

Investigation Of Some Artificial Food Additives In Food And Environmental Matrices

Thesis

**Presented for the partial fulfillment of
Master's degree in Pharmaceutical Sciences
(Pharmaceutical Analytical Chemistry)**

By

Nada Sherif Abdel Gawad Zamzam

B.Sc. in Pharmaceutical Sciences 2014

**Department of Pharmaceutical Analytical Chemistry
Faculty of Pharmacy, Ain Shams University**

Under the supervision of:

Prof. Dr. Maha Farouk Abdel Ghany

**Professor of Pharmaceutical Analytical Chemistry and Dean of The Faculty of Pharmacy
Ain Shams University**

The Late Associate Prof. Dr. Omar Abd El-Aziz Ghonim

**Associate Professor of Pharmaceutical Analytical Chemistry,
Faculty of Pharmacy, Ain Shams University**

Dr. Mona Hamdy Abdel Rahman

**Lecturer of Pharmaceutical Analytical Chemistry, Faculty of Pharmacy, Ain Shams University
Faculty of Pharmacy, Ain Shams University**

2019

Acknowledgements

I am deeply thankful for Allah for giving me the strength, determination and will to finish this thesis.

*I would like to express my honest appreciation to my thesis advisor **Prof. Dr. Maha Farouk Abdel Ghani**, Professor of Pharmaceutical Analytical Chemistry and Dean of the Faculty of Pharmacy, Ain Shams University, for her valuable scientific guidance, patience and continuous inspiration during the whole time of my work.*

*I would like to offer my thanks to our late **Dr. Omar Abd El-Aziz Ghonim**, Associate Professor of Pharmaceutical Analytical Chemistry, Faculty of Pharmacy, Ain Shams University, who, although have parted us, but will remain in our hearts and minds as the honorable and dedicated professor that he have always been, throughout his academic career.*

*My deep appreciation and gratitude goes to **Dr. Mona Hamdy Abdel Rahman**, Lecturer of Pharmaceutical Analytical Chemistry, Faculty of Pharmacy, Ain Shams University, for she have never failed to be my mentor, sister and advisor and I could not thank her enough for her patience, endurance and persistence in always pushing me forward in my work. Thank-you for your unceasing encouragement and care.*

*I am deeply indebted to **Dr. Hassan Hendawy**, Associate Professor of Pharmaceutical Analytical Chemistry, National Organization for Drug Control and Research (NODCAR) for his devoted work and selfless sparing of his effort and time in order to reach with my work the highest levels of faultlessness.*

I would also wish to thank all my colleagues in the Department of Pharmaceutical Analytical Chemistry, for without their constant help and support, I would not have been able to continue with this thesis.

I am also profoundly grateful for my extremely supportive family, my beloved mum, dad and sisters, and my loving husband whom Allah have blessed me all with. May Allah reward them for their kind hearts and always bring them together in goodness and wellness.

اللَّهُمَّ أَنْفَعْنَا بِمَا عَلَّمْتَنَا , وَعَلِّمْنَا مَا يَنْفَعُنَا , وَزِدْنَا عِلْمًا إِلَى عِلْمِنَا

اللهم اغفر لأبائنا و لأمهاتنا ولكل من له حق علينا

Nada Zamzam

Table of Contents

Table of Contents.....	I
List of Figures	XVI
List of Tables	XX
List of Abbreviations.....	XXIV
Preface.....	XXVII
Summary.....	XXVIII

Part I: General Introduction

I.1. Food Additives.....	2
I.2 Classification of Food Additives	3
I.3. Regulation of Food Additives	5
I.3.1 The Regulation and Development of Food Additives in the European Union (EU).....	5
I.3.2 The Regulation and Development of Food Additives in the United States (US).....	6
I.4 Classes of Food Additives under study	6
I.4.1 Class I: Sweeteners	6
I.4.2. Class II: Antioxidants.....	9
I.4.3. Class III: Colorants	10

Part II: Literature Review

II.1. Class 1: Artificial Sweeteners	13
II.1.A. Aspartame (ASP) (E951) and its degradant Phenylalanine (PHEN)	13
II.1.A.1. Aspartame Chemical Properties.....	13
II.1.A.2. Aspartame Physical Properties	14
II.1.A.3. Phenylalanine Chemical Properties.....	14
II.1.A.4. Phenylalanine Physical Properties	14
II.1.A.5. Aspartame Metabolism.....	15
II.1.A.6. Aspartame Stability	15
II.1.A.7. Aspartame Toxicity.....	16
II.1.A.8. Applications	16
II.1.B. Acesulfame K (ACE) (E950).....	17
II.1.B.1. Chemical Properties.....	17
II.1.B.2. Physical Properties	17
II.1.B.3. Acesulfame K Metabolism	18
II.1.B.4. Acesulfame K Stability	18
II.1.B.5. Acesulfame K Toxicity.....	18
II.1.B.6. Applications	19
II.1.C. Methods of Analysis of the studied Artificial Sweeteners: ASP and its degradate PHEN, and ACE.....	19

