HANAA ALY

Comparative Study Between Single Anastmosis Duodeno-Ileal Bypass-Sleeve and Mini-Gastric Bypass After Failed Sleeve Gastrectomy in Morbidly Obese Patients

Thesis

*Submitted For Partial Fulfillment of M.D.
Degree in General Surgery*

By

Moustafa Mahmoud Emad Mohamed

M. B. B. Ch, - MS in General Surgery, Ain Shams University

Under supervision of

Prof. Dr. Alaa Abbas Sabry Moustafa

*Professor & Head of Bariatric Surgery Unit
Faculty of Medicine-Ain Shams University*

Dr. Karim Sabry Abdel-Samee

*Lecturer of General Surgery
Faculty of Medicine-Ain Shams University*

Dr. Abdallah Hamed Ibrahim

*Lecturer of General Surgery
Faculty of Medicine-Ain Shams University*

*Faculty of Medicine
Ain Shams University
2020*

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا

سبحانك لا علم لنا
إلا ما علمتنا إنك أنت
العليم العظيم

صدق الله العظيم

سورة البقرة الآية: ٣٢

Acknowledgment

*First and foremost, I feel always indebted to **ALLAH**, the
Most Kind and Most Merciful.*

*I'd like to express my respectful thanks and profound
gratitude to **Prof. Dr. Alaa Abbas Sabry Moustafa**,
Professor & Head of Bariatric Surgery Unit, Faculty of
Medicine-Ain Shams University for his keen guidance, kind
supervision, valuable advice and continuous encouragement,
which made possible the completion of this work.*

*I am also delighted to express my deepest gratitude and
thanks to **Dr. Karim Sabry Abdel-Samee**, Lecturer of
General Surgery, Faculty of Medicine-Ain Shams University,
for his kind care, continuous supervision, valuable
instructions, constant help and great assistance throughout
this work.*

*I am deeply thankful to **Dr. Abdallah Hamed
Ibrahim**, Lecturer of General Surgery, Faculty of Medicine-
Ain Shams University, for his great help, active participation
and guidance.*

Moustafa Emad

Arabic Summary	—

List of Tables

Table No.	Title	Page No.
Table (1):	Conventional criteria used in selecting patients for obesity operations. Body mass index is used in evaluation of potential surgical candidates	7
Table (2):	Comparison between the SADIS and MGB group regarding preoperative demographic data.....	62
Table (3):	Comparison between the studied groups regarding pre-operative medical data.	65
Table (4):	Comparison between the studied groups regarding pre-operative laboratory data.	67
Table (5):	Comparison between the studied groups regarding excess weight loss by (KG) at 6 months and at 12 months post-operative.	69
Table (6):	Comparison between the studied groups regarding percentage of excess weight loss at 6 months and at 12 months post-operative.	70
Table (7):	Comparison between the studied groups regarding the percentage of DM patient's pre-operative, at 6 months and at 12 months post-operative.....	71
Table (8):	Comparison between the studied groups regarding the DM treatment pre-operative, at 6 months and at 12 months post-operative.....	74
Table (9):	Comparison between the studied groups regarding the HbA1c level pre-operative, at 6 months and at 12 months post-operative.	77
Table (10):	Comparison between the studied groups regarding the percentage of HTN patients pre-operative, at 6 months and at 12 months post-operative.	79.

List of Tables Cont...

Table No.	Title	Page No.
Table (11):	Comparison between the studied groups regarding the blood level of different component of lipid profile pre-operative and during follow up.....	80
Table (12):	Comparison between the studied groups regarding the number of patients with abnormal lipid profile pre-operative and during follow up. (with % of diseased patients).	83
Table (13):	Comparison between the studied groups regarding the laboratory data of different nutrients pre- operatively and during follow up.	87
Table (14):	Comparison between the studied groups regarding patients with abnormal laboratory data of different nutrients pre-operatively and during follow up.....	91
Table (15):	Comparison between the percentage of EWL for the present study and others after 1 year.....	98
Table (16):	Comparison between the resolution of DM for the present study and others after 1 year.	99
Table (17):	Comparison between the remission of hypertension for the present study and others after 1 year.	101
Table (18):	Comparison between the lipid profile improvement for the present study and others after 1 year.	103
Table (19):	Comparison between the nutritional deficiencies for the present study and other studies.....	105

List of Figures

Fig. No.	Title	Page No.
Figure (1):	Schematic view of mini-gastric bypass.....	14
Figure (2):	Scheme of the technique	17
Figure (3):	SADI-S	18
Figure (4):	Schematic view of hormonal changes after LSG Ghrelin, a hormone produced primarily by the oxyntic cells of the fundus of the stomach during fasting, stimulates appetite by increasing the expression of the orexigenic hypothalamic neuropeptide Y	25
Figure (5):	A 45-year old woman who underwent laparoscopic sleeve gastrectomy.....	33
Figure (6):	A 46-year old woman presented with weight regain 18 months after sleeve gastrectomy	38
Figure (7):	A 24-year-old woman presented insufficient weight loss 1 year after sleeve gastrectomy	39
Figure (8):	A 44-year-old man presenting with dysphagia following resleeve gastrectomy.....	40
Figure (9):	A 52-year-old patient referred to for insufficient weight loss after sleeve gastrectomy.....	41
Figure (10):	A 42-year-old woman who presented with severe dysphagia to solids and liquids 1 year after sleeve gastrectomy	42
Figure (11):	SADIS: Posterior blunt dissection between the duodenum and the pancreas creating a window for the stapler avoiding damage of gastroduodenal artery.	50
Figure (12):	SADIS: Duodenal Transection A) Endo-GIA stapler is applied 3 mm from the pylorus. B) Duodenum divided.	51

List of Figures Cont...

