B 14940

On the theory of short-wavelength lasers for recombining plasmas

A Thesis

Submitted for the Degree of M. Sc in Physics

By

Mohammed Ahmed fathella Shihab
B. Sc. Tanta University

This master thesis has been carried under the supervision of

Prof. Dr. Nabil M. El-Siragy
Professor of Theoretical
Plasma Physics,
Physics Department,
Faculty of Science,
Tanta University,
Tanta, Egypt.

Dr. Gamal H. Abou-Koura
Lecturer of Theoretical
Plasma Physics,
Physics Department,
Faculty of Science,
Tanta University,
Tanta, Egypt.

-2007-

CURRICULUM VITAE

Name : Mohammed Ahmed Shihab

Date of Birth : 11-9-1979.

Locality : Karansho Village-Basion - Garbia Govern.

Nationality : Egyptian.

Qualification: 1- B.Sc. of Education, Faculty of Education, Tanta University (2000)

2- B.Sc. of Physics, Faculty of Science, Tanta University (2002).
3- Administrator in Faculty of Science, Tanta University (2002).

Head of Physics Department

T. El

(Prof. Dr . Tarek . El- Nimr)

POSTSRADUATE STUDIES

Beside the research work materialized in this thesis, the candidate has attended post graduate courses.

1- Special course (laser-produced plasma).
2- Quantum mechanics.
3- Laser physics.
4- Plasma physics.
5- Vacuum technique.
6- Ferroelectric materials.
7- Magnetic properties of matter.
8- Nuclear physics.
9- Electronics.
10- Glassy state of matter.
11- Atomic spectroscopy.
12- Renewable energy resources.
13- German language.

He also passed successfully the formal examinations in these topics in Sept.2003.

Head of Physics Department

(Prof. Dr . Tarek . El- Nemr)

Acknowledgment

In the name of Allah, The most gracious, the most merciful, I sincerely thank Allah for giving me the ability to understand this work. In addition, I am indeed grateful to many other people who have assisted me over the years of this task.

I would like to thank ***Prof. Dr. Tarek M. El-Nemr****, Head of physics department, faculty of science, Tanta University for his help and his continuous encouragement.*

My sincere thanks go also to my very good supervisor ***Prof. Dr. Nabil M. El-Siragy****, I would like to express my deepest appreciation to him for his supervision and expert guidance through the work.*

I would like to express my great appreciation and special gratitude to my supervisor ***Dr. Gamal H. Abou-Koura****, who suggested the area of this research, and gave me a great deal of their time, knowledge, and experience. He has been dedicated, most helpful, and most understanding throughout the course of this work. I am also grateful to all the staff in the* ***Physics department, Faculty of science, Tanta University****, for their help and good relationship.*

My deepest sincere thanks go to my family especially Father, Mother , Sister Eng. Boushra A. Shihab and finally I would like to express my great appreciation and special gratitude to my wife Mrs. Fayza M. Hamad and my children Abd-Elrahman and Ahmed for their support and gave me a great help to do this work.

Mohammed A. Shihab

Contents

C.V.	II
Postgraduate studies	III
Acknowledgment	IV
Contents	V
Abstract	VII
Preface	VIII

Chapter 1
Introduction

1.1 Introduction	1
1.2 Breakdown and plasma formation	2
1.3 The absorption of laser light	3
1.3.1 Plasma Oscillation and Critical Density	3
1.3.2 Laser Plasma Coupling, Inverse Bremsstrahlung	4
1.4 Plasma Properties and Laser Parameters	7
1.4.1 The effect of laser fluence	7
1.4.2 The effect of laser pulse duration	12
1.4.3 The effect of laser wavelength	14
1.5 Plasma Parameters after the laser pulse	16
1.5.1 Electron density	17
1.5.2 Electron temperature and plasma expansion	29

Chapter 2
Atomic Processes in Plasma

2.1 Introduction	35
2.2 Ionization Processes	38
2.2.1 Photoionization Process	38
2.2.2 auto-ionization Process	39
2.2.3 Collisional ionization Process	41
2.3 Electron Ion Recombination	44
2.3.1 Radiative Recombination	45
2.3.2 Dielectronic Recombination	48
2.3.3 Three body Recombination	51
2.4 The plasma model	55
2.4.1 Local thermodynamic equilibrium	56
2.4.2 Coronal Equilibrium	57

2.4.3 The Collisional Radiative Model 58

Chapter 3

The theoretical model

3.1 Introduction 59
3.2 The analytical Model 62
3.3 The Numerical work 66

Chapter 4

Results and Discussion

4.1 Introduction 69
4.2 Computations for Nickel Plasma 70
4.3 Software Checks 82
4.4 Comparison between our results and experimental work 85