II.1.C.1. Spectroscopic Methods.....	19
II.1.C.2. Chromatographic Methods	22
II.1.C.2.1. Liquid Chromatography	22
II.1.C.3. Capillary Electrophoresis.....	27
II.1.C.4. Electrochemical Methods	28
II.1.C.5. Molecularly Imprinted Polymers (MIPs)	31
II.2. Class II: Antioxidants	32
II.2.A. Butylated hydroxytoluene (BHT) and its metabolites, BHT-Q and BHT-COOH.....	32
II.2.A.1. BHT Chemical Properties	33
II.2.A.2. BHT Physical Properties	33
II.2.A.3. BHT-Q Chemical Properties.....	34
II.2.A.4. BHT-Q Physical Properties	34
II.2.A.5. BHT-COOH Chemical Properties.....	34
II.2.A.6. BHT-COOH Physical Properties:	34
II.2.A.7. BHT Stability.....	35
II.2.A.8. BHT Metabolism.....	35
II.2.A.9. BHT Toxicity	36
II.2.B. Methods of Analysis of BHT and its metabolites, BHTQ and BHTCOOH ..	37
II.2.B.1. Electrochemical Methods	37
II.1.B.2. Chromatographic Methods.....	40

II.2.B.2.1. Micellar Electrokinetic Capillary Chromatography (MECK)	40
II.2.B.2.2. Liquid Chromatography	41
II.2.B.2.3. Gas Chromatography	44
II.3. Class III: Colorants	46
II.3.A.1. Chemical Properties	46
II.3.A.2. Physical Properties	46
II.3.A.3. Sudan I metabolism.....	47
II.3.A.4. Sudan I toxicity.....	48
II.3.B. Methods of Analysis of Sudan I.....	48
II.3.B.1. Spectroscopic Methods.....	48
II.3.B.2. Chromatographic Methods	51
II.3.B.2.1. Liquid Chromatography	51
II.3.B.2.2. Micellar Electrokinetic Chromatography (MECK).....	60
II.3.B.3. Electrochemical Methods.....	60
II.3.B.4. Molecularly Imprinted Polymers (MIPs).....	64
II.3.B.5. Enzyme-Linked Immunosorbent Assay (ELISA)	67
II.3.B.6. Chemiluminescence Methods	69
II.2.3.8. Miscellaneous.....	70

**Part III: Chromatographic Methods for Determination of the selected Food
Additives in Food and Environmental Matrices**

**Section A: HPLC-UV method for Determination of the Quaternary Mixture of
Aspartame (ASP), Acesulfame K (ACE), Phenylalanine (PHEN) and Butylated
Hydroxytoluene (BHT) in Food Products**

III.A.1. Introduction.....	77
III.A.2. Experimental.....	77
III.A.2.1. Apparatus	77
III.A.2.2. Materials.....	78
III.A.2.2.1. Pure Samples.....	78
III.A.2.2.2. Chemicals and Reagents	78
III.A.2.2.3. Standard Solutions	78
III.A.2.3. Procedure.....	79
III.A.2.3.1. Chromatographic Conditions	79
III.A.2.3.2. Method Validation	79
1. Linearity.....	79
2. Accuracy.....	80
3. Precision.....	80
4. Limit of Detection (LOD) and Limit of Quantitation (LOQ)	80
5. Robustness.....	81

III.A.2.3.3. Application to Commercial Samples.....	81
III.A.3. Results and Discussion	81
III.A.3.1. Optimization of HPLC Analysis	82
1. Effect of pH of Mobile Phase.....	83
2. Effect of Mobile Phase Component Ratios	83
3. Effect of Wavelength Variation.....	83
III.A.3.2. Optimization of Sample Preparation.....	84
III.A.3.3. System Suitability.....	85
III.A.3.4. Method Validation	85
III.A.3.5. Application to Real Chewing Gum Samples.....	87
III.A.3.6. Statistical Analysis.....	87
III.A.3.7. Assessment of Greenness of the Developed Method	87
III.A.3.7.1. National Environmental Methods Index label (NEMI)	88
III.A.3.7.2. Analytical Eco-Scale	89
III.A.3.7.3. HPLC-Environmental Assessment Tool (EAT).....	89
III.A.4. Conclusion.....	90

**Section B: UPLC-MS/MS Method for Determination of the Quaternary Mixture
of Butylated Hydroxytoluene (BHT), 3,5-di-tert-butyl-4-hydroxybenzoic acid
(BHT-COOH), 2,6-di-tert-butyl-1,4-benzoquinone (BHT-Q) and Sudan I in River
Water Samples**

III.B.1. Introduction	107
III.B.2. Experimental	108
III.B.2.1. Apparatus.....	108
III.B.2.2. Materials.....	108
III.B.2.2.1. Pure Standards	108
III.B.2.2.2. Chemicals and Reagents	108
III.B.2.2.3. Standard Solutions	109
III.B.2.3. Procedure.....	109
III.B.2.3.1. Chromatographic Conditions	109
III.B.2.3.2. MS/MS conditions.....	109
III.B.2.3.3. Method Validation.....	110
1. Linearity.....	110
2. Accuracy.....	110
3. Precision.....	110
4. LOD and LOQ.....	111
III.B.2.3.4. Study sites and Sample Collection.....	111
III.B.2.3.5. Application to Environmental Samples: Extraction Method	112

