## Acknowledgments

First and foremost, I feel always indebted to *Allah* the most kind and the most merciful for all countless gifts I have been offered. One of these gifts is accomplishing this research work.

It is a great honor to express my sincere appreciation to *Dr. Ghada Mohamed Mourad*, Professor of Psychiatric and Mental Health Nursing, Faculty of Nursing, Ain Shams University for her kind supervision, continuous encouragement and persistent support, valuable advice helped me to complete this work.

Words can never express my deep thanks to *Dr. Amira Morsi, Lecturer* of Psychiatric and Mental Health Nursing, Faculty of Nursing, Ain Shams University, who give much of her time for the fulfillment of this work, and offered her kind and sincere guidance, encouragement, and helpful suggestions for accomplishment of this study.

With considerable appreciation and thanks to *Dr/ Rania Abdulhamid* Assistant Professor Psychiatric and Mental Health Nursing -Faculty of Nursing- Ain Shams University and *Dr/ Hanaa Hamdy Elzeny* Assistant Professor Psychiatric and Mental Health Nursing-Faculty of Nursing-Zagazig University.

*Yosra Elsaeed Mohamed Shahien*

I dedicate this work to my father, who has always encouraged and advised me and I wish he was by my side, God have mercy on his beautiful soul. I never deny that my mother stood by my side and her persistent support and prayers for me. Also, I dedicate this work to my dear husband (Mohamed Ali) and my dear daughter (Alia) and thank God for your presence in my life.

Finally I would like to thank my sisters and friends who loved me and wished me all the best.
