Bioactive Secondary Metabolites from *Halocnemum strobilaceum* (Pall.) M.Bieb. Belonging to Family Chenopodiaceae

A Thesis

Submitted in Partial Fulfillment of Requirements for the

Master Degree

In Pharmaceutical Sciences

(Pharmacognosy)

By

Mohamed Mahmoud Mahmoud AbdelRazek

Bachelor of Pharmaceutical Sciences,

Faculty of Pharmacy, Future University in Egypt, 2013

Under the Supervision of

Prof. Abdel Nasser B. Singab

Professor of Pharmacognosy

Vice President for Postgraduate

Studies & Research

Ain Shams University

Prof. Mohamed A. El-Shanawany

Professor of Pharmacognosy

Dean of Faculty of Pharmacy

Badr University in Cairo

Dr. Ashaimaa Yehia Moussa

Lecturer of Pharmacognosy

Faculty of Pharmacy

Ain Shams University

2020

Acknowledgment

Acknowledgment

First, I am grateful to the Almighty Allah for establishing me to complete this work.

I wish to express my deepest gratitude to **Prof. Dr. Abdel-Nasser Badawy Singab**; Professor of Pharmacognosy, Vice president of Ain Shams University for Research and Postgraduate Affairs and chairman of center of drug discovery and development, for his supervision, guidance, enthusiastic encouragement and useful critics of this research work. It is a great honor working under his supervision.

My deepest gratitude goes to **Prof. Dr. Mohamed Ahmed El-Shanawany**; Professor of Pharmacognosy, Dean of Faculty of Pharmacy at Badr University in Cairo, for his time, supervision, guidance, enthusiastic encouragement and useful critics of this research work. It is a great honor working under his supervision.

I would like to express my special appreciation and thanks to **Dr. Ashaimaa Yehia Moussa**, Lecturer at Department of Pharmacognosy, Ain Shams University for her invaluable efforts, tireless guidance and for her patience and support to get this work into light.

I would like to give special thanks to **Prof. Dr. Safaa Ahmed El-Moghazy**; Professor of Pharmacognosy, Head of Department of Pharmacognosy and Vice dean of Faculty of Pharmacy at Badr University in Cairo, for her support and motivation.

My sincere thanks also go to center of drug discovery and development specially **Dr. Ahmed Essam**; Lecturer of Pharmacognosy at Ain Shams University for offering me all facilities, support, courage and follow up to give this work the best.

My thanks extended also to my colleagues in Department of Pharmacognosy at Faculty of Pharmacy, Badr University in Cairo and Ain Shams University who helped and supported me through this work.

Last but not least, I dedicate this work to my family whom without their sincere support, pushing me forward this work would not have ever been completed. My heartfelt thanks.

Mohamed AbdelRazek
