The Adsorption of Some Porphyrins on Clay Minerals

**Thesis Submitted
By
*Nermin Mahmoud Kamel***

***In partial Fulfillment on the Requirements
for the Degree on Master
In Materials Science***

***Department of Materials Science
Institute of Graduate Studies & Research
University of Alexandria***

2006

SUPERVISORS

Prof. Faiz Farag Assad

*Professor of Soil and Colloid Chemistry
Department of Soil and Water Use
National Research Center
Cairo – Egypt*

Dr. Tawfik Aly Ramadan

*Ass. Professor of Materials Science
Materials Science Department,
Institute of Graduate Studies and Research,
Alexandria University, Alex. Egypt.*

Dr. Olfat Mostafa Sadek

*Ass. Professor of Chemical engineering
Materials Science Department,
Institute of Graduate Studies and Research,
Alexandria University, Alex. Egypt.*

**THE ADSORPTION OF SOME PORPHYRINS
ON CLAY MINERALS**

**Presented By
Nermin Mahmoud Kamel**

**For the Degree of Master
In
Materials Science**

Examiners' Committee:

**Prof. Violet Mohamed Sabet
Professor of Chemistry
Faculty of Science
Alexandria University.**

**Prof. Hanaa Youssef Ghorab
Professor of Cement Chemistry
Department of Materials Science,
Faculty of Science,
Helwan University.**

**Prof. Faiz Farag Asaad
|Prof of Collodial Chemistry
National Research Center, Cairo**

**Dr. Tawfik Aly Ramadan,
Ass. Prof. Materials Science,
Department of Materials Science,
Institute of Graduate Studies and Research,
Alexandria University.**

Approved

V. Sabet.

Date 18/5/2006

ACKNOWLEDGEMENT

First, I would like to express my deep gratitude to my God whose magnificent help is the first factor in every thing i do in life.

It is difficult to acknowledge by name all those who assisted me in this work. But, I would like to express my deepest thanks to:

Professor. Faiz Farag Assad

Professor of Soil and Colloid Chemistry, Department of Soil and Water Use, National Research Center, Cairo – Egypt

For offering me the time, support and the valuable advice through all the stages of the research. I highly appreciate his efforts in planning, Valuable advice and critical revision of this manuscript.

Also, I want to express my thanks to:

Dr. Tawfik Aly Ramadan

Associate Professor, Materials Science Department Institute of Graduate Studies and Research, Alexandria, Egypt.

For his valuable guidance, continuous encouragement and his support specially throughout the editing and finalizing stages of this research.

My sincere thanks and appreciation to:

Dr. Olfat Mahmoud Sadek

Associate Professor, Materials Science Department, Institute of Graduate Studies and Research, Alexandria, Egypt.

For her active supervision, contentions guidance and generous advice. A great deal of thanks should go to all members of the Materials Science Department, Alexandria University.

Finally, I am deeply indebted to my husband for his continuous encouragement and generous advices.

CONTENTS

LIST OF FIGURES	IV
LIST OF TABLES	VII
SUMMARY	VIII
CHAPTER I: INTRODUCTION	
I.1 Colloidal System	1
I.1.1 Classification of Colloidal Systems.....	1
I.1.2 Physical Properties of Hydrophobic Sols	2
I.1.2.1. Setting	2
I.1.2.2. Aging	2
I.1.2.3. Flocculation "particle agglomeration"	2
I.1.3 Electrochemistry of Hydrophobic sols.....	3
I.1.4 Electrochemical Properties of Clay-Water Systems.....	3
I.1.4.1 The Double Layer on the Flat Unit Layer Surfaces	3
I.1.5 Clay System	4
I.1.6 Classification of clay Minerals	10
I.1.6.1 Slightly Expanded Clay Minerals (Vermiculite).....	11
I.1.6.2 Expanded Clay Minerals (Smectite or Montmorillonite)	11
I.1.7 Montmorillonite Clay Minerals.....	12
I.1.7.1. The Swilling of Montmorillonite.....	14
I.1.7.2. The Electrical Properties of Montmorillonite.	17
I.1.8 Kaolinite Clay Minerals.....	17
I.1.8.1 Electrical Properties of Kaolinite.....	17
I.1.9 The Interaction Between Clay Platelets.....	19
I.1.9.1. Electrical Double Layer.....	19
I.1.9.2. Interparticle Double Layer Repulsion.....	21
I.1.9.3. Van Der Waals Attractive Forces.....	21
I.1.9.4. The double layer on the edge surfaces of clay plates.....	22

I.1.9.5. Surface charge and potential.....	23
I.1.10 Influence of electrolytes and pH of medium on clay particles	24
I.1.11 Electrokinetic phenomena in Na Montmorillonite Suspensions	24
I.2 The Porphyrin System.....	25
I.2.1 Structures and Properties.....	25
I.2.1.1 Aromatic Nature of Porphyrins.....	25
I.2.1.2 Hydrogen Bonding.....	27
I.2.1.3 Substituted Porphyrins.	28
I.2.2 Nomenclature.....	28
I.2.3 Occurrence.....	28
I.2.4 Stability.....	31
I.2.5 Surface Activity.....	31
I.2.6 Ionization of Porphyrins.....	31
I.2.6.1 The Nitrogen Atom.....	31
I.2.6.2 Carboxylic Acid Side-Chain.....	33
I.2.7 Ground State Absorbance.....	33
I.2.7.1 Types of Spectra.....	34
I.3 Adsorption Process.....	38
I.3.1 The Description of Adsorption.....	38
I.3.2 Adsorption Isotherm	39
I.3.2.1 Classification of Adsorption Isotherm	40
I.3.2.2 Langmuir kinetic theory of adsorption	43
I.3.3 Kinetic of Adsorption	44
I.3.4 Clay- Organic Chemical Complex.....	45
I.3.4.1. Surface functional groups in clays.....	46
AIM OF THE WORK.....	49

CHAPTER II: EXPERIMENTAL WORK

II.1. Materials.....	50
A. The Adsorbents.....	50
B. The Adsorbates.....	50
C. Reagents.....	62
