

Ain shams university – Faculty of Engineering
Department of Architecture

Designing for learning
Studying Outdoor Environment of Primary Schools in Egypt

A Thesis presented in Partial Fulfilment of the Requirements for Master of
Science Degree in Architecture Engineering.

Submitted by

Alaa Abd-Elmoniem Abd-Elraziq El-Telwany

BSc in Architecture 2014 – Ain shams university

Under Supervision of

Prof. Dr. Muhammed Ibrahim Gabr

Professor of Architecture, Faculty of Engineering, Ain Shams University

Dr. Tamer Samir Mahmoud

Assistant Professor of Architecture, Faculty of Engineering, Ain Shams University

Dr. Ayman Muhammed Assem

Assistant Professor of Architecture, Faculty of Engineering, Ain Shams University

2020

Disclaimer

This thesis is submitted to Ain Shams University M.Sc. degree in architecture.

The work included in this thesis was carried out by the researcher at the department of architecture, faculty of engineering, ain shams university, during the period from 2016 to Jan. 2020.

no part of this thesis has been submitted for a degree of a qualification at any other university or institute.

"اللهم انفعني بما علمتني ، وعلمني ما ينفعني ، وزدني علما ، والحمد لله على كل حال "

With setting the last final touches, I would thank god for being able to complete my research with success. Primarily, I would like to express my special thanks to Dr. Muhammed Ibrahim gabr whose valuable guidance has been the ones that helped to patch the path of this work. In addition to, DR. Ayman Assem and DR. Tamer Samir for their suggestions and instructions that served that as the major contributor to complete the study.

Then, I would thank my great father (Eng. Abdelmoniem EL-Telwany) and supporter mum (Mrs. Elham Hamam) without your efforts there is nothing come to light.

Finally, I am proud of the final thesis that represents the hard work of the last two years and wishes to be valuable work in my life.

Abstract

Primary education is a key factor in developing children's character and fulfil their special needs during schooling life. Subsequently, governments and educational organizations pay significant attention to this educational phase. Furthermore, the quality of the educational environment impacts educational performance. In most cases, The Egyptian schools underestimate the importance of the design quality of the schools' outdoor environment unlike educationally developed countries especially those interested in outdoor education. Thus, it is essential to highlight the role of the natural environment and the welfare of the educational outdoors environment for children in schools among urban planners, designers, and governmental authorities.

Unfortunately, the national Egyptian guidelines for schools' outdoor environment set by GAEB (General Authority for Educational Buildings) lack the design principles of schools' outdoor environment. These schools' outdoor areas considered a complimentary area for the school building only.

The study adopts that the *design language of outdoor spaces is ONE of the means of educational tools*. Hence, this study aims to build design principles for an educational outdoor environment for primary schools. These principles study the relationship between the educational settings children's development dimensions and the characteristics of the children's outdoor environment. The thesis classified these environment's characteristics into three categories: the motivations factors, the usability factors, and the legibility factors to create an active environment for children.

In addition, the compatibility of the principles relative to the governmental Egyptian and UK's design guidelines of the primary schools' outdoor environment was analyzed. These guidelines of Egyptian and UK were analyzed based on the design principles. This analyzes identified the strengths and weaknesses in supporting the outdoor educational environment. This led the study to analyze these impacts on real schools' models of both countries. The UK represents different methods and tools to apply these principles other than Egyptian guidelines that represent general lack in applying these principles.

Keywords: children's outdoor Environment – primary /elementary schools – outdoor education – children development.

Table of Contents

Introduction.....	i
1 the Egyptian education system.....	ii
1.1 The Egyptian education stages	iii
1.2 The role of the primary education stage	iii
1.2.1 The Egyptian primary education objectives	iv
1.2.2 The quality of the Egyptian primary education stage	iv
2 the outdoor environment of egypt.....	v
2.1 The Egyptian school's outdoor environment.....	v
2.2 The school's outdoor environment research in Egypt.....	vi
3 Research problem and objectives.....	vii
1.1 Research problem.....	vii
3.1 Research Objective.....	vii
3.2 Procedural Objectives	vii
4 Research Methodology.....	vii
5 Research structure	12
Building knowledge	1
1. Chapter 1: The relationship between environment and education 2	
1.1 Human-Outdoor environment relationships	3
1.1.1 The 'nature experience' is the main approach to shaping the outdoor environment	4
1.1.2 The nature-based education	5
1.1.3 The approaches of environment-based education.....	5
1.2 The outdoor education concepts	6
1.2.1 The experience is the main approach to outdoor education	7
1.2.2 The experiential education.....	8
1.2.3 The adventure education.....	9
1.2.4 The environmental education	10
1.3 The development of the outdoor education	12
1.4 Outdoor education project	15
1.4.1 The nature connections project	15
1.4.1.1 Pupils' developing factors	16
1.4.1.2 Teachers' developing factors.....	16
1.4.1.3 Curriculum's developing factors.....	17
1.4.1.4 Schools developing factors.....	17
1.4.1.5 The nature connections project's findings.....	17
1.5 The outcomes	18
2 Chapter 2: The theoretical framework of children-outdoor environment.....	19

2.1	The children-nature environment.....	20
2.1.1	Children and nature experiences	20
2.2	The theoretical framework view of children-nature relationships.....	22
2.2.1	The visual approach	22
2.2.2	Function approach.....	22
2.3	The children outdoor environment characteristics.....	24
2.3.1	The motivational factors.....	26
2.3.1.1	Environment's scale	26
2.3.1.2	Flexibility of environment.....	27
2.3.1.3	The aesthetics Quality	29
2.3.2	The usability factors.....	30
2.3.2.1	The accessibility.....	30