III.B.2.3.6. Matrix Effect and Quality Control	112
III.B.3. Results and Discussion.....	113
III.B.3.1. Optimization of Extraction Procedure	114
1. Effect of Extraction Solvent Type	114
2. Effect of pH.....	114
3. Effect of Extraction Solvent Volume and Extraction Time	115
III.B.3.2. Evaluation of Matrix Effect	115
III.B.3.3. Analytical Characteristics and Method Validation.....	116
III.B.3.4. Application in Environmental Samples.....	117
III.B.3.5. Statistical Analysis	117
III.B.3.6. Assessment of Greenness of the Developed Method	118
III.B.3.6.1. Analytical Eco-Scale	118
III.B.3.6.2. HPLC-Environmental Assessment Tool (EAT).....	118
III.B.3.7. Conclusion.....	119

Part IV: Spectrophotometric Methods for Determination of the selected Food Additives in Food Products

Section A: Dual Wavelength and Zero-Order Crossing First Derivative Spectrophotometric Methods for the Determination of the Binary Mixture of Acesulfame K (ACE) and Butylated Hydroxytoluene (BHT)

IV.A.1. Introduction.....	142
---------------------------	-----

IV.A.2. Theoretical Background	142
IV.A.2.1. Dual Wavelength spectrophotometric method (DW).....	142
IV.A.2.2. Zero-Crossing First Derivative spectrophotometric method (ZCF)	143
IV.A.3. Experimental.....	143
IV.A.3.1. Instrumentation.....	143
IV.A.3.2. Materials.....	144
IV.A.3.2.1 Pure Standards.....	144
IV.A.3.2.2. Chemicals and Reagents.....	144
IV.A.3.3.3. Commercial Samples	144
IV.A.3.2.4. Standard and Working Solutions	144
IV.A.3.3. Procedures.....	145
IV.A.3.3.1. Spectral Characteristics and Wavelength Selection.....	145
IV.A.3.3.2. Method Validation	146
1. Linearity and Construction of Calibration Curves:	146
2. Accuracy.....	146
3. Precision.....	147
4. Selectivity.....	147
5. Limit of Detection (LOD) and Limit of Quantitation (LOQ)	147
IV.A.4. Application of the Proposed Methods for the Simultaneous Determination of ACE and BHT in Chewing Gum samples	148
IV.A.5. Results and Discussion	148

IV.A.5.1. Method Validation	149
IV.A.5.2. Application of the Proposed Methods for the Simultaneous Determination of ACE and BHT in Chewing Gum samples	150
IV.A.5.3. Statistical Analysis.....	151
IV.A.5.4. Evaluation of the Greenness of the proposed methods	151
IV.A.5.4.1. National Environmental Methods Index label (NEMI)	151
IV.A.5.4.2. Analytical Eco-Scale.....	151
IV.A.6. Conclusion	152

**Section B: First Derivative-Ratio Spectrophotometric Method for Determination
of the Ternary Mixture of Aspartame (ASP), Acesulfame K (ACE) and Butylated
Hydroxytoluene (BHT)**

IV.B.1 Introduction.....	166
IV.B.2 Theoretical Background.....	167
IV.B.3 Experimental.....	168
IV.B.3.1 Instrumentation.....	168
IV.B.3.2. Materials.....	168
IV.B.3.2.1. Pure Standards.....	168
IV.B.3.2.2. Chemicals and Reagents	169
IV.B.3.2.3. Standard and Working Solutions	169
IV.B.3.2.4. Commercial Samples	169

IV.B.3.3 Procedures	169
1. Spectral Characteristics of ASP, ACE and BHT	169
2. Derivative Ratio Spectra of ASP, ACE and BHT.....	169
IV.B.3.3.3. Method Validation	170
1. Linearity	170
2. Accuracy.....	171
3. Precision.....	171
4. Selectivity.....	171
5. LOD and LOQ.....	172
IV.B.3.3.4. Application of the Proposed Methods for the Simultaneous Determination of ASP, ACE and BHT in Chewing Gum samples	172
IV.B.3.3.4.1. Sample Preparation	172
IV.B.4. Results and Discussion	172
IV.B.4.1. Selection of the divisor and derivative parameters for the simultaneous determination of the three additives.....	172
IV.B.4.2. Method Validation	174
IV.B.4.3. Application of the Proposed Methods for the Simultaneous Determination of ASP, ACE and BHT in Chewing Gum samples	175
IV.B.4.4. Statistical Analysis.....	175
IV.B.4.5. Evaluation of the greenness of the proposed method.....	175
IV.B.4.5.1. National Environmental Methods Index label (NEMI)	175
IV.B.4.5.2. Analytical Eco-Scale.....	176

IV.B.5. Conclusion	176
