MONA MAGHRABY

Faculty of Education
Chemistry Department

Synthesis, spectroscopic characterization, conductivity and biological studies of some transition metals ions complexes and their nanocoordinated complexes of some novel Schiff base ligands derived from sulphachloropyrazine with some aldehydes.

Thesis Submitted

By

Doaa Fathi Mohamed Sallam

B.Sc., Ed. 2008, M.Sc. 2015

To

Department of Chemistry, Faculty of Education, Ain Shams
University

For

The Ph. D. degree in science's teacher preparation
(Inorganic Chemistry)

Supervisors

Prof. Dr. Samy Mohamed Abu-El-Wafa

(Professor of Inorganic Chemistry Faculty of Education, Ain Shams
University).

Dr. Abd El-Razak Mohamed Tawfik

(Ass. Professor of Inorganic Chemistry, Faculty of Education, Ain
Shams University)

Dr. Tarek Mohamed Ismail

(Ass. Professor of Inorganic Chemistry, Faculty of Education, Ain
Shams University)

Cairo

2020

Faculty of Education
Chemistry Department

Title sheet

Synthesis, Spectroscopic characterization, conductivity and microbiological studies of some transition metals ions complexes and their nanocoordinated complexes of some novel Schiff base ligands derived from sulphachloropyrazine with some aldehydes

Candidate: Doaa Fathi Mohamed Sallam

Date of Birth: 17/3/1987

First University Degree: B.Sc. & Ed., May 2008

Degree: The Ph. D. degree in science's teacher preparation
(Inorganic Chemistry)

Department: Chemistry

Faculty: Education

Name of University: Ain Shams

Faculty of Education
Chemistry Department

Approval Sheet

Synthesis, Spectroscopic characterization, conductivity and biological studies of some transition metals ions complexes and their nanocoordinated complexes of some novel Schiff base ligands derived from sulphchalaropyrazine with some aldehydes.

Supervisors

Prof. Dr. Samy Mohamed Abo El-Wafa

Professor of Inorganic Chemistry Faculty of Education,
Ain Shams University.

Acknowledgement

First of all, thanks to **GOD**, for helping me to accomplish this thesis.

I would like to express my sincere gratitude and indebtedness to my supervisors: **Prof. Dr. Samy Mohamed Abu-El-Wafa** (Professor of Inorganic Chemistry, Faculty of Education, Ain Shams University), for suggesting the point of research and for his valuable helps, suggestions, guidance and support and offering me the opportunity to carry out this interesting research work under their kind supervision, Also, I am truly thanks to **Dr. Abd El-Razak M. Tawfik** (Assistant Prof. of Inorganic Chemistry, Faculty of Education, Ain Shams University), **Dr. Tarek Mohamed Ismail** (Assistant Prof. of Inorganic Chemistry, Faculty of Education, Ain Shams University) for their valuable helps, suggestions, guidance and support and offering me the opportunity to carry out this interesting research work under their kind supervision.

I am truly thanks to **Prof. Dr. Mohammed Abass** head of the Department of Chemistry for his great kind facilities, help and encouragement.

Grateful appreciation is extended to all members of Chemistry Department, Faculty of Education, Ain Shams University for their help and continuous encouragement.

I am truly thanks to **Prof. Dr. Magid Mahmoud Abu-El- Enin** (Dean of Faculty of Education) for his help during the investigation of thesis and financial support and to **Miss Wafaa Refai Mohamed** (General Manager of Faculty of Education) for her help of the investigation of thesis.

Finally, I remember with great gratitude my **(Father, Mother, Husband and Children)**, they were always a source of strength, support and inspiration.

Doaa Fathi Mohamed Sallam

List of figures.....	i
List of tables.....	viii
List of schemes.....	xii
Abstract.....	xiii
Aim of the work.....	xiv

Chapter I**Introduction**

1.1. Coordination chemistry of Schiff bases derived from sulfa drugs.....	1
1.1.1. Sulpha drugs.....	1
1.1.2. Schiff base compounds.....	2
1.1.3. Schiff bases derived from sulfa drugs.....	3
1.2. Introduction of nanochemistry.....	43
1.2.1 Historic context to nanoparticles.....	43
1.2.2. Nanoparticles, nanomaterials and nanotechnology.....	44
1.2.3. Coordination chemistry of nanoparticles.....	50

Chapter II**Experimental**

2.1. Materials.....	72
2.2. Preparation of the organic ligands.....	72
2.3. Preparation of the solid complexes	74

2.3.1. Preparation of solid metal(II) Schiff bases.....	74
2.3.2. Preparation of mixed ligand complexes.....	74
2.4.1. Preparation of nanocomplexes	75
2.5. Preparation of solutions of the organic ligands and their complexes for electronic spectra and molar conductance	75
2.6. Quantitative analysis of metal cations	75
2.7. Physical measurements.....	76
2.7.1. Melting points.....	76
2.7.2. Elemental analyses.....	76
2.7.3. Molar conductance measurements.....	76
2.7.4. FT-IR spectra.....	76
2.7. 5. ¹ H-NMR spectra.....	76
2.7.6. Electronic spectra.....	77
2.7. 7. Magnetic measurements.....	77
2.7.8. ESR spectra.....	77
2.7. 9. Mass spectra.....	78
2.7.10. Thermogravimetric analysis (TGA).....	78
2.7. 11. Transmission electron microscope image (TEM).....	78
2.7.12. X-Ray diffraction.....	78
2.8. Electrical conductivity studies.....	78
2.9. DNA cleavage.....	79
2.10. Antitumor Activities.....	80
2.11. Antimicrobial activities.....	81
2.11.1. Test of organisms	82
2.11.2. Testing for anti-bacterial and yeast activity.....	82
2.11. 3. Testing for antifungal activity.....	82
2.12. Molecular Docking study.....	83
