MONA MAGHRABY

كلية العلوم-قسم كيمياء

Feed Water treatment using natural and waste materials

Thesis

Submitted By

Moshira Mohamed Mahmoud Salem Ibrahim

Egyptian Petroleum Research Institute (EPRI)

(M.Sc. Chemistry 2013)

**Submitted for Partial Fulfillment of
Ph.D. Degree of Science in Chemistry**

Supervisors

Ass. Prof. Lilly Henain Khalil

Assistant Professor of inorganic chemistry Department,
Faculty of Science, Ain Shams University

Prof. Dr. Yasser Mohamed Moustafa

Professor of petroleum chemistry, The Director of Egyptian Petroleum Research
Institute - Analysis and Evaluation Department – EPRI

Dr. Waleed Ibrahim El-azab

Researcher petroleum, Egyptian Petroleum Research Institute-
Analysis and Evaluation Department – EPRI

(2020)

كلية العلوم - قسم كيمياء

Approval Sheet

Name of candidate: *Moshira Mohamed Mahmoud Salem Ibrahim*

Degree: Ph. D. Degree in Chemistry

Thesis Title:

"Feed Water treatment using natural and waste materials"

signature

This Thesis has been approved by

- **Ass. Prof. Lilly Henain Khalil**

Assistant Professor of inorganic chemistry, Department of Chemistry, Faculty of Science, Ain Shams University

- **Prof. Dr. Yasser Mohamed Moustafa**

Professor of petroleum chemistry, Analysis and Evaluation Department, the Director of Egyptian Petroleum Research Institute – EPRI

- **Dr. Waleed Ibrahim Azab**

Researcher petroleum, Egyptian Petroleum Research Institute, Analysis and Evaluation Department – EPRI

Approval

Head of chemistry Department.

(الحمد لله الذي هدانا لهذا وما

كننا لنهتدي لولا ان هدانا الله)

صدق الله العظيم
صدق الله العظيم

Acknowledgment

*I would like to express my sincere gratitude to my advisor **Ass. Prof. Lilly Henain Khalil, Prof. Dr. Yasser Mohamed Mustafa**, for suggesting the research topic, continuous support during carrying out the research work, for their motivation, patience and immense knowledge. I am greatly appreciating their supervision and critical discussion and orientation of my work, which helped me all the time during my research and thesis writing.*

*Furthermore, I would also like to thank **Dr. Waleed Ibrahim Azab, and Ass. Professor Hager R. Ali** for their help and encouragement*

*Finally, I'd like to extend my deep gratitude and appreciation to my own family (especially my lovely husband and my lovely son) and friends (**Dr.Heba El-sabaan, Dr.Hoda abdel-azeem and Eng. Mahmoud Badawy**) for their help, understanding and continuous encouragement. I would never have been doing this program without the financial support from the Academy of scientific research and technology (ASRT). Thank you for letting my dream comes true. Thank you very much to my institute, Egyptian Petroleum Research Institute for supporting me for doing this work.*

LIST OF CONTENTS

LIST OF CONTENTS	ii
LIST OF FIGURES	ix
LIST OF TABLES	xix
ABBREVIATIONS	xxi
AIM OF THE WORK.....	xxv
ABSTRACT	xxvii
RESEARCH PROBLEM.....	xxviii
ENVIRONMENTAL IMPACT	xxx
1 INTRODUCTION AND LITERATURE REVIEW	1
1.1 Water Resources	1
1.2 Water resources and use in Egypt.....	3
1.3 Water scarcity in Egypt.....	5
1.4 Water Resources and utilization in Egypt	6
1.5 Solving the Problem.....	8
1.6 Wastewater reuse	9
1.7 Wastewater reuses advantages and disadvantages	10

List of Contents

1.7.1 Advantages.....	10
1.7.2 Disadvantages	11
1.8 Desalination of brackish and sea water	12
1.9 Membrane Processes.....	14
1.9.1 Electrodialysis:.....	16
1.9.2 Microfiltration.....	16
1.9.3 Ultrafiltration	17
1.9.4 Nanofiltration.....	19
1.9.5 Reverse Osmosis.....	20
1.10 Membrane structure, operation and configuration ..	23
1.11 Factors affecting reverse osmosis process and performance.....	25
1.11.1 Pressure:	25
1.11.2 Temperature:	25
1.11.3 Solute concentration:	25
1.11.4 Membrane packing density:.....	25
1.11.5 Recovery factor:.....	26

