“Possible Cardioprotective Effect of Olive Oil in Experimentally Induced Hyperthyroidism in Rats”

A thesis

Submitted for partial fulfillment of Master Degree in
Physiology

By

Eman Mohammed Ali Mousa

M.B., B.Ch. Physiology

Supervisors

Prof. Dr. Nermine Kamal Mohamed Saleh Daoud

Professor of Physiology

Head of Physiology Department

Faculty of Medicine, Ain Shams University

Dr. Abd El- Hamid A Mohamed

Assistant professor of Physiology

Faculty of Medicine, Ain shams University

Dr. Manal Said Abd el Hamid

Assistant professor of Physiology

Faculty of Medicine, Ain shams University

Dr. Doaa Ahmed Abou-bakr Darwish

Lecturer of Physiology

Faculty of Medicine, Ain shams University

Physiology Department

Faculty of Medicine- Ain Shams University

2020

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالَ

سَبَّحَانَكَ لَا عِلْمَ لَنَا
إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ
الْعَلِيمُ الْعَظِيمُ

صدق الله العظيم

سورة البقرة الآية: ٣٢

Acknowledgments

*First and foremost, I feel always indebted to **Allah** the Most Beneficent and Merciful.*

*I wish to express my deepest thanks, gratitude and appreciation to **Prof. Dr. Mervine Kamal Mohamed Saleh Daoud**, Professor of Physiology, Head of Physiology Department, Faculty of Medicine, Ain Shams University, for her meticulous supervision, kind guidance, valuable instructions and generous help.*

*Special thanks are due to **Dr. Abd El- Hamid A Mohamed**, Assistant Professor of Physiology, Faculty of Medicine, Ain shams University, for his sincere efforts, fruitful encouragement.*

*I am deeply thankful to **Dr. Manal Said Abd el Hamid**, Assistant professor of Physiology, Faculty of Medicine, Ain shams University, for her great help, outstanding support, active participation and guidance.*

*Really I can hardly find the words to express my gratitude to **Dr. Doaa Ahmed Abou-bakr Darwish**, Lecturer of Physiology, Faculty of Medicine, Ain shams University, for her supervision, continuous help, encouragement throughout this work.*

*Thanks to **Dr. Hanan A. Saleh**, Professor of Histology, Faculty of Medicine, Ain Shams University and **Dr. Nermeen Tayseer**, Professor of Clinical Pathology, Faculty of Medicine, Ain Shams University.*

I would like to express my hearty thanks to all my family for their support till this work was completed, special thanks Eng. Mahmoud Saad.

Eman Mohammed Ali Mousa

List of Contents

Title	Page No.
List of Tables.....	i
List of Figures	xi
List of Abbreviations.....	xvi
Introduction	1
Aim of the Work	3
Review of Literature	4
Materials and Methods.....	26
Results.....	49
Discussion	116
Summary and Conclusion	139
References	146
Appendix	180
Arabic Summary	

List of Tables

Table No.	Title	Page No.
Table (1):	Mean \pm SEM of initial body weight (IBW), initial body length (IBL), initial body mass index (IBM), final body weight (FBW), final body length (FBL), final body mass index (FBMI), body weight percent change (BW%) and body mass index percent change (BMI%) in all studied groups	50
Table (2):	Mean \pm SEM values of absolute and relative weights of right ventricle (RV, RV/BW), left ventricle (LV, LV/BW) and whole heart (WH, WH/BW) in all studied groups.....	53
Table (3):	Mean \pm SEM of electrocardiographic parameters in all studied groups.....	55
Table (4):	Mean \pm SEM of baseline values, maximal responses to isoproterenol infusion, delta changes and recovery values of spontaneous beating rate (bpm) of perfused hearts isolated from all studied groups.....	57
Table (5):	Mean \pm SEM of peak developed tension (PT; g), Baseline values, maximal responses to isoproterenol infusion, delta changes and recovery values of perfused hearts isolated from all studied groups.....	59
Table (6):	Mean \pm SEM of baseline values, maximal responses to isoproterenol infusion, delta changes and recovery values of peak developed tension/left ventricular weight (PT/LVW; g/100mg) of perfused hearts isolated from all studied groups.....	61
Table (7):	Mean \pm SEM of baseline values, maximal responses to isoproterenol infusion, delta changes and recovery values of time to peak tension (TPT; msec) of perfused hearts isolated from all studied groups.....	64
Table (8):	Mean \pm SEM of baseline values, maximal responses to isoproterenol infusion, delta changes and recovery values of tension generation per unit time (g/msec) of perfused hearts isolated from all studied groups.....	67

List of Tables cont...

