Engineer's Name:	Radwa Mohamed Shoukr Nada
Date of Birth:	15/6/1991
Nationality:	Egyptian
E-mail:	nada_radwa@hotmail.com
Phone:	01119463888
Address:	El Sheikh Zayed, 6th of October City, Giza, Egypt.
Registration Date:	September, 2013
Awarding Date:	/ /2020
Degree:	Interdisciplinary – Master of Science
Department:	Risk Engineering
Supervisors:	Prof. Dr. Emad El Sherbiny Prof. Dr. Fouad Khalaf
Examiners:	Prof. Dr. Emad El Sherbiny (Thesis Main Advisor) Prof. Dr. Fouad Khalaf (Advisor) Prof. Dr. Asmaa Abdel Aty (Internal examiner) Prof. Dr. Ahmed Hosny Radwan (External examiner) (Professor of Fine Arts, Department of Architecture, Helwan University)
Title of Thesis:	**Risk Management of Urbanization on Ancient Archaeological Sites** **Case Study: Giza Pyramids Plateau**
Keywords:	Risk Assessment; Risk Management; Urbanization; Archaeological Sites; Cultural Heritage Sites.

Summary:

The thesis revolves around three main points; urbanization, cultural heritage and risk management. Those three points are focusing on a case study which is the Giza Pyramids plateau; this site was chosen in particular based on its cultural, historical and architectural significance. There are many important aspects and perspectives discussed regarding the heritage site along with its surroundings. One of the main key points of the thesis is how the site is affected and is affecting the inhabitants around it, while examining the effects of each stakeholder on the others.

Disclaimer

I hereby declare that this thesis is my own original work and that no part of it has been submitted for a degree qualification at any other university or institute.

I further declare that I have appropriately acknowledged all sources used and have cited them in the references section.

Acknowledgements

I would like to thank my supervisors for being supportive and patient as they were every step of the way towards finishing this thesis. My gratitude to them is beyond words and I hope I made them proud with my work that was accomplished through their many helpful notes and guidance. I would also like to thank all of my family members and close friends for always pushing me forward and raising me up when I felt I would not finish it; without them I might have not made it to where I am today. Emotional support and pure faith helped me reach this phase and finish this challenging degree. Of course, the examiners were also a huge part of this successful thesis with their constructive comments and supportive praises. Hopefully, this thesis could be useful someday and would be a step forward towards a more advanced achievement.
