ACKNOWLEDGMENT

I wish to express my thanks to Prof. Dr. Abu El Fotouh Abd El Hakim, Department of polymers and pigments, National Research Center, for his constructing guidance and valuable suggestions and scientific supervision. I am deeply grateful to him for his encouragement, nonfailing support and facilities he always offered.

I would also like to express my grateful thanks to Assis. Prof. Dr. Mai M. Kamal, Chemical Engineering Department, Faculty of Engineering, Cairo University, for kind supervision and unlimited assistance , reading, critiquing the manuscript, also her utmost patience and distinguished remarks are greatly acknowledged.

I wish to express also my profound gratitude and sincere appreciation to Assis. Prof. Dr. Ihab F. Abadir, Chemical Engineering Department, Faculty of Engineering, Cairo University, for suggesting the point of research and for his support and guidance through every stage of the work.

I would like to express my deepest thanks to my parents for their unlimited support, care and understanding. I am greatly indebted to them for their continuous encouragement and generous efforts throughout this thesis.

Contents

	<u>page</u>
Abstract	
Aim of the Work	
<u>Chapter One</u>	
Introduction	1
 <u>Chapter two</u>	
Background and Literature Survey	5
2.1 Polyvinyl Chloride (PVC)	5
2.1.1 Preparation of Vinyl Chloride Monomer	5
2.1.2 Polymerization of Vinyl Chloride	6
2.1.3 Properties of poly Vinyl Chloride	8
2.2 General Applications of Polyvinyl Chloride	9
2.2.1 Flexible PVC	9
2.2.2 Rigid PVC	10
2.3 Ingredients for Compounding	10
2.3.1 Plasticizers	11
2.3.1.1 Requisites of a Plasticizer	13
2.3.1.2 Plasticizer Characteristics	13
2.3.1.3 Plasticizer Type	17
2.3.1.4 plasticizers Selection	20
2.3.2 Stabilizers	21
2.3.2.1 Definition	21
2.3.2.2 Need for Stabilizers	22
2.3.2.3 Types of Thermal Stabilizers	22
2.3.2.4 Selection of Stabilizer	29
2.3.2.5 Effectiveness of Stabilizer	30
2.3.2.6 Degradation Mechanism	31

2.3.2.7 Degradation During Processing	33
2.3.2.8 Thermal Decomposition of PVC	35
2.3.3 Miscellaneous Additives	44
2.3.3.1 Lubricants	44
2.3.3.2 Fillers	45
2.3.3.3 Antioxidants	45
2.3.3.4 Antistatic Agents	46
2.3.3.5 Pigments	47
2.4 The Processing of PVC	48
2.5 Health and Environmental Problems	53

Chapter three

Material and Experimental Work	54
3.1 Materials	54
3.2 Experimental Work	55
3.2.1 Preparation of Polyvinyl chloride composites	56
3.3 Evaluation of Mechanical Properties	56
3.4 Thermogravimetric Analysis	57
3.5 Dielectric Properties Measurements	57
3.5.1 Dissipation Factor	57
3.5.2 Dielectric Constant	57
3.5.3 Loss Factor	58

Chapter Four

Result and Discussion	59
4.1 Plasticized PVC- Stabilizer Composites	59
4.2 Mechanical Properties	59
4.2.1 Mechanical Properties of Different Percentages of Mix (1) With Plasticized P.V.C	59
4.2.2 Mechanical Properties of Different Percentages of Mix (2) With Plasticized P.V.C	63

4.2.3 Mechanical Properties of Different Percentages of Mix (3) With Plasticized P.V.C	67
4.2.4 Mechanical Properties of Different Percentages of Mix (4) With Plasticized P.V.C	71
4.2.5 Mechanical Properties of Different Percentages of Mix (5) With Plasticized P.V.C	75
4.2.46 Mechanical Properties of Different Percentages of Mix (6) With Plasticized P.V.C	79
4.2.7 Hardness	83
4.3 Thermal Properties	84
4.3.1 TG Curves	84
4.3.2 DTG Curves	92
4.3.3 Effect of Adding Mixes on The Decomposition Temperatures of PVC	100
4.4 Dielectric Properties Measurements	101
4.4.1 The Variation of Dielectric Constant (ϵ') With Different Stabilizer Loading Weight %.	101
4.4.2 The Variation of Dielectric Loss (ϵ'') With Different Stabilizer Loading Weight %.	129
4.5 Comparison between the price of the commercial stabilizer and the price of the prepared mixes.	134

Chapter Five

Summary and Conclusion	135
References	138