Table No.	Title	Page No.
Table (9):	Mean±SEM of baseline values, maximal responses to isoproterenol infusion, delta changes and recovery values of half relaxation time (HRT; msec) of perfused hearts isolated from all studied groups.	69
Table (10):	Mean±SEM of baseline values, maximal responses to isoproterenol infusion, delta changes and recovery values of coronary flow rate (CFR; ml/min), of perfused hearts isolated from all studied groups.....	71
Table (11):	Mean±SEM of baseline values, maximal responses to isoproterenol infusion, delta changes and recovery values of coronary flow rate/ left ventricular weight (CFR/LVW; ml/min/100mg), of perfused hearts isolated from all studied groups.....	73
Table (12):	Mean values ± SEM of heart beating rate (bpm), at baseline values, recovery values, and reperfusion absolute and percent change values of perfused hearts isolated from all studied groups.....	77
Table (13):	Mean values ± SEM of peak developed tension (g), baseline values, recovery values, and reperfusion absolute and percent change values of perfused hearts isolated from all studied groups.....	80
Table (14):	Mean values ± SEM of peak developed tension per left ventricular weight (g/100mg), at baseline values, recovery values, and reperfusion absolute and percent change values of perfused hearts isolated from all studied groups.	81
Table (15):	Mean values ± SEM of time to peak tension (msec), at baseline values, recovery values, and reperfusion absolute and percent change values of perfused hearts isolated from all studied groups.....	86
Table (16):	Mean values ± SEM of tension generation per unit time (g/msec), at baseline values, recovery values, and reperfusion absolute and percent change values of perfused hearts isolated from all studied groups.....	89

List of Tables cont...

Table No.	Title	Page No.
Table (17):	Mean values \pm SEM of half relaxation time (msec), at baseline values, recovery values, and reperfusion absolute and percent change values of perfused hearts isolated from all studied groups.....	93
Table (18):	Mean values \pm SEM of coronary flow rate (ml/min), at baseline values, recovery values, and reperfusion absolute and percent change values of perfused hearts isolated from all studied groups.....	97
Table (19):	Mean values \pm SEM of coronary flow rate per left ventricular weight (ml/min/100mg), at baseline values, recovery values, reperfusion absolute and percent change values of perfused hearts isolated from all studied groups.....	98
Table (20):	Mean \pm SEM of serum tri-iodothyronin (T3), tetra-iodothyronin (T4), thyroid Stimulating hormone (TSH) and cardiac Hemoxygenase enzyme-I (HO-I) of all studied groups.....	101
Table (21):	Initial body weight (IBW), initial body length (IBL), initial body mass index (IBM), final body weight (FBW), final body length (FBL), final body mass index (FBMI), body weight percent change (BW%) and body mass index percent change (BMI%) in control group	180
Table (22):	Initial body weight (IBW), initial body length (IBL), initial body mass index (IBM), final body weight (FBW), final body length (FBL), final body mass index (FBMI), body weight percent change (BW%) and body mass index percent change (BMI%) in hyperthyroid group.	181
Table (23):	Initial body weight (IBW), initial body length (IBL), initial body mass index (IBM), final body weight (FBW), final body length (FBL), final body mass index (FBMI), body weight percent change (BW%) and body mass index percent change (BMI%) in olive oil-treated hyperthyroid group.....	182

List of Tables cont...

Table No.	Title	Page No.
Table (24):	Absolute and relative weights of right ventricle (RV, RV/BW), left ventricle (LV, LV/BW) and whole heart (WH, WH/BW) in control group.....	183
Table (25):	Absolute and relative weights of right ventricle (RV, RV/BW), left ventricle (LV, LV/BW) and whole heart (WH, WH/BW) in hyperthyroid group.....	184
Table (26):	Absolute and relative weights of right ventricle (RV, RV/BW), left ventricle (LV, LV/BW) and whole heart (WH, WH/BW) in olive oil-treated hyperthyroid group	185
Table (27):	Electrocardiographic parameters in control group	186
Table (28):	Electrocardiographic parameters in hyperthyroid group	187
Table (29):	Electrocardiographic parameters in olive oil-treated hyperthyroid group	188
Table (30):	Effect of graded Isoproterenol (ISO) infusion on spontaneous beating rate (bpm) of perfused hearts isolated from control group.....	189
Table (31):	Effect of graded Isoproterenol (ISO) infusion on spontaneous beating rate (bpm) of perfused hearts isolated from hyperthyroid group.....	190
Table (32):	Effect of graded Isoproterenol (ISO) infusion on spontaneous beating rate (bpm) of perfused hearts isolated from olive oil-treated hyperthyroid group.	191
Table (33):	Effect of graded Isoproterenol (ISO) infusion on peak developed tension (PT; g) of perfused hearts isolated from control group.....	192
Table (34):	Effect of graded Isoproterenol (ISO) infusion on peak developed tension (PT; g) of perfused hearts isolated from hyperthyroid rats.....	193
Table (35):	Effect of graded Isoproterenol (ISO) infusion on peak developed tension (PT; g) of perfused hearts isolated from olive oil-treated hyperthyroid group.	194
