Maternal Practices for Continuation of Breastfeeding for their High Risk Neonates during Hospitalization

Thesis

*Submitted for Partial Fulfillment for Requirement of
Master Degree in Pediatric Nursing*

By

Samar Mohammed Safwat

B.Sc. in Nursing, 2012

Faculty of Nursing/ Tanta University

Clinical Instructor in Tanta Educational Hospital

**Faculty of Nursing
Ain Shams University
2019**

Maternal Practices for Continuation of Breastfeeding for their High Risk Neonates during Hospitalization

Thesis

*Submitted for Partial Fulfillment for Requirement of
Master Degree in Pediatric Nursing*

Supervised by

Prof. Dr. / Wafaa El-Sayed Ouda

Professor of Pediatric Nursing
Faculty of Nursing/ Ain Shams University

Assist. Prof. Dr. / Safaa Fouad Draz

Assist. Prof. of Pediatric Nursing
Faculty of Nursing/ Ain Shams University

**Faculty of Nursing
Ain Shams University
2019**

Acknowledgement

Thanks to *Allah* the most *Merciful*, most *Knowledgeable* for all his blessings throughout my life.

Great gratitude goes to *Prof. Dr. / Wafaa Elsayed Ouda*, Professor of Pediatric Nursing, Faculty of Nursing, Ain Shams University for her vast support during performing this work.

Great gratitude also goes to *Assist. Prof. Dr. Safaa Draz*, Assist. Prof. of Pediatric Nursing, Faculty of Nursing, Ain Shams University for her vast support, kind guidance, meticulous revision and encouragement in performing this work.

Special thanks are also extended to all study subjects for their participation and cooperation through the study.

Samar Mohammed Safwat

List of Tables	I
List of Figures	V
List of Abbreviations	VIII
Abstract	IX
Introduction and Aim of the study	1
Review of literature	
• Part I: An overview about breastfeeding	7
• Part (II): Factors affecting the continuation of breastfeeding	21
• Part (III): Nurse role in supporting continuation of breastfeeding breastfeeding in NICU	31
Subjects and methods	49
Results	56
Discussion	86
Conclusion and recommendations	106
Summary	108
References	118
Appendices	135
Arabic summary	-

List of Tables of Review

Table	Title	Page No.
Tables related to review of literature		
1	Differentiation between engorgement, plugged nipple and mastitis	27
2	Human milk storage in the hospital setting	37

Table	Title	Page No.
	Tables related to results	
1	Distribution of the mothers according to their characteristics data	57
2	Distribution of the mothers according to their past medical history	59
3	Distribution of the mothers according to presence of complications during pregnancy and its type	60
4	Distribution of the mother according to their family condition	61
5	Distribution of the newborn according to their characteristics namely; gender, ranking in family and birth weight.	62
6	Distribution of the newborn according to their characteristics namely; gestational age, chronological age and reason for hospitalization	63
7	Distribution of the mothers' knowledge about exclusive breastfeeding and breastfeeding benefits	64
8	Distribution of mother's knowledge about breastfeeding technique	65

Table	Title	Page No.
9	Distribution of the mothers' knowledge about burping and position after breastfeeding	66
10	Distribution of the the mothers' knowledge about factors that maintain breast milk flow	67
11	Distribution of the studied mothers according to their total level of knowledge regarding breastfeeding and its continuation:	68
12	Distribution of the mothers' reported practices regarding breastfeeding continuation	69
13	Distribution of the mothers' reported practices related to breast care before breast milk expression	70
14	Distribution of the mothers' reported practices regarding breast milk expression.	71
15	Distribution of the mothers' reported practices about handling the expressed milk.	72
16	Distribution of the mothers according to their total level of reported practice regarding breastfeeding continuation	73
17	Distribution of factors related to mothers' type of labor, type of nipple and its care reported practice	74

Table	Title	Page No.
18	Distribution of factors related to mothers' breast problems and breast care reported practice.	75
19	Distribution of factors related to mothers namely diet and sleeping hours.	76
20	Distribution of factors related to newborn-infant	77
21	Distribution of factors related to surrounding environment	78
22	Relationship between total level of knowledge among mothers and their characteristics	79
23	Relationship between total level of knowledge among mothers and their newborn's characteristics	81
24	Relationship between total level of reported practice among mothers and their characteristics	82
25	Relationship between total levels of reported practice among mothers regarding their newborn's characteristics	84
26	Correlation between total knowledge and total reported practices among the mothers	85

List of Figures

Table	Title	Page No.
	Figures related to Review	
1	Morphology of the mature breast	9
2	A positive feedback loop ensures continued milk production as long as the infant continues to breastfeed.	12
3	Types of breast milk	14
4	The Cradle Hold	17
5	Cross-Cradle Hold	18
6	The Clutch hold	19
7	The Side lying hold	20
8	Cracked nipple and normal nipple	25
9	Mastitis of right breast, upper outer quadrant.	27
10	Set comfortably	32
11	Apply warm moist cloth for 2 mins.	32
12	Massage the breast gently from (under axillary toward the nipple) using a circular pressure	32
13	Place the thumb and forefinger at opposite points "C shape".	33

Table	Title	Page No.
14	Press the breast with thumb and index fingers slightly inwards, towards the chest wall.	33
15	Release and repeat rhythmically by rotating the hand around the breast until milk flow stops and comfortable	34
16	Electric breast pumping	35
17	Flow chart of the human milk banking process	38
18	Good latch	45
19	Inadequate latch	45
20	The three most common positions for burping the newborn	46

Table	Title	Page No.
	Figures related to Results	
1	Percentage distribution of mothers' age	59
2	Mothers' total level of knowledge	69
3	Mothers' total level of reported practice	74
