life without which I could never go through my work, I love you all.*

Aim of the study	1
Abstract	2
1. Introduction	5
2. Review of literature	9
2.1. N-acetylglucosamine (GlcNAc).....	9
2.2. Marine fungi.....	10
2.3. Chitin.....	12
2.3.1. Properties and chemical structure of chitin.....	12
2.3.2. Applications of chitin.....	16
2.3.3. Hydrolysis of chitin.....	15
2.4. Chitinases.....	18
2.4.1. Properties of chitinases.....	18
2.4.2. Types of chitinases according to chitinolytic action.....	19
2.4.3. Sources of chitinases.....	20
2.4.3.1. Microbial sources.....	20

2.4.3.1.1. Bacterial chitinases.....	21
2.4.3.1.2. Fungal chitinases.....	22
2.4.3. 2. Insect chitinases.....	23
2.4.3.3. Plant chitinases.....	23
2.4.4. Production of chitinases.....	24
2.4.5. Applications of chitinases.....	26
2.4.5.1. Biological control of plant pathogen.....	26
2.4.5.2. As insecticidal and biopesticide.....	29
2.4.5.3. Medical applications.....	32
2.4.5.4. In food products.....	33
2.4.5.5. Production of chito-oligosaccharides by biological treatment of chitinous waste.....	34
2.4.6. Chitinase enzyme immobilization.....	35

3. Materials and Methods

3.1. Materials	37
3.1.1. Marine samples source.....	37
3.1.1.1. Sample collection	37
3.1.1.2. Medium used for isolation.....	37
3.1.2. Chemicals.....	37
3.1.3. Instruments.....	38
3.2. Experimental Methods.....	39

3.2.1. Isolation of fungi and culture conditions.....	39
3.2.2. Identification of marine fungal isolates.....	40
3.2.2.1. Molecular identification by 18S rRNA	40
3.2.3. Mycotoxins evaluation for <i>Penicillium chrysogenum</i>	41
3.2.4. Screening and production media for chitinase enzyme....	43
3.2.4.1. Primary screening medium.....	43
3.2.4.2. Secondary screening medium.....	44
3.2.4.3. Medium for maintenance of stock cultures.....	44
3.2.4.4. Fermentaion medium.....	44
3.2.4.5. Inoculum medium.....	45
3.2.4.6. Solid state fermentation medium (SSF).....	45
3.2.5. Preparation of colloidal chitin.....	46
3.2.6. Estimation of dry weight.....	47
3.2.7. Assay of chitinase enzyme.....	47
3.2.7.1. Endochitinase assay.....	47
3.2.7.2. Exochitinase assay.....	48
3.2.8. Cell bound chitinase activity.....	48
3.2.9. Determination of protein content	49
3.2.10. Factors affecting chitinase production.....	49
3.2.10.1. The role of different incubation temperatures.....	49
3.2.10.2. Influence of different incubation periods.....	50

3.2.10.3. Effect of initial pH.....	50
3.2.10.4. Investigation of the optimum substrate for chitinase production.....	50
3.2.11. Statistical screening of nutritional parameters using Plackett– Burman Design (PBD).....	50
3.2.12. Optimization of nutritional components of medium by central composite design (CCD).....	53
3.2.13. Verification experiments.....	54
3.2.14. Large scale experiment.....	55
3.2.15. Separation by Thin layer chromatography (TLC).....	55
3.2.15.1. Aniline diphenylamine reagent preparation.....	56
3.2.16. Analysis by high performance liquid chromatography (HPLC).....	56
3.2.17. Partial purification and immobilization of Exochitinase.....	57
3.2.17. 1. Immobilization of partially purified exochitinase from <i>Penicillium chrysogenum</i> on type of clay called (Bentonite).....	58
3.2.17.1.1. Preparation of cetyltrimethylammonium bromide (CTAB) – Bentonite as a method for modification..	58
3.2.17.1.2. Immobilization of partially purified exochitinase on the modified bentonite by adsorption without cross	

linker.....	58
3.2.17.1.3. Immobilization partially purified exochitinase on the modified bentonite by addition of cross linker...	59
3.2.17.1.4. Immobilization on mixed gels.....	59
3.2.17.1.5. Immobilization on gelatin.....	60
3.2.18. Characterization study on the free and bentonite - immobilized exochitinase enzyme.....	60
3.2.18.1. Effect of different incubation temperatures.....	60
3.2.18.2. The role of pH on the free and immobilized exo – chitinase enzyme.....	61
3.2.18.3. Thermal stability of the free and immobilized exo chitinase enzyme.....	61
3.2.18.4. PH stability of the free and immobilized exo- chitinase enzyme.....	63
3.2.18.5. Effect of substrate concentration.....	64
3.2.18.6. Impact of salts on enzyme potency.....	64
3.2.18.7. Operational stability.....	65
3.2.19. Applications of the free and immobilized chitinase enzyme.....	66
3.2.19.1. Toxicological studies of chitinase on mosquito larvae, Culex pipiens L.....	66

3.2.19.1.1. Laboratory maintenance of <i>Culex pipiens</i> L.....	66
3.2.19.1.2. Stock Suspensions of the free and immobilized enzymes.....	66
3.2.19.1.3. Toxicological evaluation.....	67
3.2.19.1.4 Calculations and data analysis.....	68
3.2.19.2. Antifungal activity of the free and immobilized Chitinase.....	69

4. Experimental Results

4.1. Evaluation of the isolated marine fungi for chitinase Production.....	70
4.2. Molecular 18S rRNA identification of <i>Penicillium</i> <i>Chrysogenum</i>	73
4.3.2. Investigation of the toxicity of <i>Penicillium</i> <i>chrysogenum</i>	75
4.4. Optimization of culture constituents.....	78
4.4.1. Influence of incubation temperature on the production of chitinase by <i>Penicillium chrysogenum</i>	78
4.4.2. Effect of incubation period on the production of exochitinase by <i>Penicillium chrysogenum</i>	81
4.4.3. The role of initial pH on exochitinase.....	84

4.4.4. The impact of different Chitin sources on the activity of chitinase.....	87
4.4.5. Statistical screening for chitinase production.....	90
4.4.5.1. Plackett–Burman Design (PBD).....	90
4.4.5.2. Central composite design (CCD).....	102
4.4.5.3. Verification experiments.....	109
4.6. Enzyme production in large scale under the optimized production medium.....	112
4.7. Production of exochitinase on solid state fermentation (SSF).....	115
7.1. Thin layer chromatography (TLC) analysis for the produced exochitinase by solid state fermentation (SSF).....	118
4.8. Partial purification of exochitinase.....	120
4.8.1. Fractional precipitation of fermentation filtrate by acetone and ethanol.....	120
4.9. TLC qualitative analysis of N-Acetyl glucosamine.....	123
4.10. Analysis by high performance liquid chromatography