Fig. No.	Title	Page No.
Figure (13):	SADIS: Handswen end-to-side duodeno-ileal anastomosis.....	52
Figure (14):	SADIS: Intact duodenoileal anastomosis after methylene blue dye inflation of the stomach and duodenum.	52
Figure (15):	MGB: Creation of the gastric pouch along Lesser curvature of the stomach.....	54
Figure (16):	MGB: Closure of the stapling defect of the gastrojejunostomy.....	55
Figure (17):	Bar chart between groups according to age.....	63
Figure (18):	Bar chart between groups according to gender.....	63
Figure (19):	Comparison between both groups regarding DM treatment.....	66
Figure (20):	Comparison between both groups regarding HTN treatment.	66
Figure (21):	Mean Excess weight loss in the studied groups throughout the study.	69
Figure (22):	Mean percentage of excess weight loss in both groups during follow up.	70
Figure (23):	Comparison of DM patients between both groups preop. at 6 months and at 12 months.....	72
Figure (24):	Comparison between the studied groups regarding DM treatment pre-operative.....	75
Figure (25):	Comparison between the studied groups regarding DM treatment at 6 months.	75
Figure (26):	Comparison between the studied groups regarding DM treatment at 12 months.	76

List of Figures Cont...

Fig. No.	Title	Page No.
Figure (27):	Mean level of HbA1c throughout the study in both groups.....	78
Figure (28):	Percentage of hypertensive patients in both groups throughout the study.	79
Figure (29):	Comparison between the studied groups regarding total cholesterol.....	81
Figure (30):	Comparison between the studied groups regarding triglycerides.....	81
Figure (31):	Comparison between the studied groups regarding LDL.....	82
Figure (32):	Comparison between the studied groups regarding HDL.	82
Figure (33):	Mean blood level of cholesterol in both groups throughout the study.	84
Figure (34):	Mean blood level of triglycerides in both groups throughout the study.	84
Figure (35):	Mean blood level of LDL in both groups throughout the study.	85
Figure (36):	Mean blood level of HDL in both groups throughout the study.	85
Figure (37):	Mean blood level of Vitamin D in both groups throughout the study.	88
Figure (38):	Mean blood level of calcium in both groups throughout the study.	88
Figure (39):	Mean blood level of vitamin B12 in both groups throughout the study.	89
Figure (40):	Mean blood level of hemoglobin in both groups throughout the study.	89

List of Figures Cont...

Fig. No.	Title	Page No.
Figure (41):	Mean blood level of albumin in both groups throughout the study.	90
Figure (42):	Comparison between the studied groups regarding Vitamin D.	93
Figure (43):	Comparison between the studied groups regarding calcium.	93
Figure (44):	Comparison between the studied groups regarding Vitamin B12.	94
Figure (45):	Comparison between the studied groups regarding hemoglobin.	94

List of Abbreviations

Abb.	Full term
AACE	American Association of Clinical Endocrinologists
ASMBS.....	American Society for Metabolic and Bariatric Surgery
BDP-DS.....	Biliopancreatic diversion with duodenal switch
BMI.....	Body mass index
CCK	Cholecystokinin
CT	Computed tomography
CVD	Cardiovascular diseases
DM	Diabetes mellitus
ECG	Electrocardiography
EWL.....	Excess weight loss
GLP-1	Glucagon-like peptide-1
HbA1c.....	Hemoglobin A1c
HDL	High-density lipoprotein
HU	Hounsfield unit
IDF.....	International Diabetes Federation
IDF.....	The International Diabetes Federation
IV	Intravenous
Kvp	Kilovoltage peak
LAGB.....	Laparoscopic adjustable gastric band
LDL.....	Low-density lipoprotein
LMGBP.....	Laparoscopic mini-gastric bypass
LRYGB	Laparoscopic roux en y gastric bypass
LSG.....	Laparoscopic sleeve gastrectomy
mAs.....	Milliampere-seconds
MENA.....	Middle East and North Africa
MGB	Mini-Gastric bypass
NIH.....	National Institutes of Health
NPY	Neuropeptide Y
PYY.....	Peptide YY
RYGB.....	Roux-en-Y gastric bypass

List of Abbreviations Cont...

Abb.	Full term
SADI-S	Single Anastomosis Duodeno-ileal Bypass-Sleeve
SG	Sleeve Gastrectomy
T2DM.....	Type 2 diabetes mellitus
UGI.....	Upper gastrointestinal
WHO	World Health Organisation
