## STATEMENT

This dissertation is submitted to Ain Shams University for the degree of Doctor of Philosophy in Civil Engineering.

The work included in this thesis was carried out in the department of Irrigation and Hydraulics, Ain Shams University, as well as in Delft University of Technology from June 1995 to October 2000.

No part of this thesis has been submitted for a degree or a qualification at any other University or institution.

Date: 30/10/2000

Name: Ahmed Shawky Mohamed

Signature: *Ahmed Shawky*

## Viva

Name: Ahmed Shawky Mohamed

Birth: Cairo, October 19<sup>th</sup>, 1968

Academic degrees:

- M.Sc. in Irrigation Engineering, Southampton University, England, 1994.
- B.Sc. in Civil Engineering, Ain Shams University, 1990.

Affiliation: Civil Engineer, Ministry of Water Resources and Irrigation.

*To those very few people who do care about my  
success*

Acronyms, Abbreviations, and Units of Measurements	II
Tables and Figures	IV
Summary	VI
Abstract	I
 <b>Chapter</b>	
 <b>1: Introduction</b>	 2
1.1 Background	2
1.1.1 The natural water resources system of Egypt	2
1.1.2 Water users in Egypt and the socio-economic system	3
1.2 Motivation and rationale for the research	7
1.2.1 Discrepancy of opinions on Egypt's water management	7
1.2.2 Forecasts and policy shortcomings	10
1.3 Research objectives	11
 <b>2: A framework for analysis of WDM strategies</b>	 13
2.1 A framework for analysis for strategic planning	13
2.1.1 Principles	13
2.1.2 Conceptual framework	20
2.2 Cost-benefit analysis of WDM measures	27
2.3 The economic efficiency maximand and the national planning context	35
2.4 The society maximand	38
 <b>3. WDM in Egypt: policy objectives, strategy measures, &amp; scenario variables</b>	 43
3.1 Policy objectives driving the need for WDM in Egypt	43
3.1.1 Economic efficiency, cost recovery, and scarcity rent collection	43
3.1.2 New-land development and food self-sufficiency	45
3.1.3 Water pollution control	47
3.2 Strategy measures for WDM in Egypt	49
3.3 Scenario variables for WDM in Egypt	56
3.4 Strategy design	57
3.5 Conclusions	62

<b>4. Criteria of water demand management</b>	<b>63</b>
4.1 Rationale	63
4.2 Economic efficiency	64
4.3 Coupling negative incentives to welfare compensation	67
4.4 Effectiveness and fairness	70
4.5 The scarcity rent and concept of "no ultimate water scarcity"	71
4.6 Cost recovery and scarcity rent recovery	74
4.7 The effect of user's size	76
4.8 Volumetric pricing and quota regulation versus other measures	77
4.9 Conclusions	79
4.10 Glossary	81
 <b>5. Experience on water demand management</b>	 <b>83</b>
5.1 Financial implementation incentives	83
5.2 Technical measures	101
5.3 Legal instruments	129
5.4 Institutional arrangements	134
 <b>6. Case study: Cost-effectiveness of wastewater treatment for control of Nile pollution</b>	 <b>138</b>
6.1 Inception study	138
6.1.1 Background on the water quality status	138
6.1.2 Objectives of the case study	139
6.1.3 Analysis assumptions, constraints, and approach	139
6.2 Development phase	141
6.2.1 Scenario development	141
6.2.2 Base case and bottleneck analysis	142
6.3 Selection phase	144
6.3.1 Methodology for assessment	144
6.3.2 Strategy measures and strategy design	145
6.3.3 Strategy assessment and presentation of results	147
6.4 Conclusions and recommendations	150
