Factors Affecting Nurses' Performance Regarding Post-Operative Care of Patient with Open –Heart Surgery

Thesis

Submitted for Partial Fulfillment of
Master Degree in Nursing Sciences
Medical Surgical Nursing (Critical Care Nursing)

By

Salwa Mohamed Ali Soliman
B.S.C, Nursing, Assiut University

Under supervision of

Dr Mahasen Ebrahim Abd Elsatter
Assistant. Prof. of Medical Surgical Nursing
Faculty of Nursing - Ain shams university

Dr. Mona Nadr Ebrahim
Assistant. Prof. of Medical Surgical Nursing
Faculty of Nursing- Ain shams university

Faculty of Nursing
Ain shams university

2020

Acknowledgement

*Thanks to **Allah**, for giving me strength and the patience to complete this work after all challenges and difficulties.*

*Words cannot express my deep appreciation and gratitude to soul of **Dr. Mahasen Ebrahim Abd Elsatter**, Assistant Professor of Medical Surgical Nursing, Faculty of .Nursing, Ain Shams University for her close supervision, constructive criticism and continuous encouragement throughout the conduction of this study.*

*As well, t would like to express my appreciation to **Dr. Mona Nadr Ebraheim**, Assistant Professor of Medical Surgical Nursing, Faculty of Nursing, Ain Shams University for her meticulous supervision, continuous advices and unlimited help in all stages of this study.*

Finally, yet importantly, I wish to extend my thanks to all staff of nurses in cardio thoracic academy (post open-heart surgery unit) at Ain shams university hospital for their helping.

Salwa mohamed ali

Arabic summary --

REVIEW OF LITERATURE OUTLINE

- Overview about anatomy and physiology of the healthy heart and coronary arteries5
- Overview about open- heart surgery8
- Medical management of post-operative patients with open-heart surgery18
- Nursing management regarding post-operative care of patient with open- heart surgery through nursing process approach31
- Factor Affecting Nurses' Performance Regarding Post-Operative Care of Patient with Open –Heart Surgery43

**List of Tables**

| No. | Table | Page |
|------------|---|-------------|
| 1 | Frequency and percentage distribution of the studied nurses' according to their demographic data regarding post-operative care of open- heart surgery patient | 64 |
| 2 | Frequency and percentage distribution of the studied nurses' according to their satisfactory level of knowledge regarding post-operative care of open-heart surgery patient | 66 |
| 3 | Frequency and percentage distribution of the studied nurses' according to their level of attitude regarding post-operative care of open-heart surgery patient (pre- during-post). | 68 |
| 4 | Frequency and percentage distribution of the studied nurses' according to their satisfactory level of practice regarding post -operative care of open-heart surgery patient | 72 |
| 5 | Frequency and percentage distribution of the studied nurses' according to satisfactory level of practice regarding post-operative care of open-heart surgery patient | 74 |

| No. | Table | Page |
|-----|---|------|
| 6 | Frequency and percentage distribution of factor affecting nurse's performance regarding post-operative care of open-heart surgery patient | 76 |
| 7 | Relation between studies nurses' total level of knowledge, attitude and practice and factor affecting their performance | 80 |
| 8 | Relation between studies nurses' demographic characteristics, and their total level of knowledge regarding open-heart surgery patient | 81 |
| 9 | Relation between studies nurses' demographic characteristics, and their total level of attitude regarding open- heart surgery patient. | 82 |
| 10 | Relation between studies nurses' demographic characteristics, and their total level of practice regarding open-heart surgery patient. | 83 |
| 11 | Correlation between studies nurses' total level of knowledge, attitude and practice and factor affecting their performance | 84 |

| No. | List of tables regarding validity and reliability of the study tools | Page |
|-----|--|------|
| 1 | Experts judgment regarding face and content validity of nurse's knowledge questionnaire | 176 |
| 2 | Experts judgment regarding face and content validity of factor affecting nurse's performance regarding open-heart surgery patient assessment questionnaire | 177 |
| 3 | Experts judgment regarding face and content validity of attitude regarding open-heart surgery patient assessment questionnaire | 178 |
| 4 | Experts judgment regarding face and content validity of observational checklist of nurse's performance regarding open-heart surgery patient | 179 |
| 5 | Experts judgment regarding face and content validity of the study tools | 180 |
| 6 | Cronbach's Alpha Reliability Analysis of the Used Tool | 181 |

List of figures

| No, | Figure of result | Page |
|------------|--|-------------|
| 1 | percentage distribution of studied nurses' according to their level of knowledge, practice and attitude regarding post-operative care of patient with open heart surgery | 67 |
| 2 | percentage distribution of the studied nurses' according their total attitude level regarding post-operative care of open-heart surgery patient | 71 |
| 3 | percentage distribution of the studies nurses' according to their total satisfactory level of practice regarding post -operative care of open- heart surgery patient | 75 |

List of appendices

| No, | Appendices | Page |
|-----------------|--|-------------|
| Appendix I | Self-administrative nurses' questionnaire | 129 |
| Appendix II | Nurses' practice observational checklist | 145 |
| Appendix III | Validity and reliability of data collection tools | 176 |

List of Abbreviations

| ABB. | Full term |
|-----------------|--|
| (AACVPR) | American association of cardiovascular and pulmonary Rehabilitation |
| AF | Atrial fibrillation |
| AKI | Acute kidney injury |
| AR | Aortic regurgitation |
| ARDS | Acute respiratory distress syndrome |
| AS | Aortic stenosis |
| AV | A trio-ventricular |
| AVR | Aortic valve replacement |
| BMI | Body mass index |
| CABG | Coronary artery bypass grafting |
| CAD | Coronary artery disease |
| CBC | Complete blood count |
| CCS | Canadian classification society |
| CDC | Centers for disease control and prevention |
| CHF | Congestive heart failure |
| COPD | Chronic obstructive pulmonary disease |
| CPB | Cardiopulmonary bypass |
| CPR | Cardiopulmonary resuscitations |
| CSICU | Cardiac surgical intensive care units |
| CVC | Central venous catheter |
| CVD | Cardiovascular disease |

List of Abbreviations

| ABB. | Full term |
|---------------|--|
| CVP | Central venous pressure |
| CVS | Cerebrovascular stroke |
| CLABIS | Central line associated blood stream infections |
| DM | Diabetes mellitus |
| DSWI | Deep sternal wound infection |
| ECG | Electrocardiograph |
| GI | Gastrointestinal |
| HD | Heart disease |
| HIC | Heparin induce thrombocytopenia |
| HTN | Hypertension |
| ICU | intensive care unit |
| IV | Intravenous |
| LA | Left atrium |
| LAD | Left anterior descending artery |
| LCOS | Low cardiac output syndrome |
| LCX | Left circumflex artery |
| LV | Left ventricle |
| LVEF | Left ventricular ejection fraction |
| MAP | Mean arterial pressure |
| MICS | Minimally invasive cardiac surgery |
| MR | Mitral regurgitation |
| MS | Mitral stenosis |
| MVP | Mitral valve prolapses |
| NHLBI | National heart, lung and blood institute |