1.11.6 Feed water stream velocity:	26
1.12 Reverse osmosis application	26
1.12.1 For food industry:	26
1.12.2 For industrial water treatment:.....	27
1.13 Advantages of reverse osmosis processes	27
1.14 Limitations of reverse osmosis processes.....	28
1.15 Membrane Fouling.....	28
1.16 Fouling classification.....	29
1.16.1 Particulate fouling.....	29
1.16.2 Inorganic fouling (Scaling or precipitation fouling).....	29
1.16.3 Organic fouling	31
1.16.4 Biological Fouling	31
1.17 Scale forming mechanisms	32
1.18 Factors affecting scale formation.....	33
1.19 Types of scale	33
1.20 Antifouling strategies.....	34

List of Contents

1.20.1 Pretreatment and RO methods	34
1.20.2 Pretreatment using physiochemical methods ...	36
1.21 Adsorption process	37
1.21.1 Physical Sorption	37
1.21.2 Chemical Sorption	38
1.21.3 Ion-exchange Adsorption.....	38
1.22 Factor Affecting Adsorption.....	39
1.22.1 Surface area and porosity.....	39
1.22.2 Surface charge.....	39
1.22.3 Adsorbent Activation.....	39
1.22.4 Temperature	40
1.23 Introduction to Kaolinite.....	41
1.23.1 Structure of Kaolinite.....	41
1.23.2 Surface chemistry of kaolinite	42
1.23.3 Activation of kaolinite	44
2 EXPERIMENTAL	50
2.1 Materials	51

2.2 Preparation of different modified materials.....	53
2.2.1 Thermal modification	53
2.2.2 Modification by acid.....	53
2.2.3 alkali Modification of kaolinite	55
2.2.4 Thermo-chemical modification	55
2.3 Modification by Nano-sized iron oxide.....	57
2.3.1 Preparation of Fe ₂ O ₃	57
2.3.2 Synthesis of kaolinite/Nano-sized iron oxide composite	58
2.4 Modification of kaolinite using silver Nano-metal....	58
2.4.1 Green synthesis of silver nanoparticles	58
2.4.2 Synthesis of Ag-kaolinite composite (KAg).	61
2.5 Characterization of prepared materials	61
2.5.1 Scanning electron microscopy (SEM).....	61
2.5.2 X-Ray diffraction analysis (XRD).....	61
2.5.3 X – Ray Fluorescence (XRF)	62
2.5.4 N ₂ Adsorption –desorption isotherm measurements.....	62

List of Contents

2.5.5 High Resolution Transmission electron microscope (HRTEM).....	63
2.5.6 Fourier Transform Infrared (FT-IR) Spectroscopy	64
2.5.7 Thermo gravimetric Analysis (TGA)	64
2.5.8 UV/vis Spectrophotometer	65
2.6 Experimental procedure	65
2.6.1 Effect of contact time.....	65
2.6.2 Effect of adsorbent weight (dose).....	66
2.6.3 Effect of Temperature	66
2.6.4 Effect of pH.....	66
2.7 Kinetic studies.....	67
3 RESULTS AND DISCUSSION	69
3.1 Infrared (IR) spectroscopy	70
3.2 XRF characterization	78
3.3 Scanning electron microscopy (SEM)	81
3.4 N ₂ adsorption-desorption isotherm measurements (BET surface analysis)	86

3.5 Thermal properties (TGA)	90
3.6 Electro-kinetic properties (Zeta potential analysis). 106	
3.7 High Resolution Transmission electron microscope (HRTEM)	109
3.8 XRD characterization	115
3.9 UV–VIS spectroscopy	121
3.10 Cation Properties.....	122
3.11 Adsorption studies:	125
3.11.1 Effect of Contact Time:	128
3.11.2 Effect dose (Adsorbent weight):	138
3.11.3 Effect pH:.....	144
3.11.4 Effect of Temperature	157
3.12 Kinetic model analysis:.....	164
4 CONCLUSION AND FUTURE WORK	172
5 SUMMARY	179
6 References	181
7 الملخص العربي	206
