MONA MAGHRABY

Ain Shams University
Faculty of Women for Arts, Science and Education
Biochemistry and Nutrition Department

Impact of dry orange (*Citrus sinensis*) peels powder on Bisphenol A induced-hepatic and splenic toxicity in rats

Thesis

Submitted for Faculty of Women for Arts, Science and Education,
Ain Shams University. In partial fulfillment for the Master Science
Degree in Biochemistry and Nutrition.

By:

Hager Mosaad Saad Abd-Elgwaad

Demonstrator in the department of Biochemistry and Nutrition
Faculty of Women, Ain Shams University

Under Supervision of:

Prof.Dr. Hanan Mohamed Fathy Abd El-Wahab

Prof. of Biochemistry and Nutrition
Department of Biochemistry and Nutrition
Faculty of Women, Ain Shams University

Dr. Enas Ali Kamel

Assistant Professor of Nutrition
Department of Biochemistry and Nutrition
Faculty of Women, Ain Shams University

Dr. Eman Hassan Abdel Aziz

Lecturer of Biochemistry and Nutrition
Department of Biochemistry and Nutrition
Faculty of Women, Ain Shams University

2020

صدق الله العظيم
سورة طه آية (114)

Acknowledgement

First of all, all gratitude is due to **Allah** almighty for blessing this work, until it has reached its end, as a part of his generous help, throughout my life.

I would like to thank my supervisor with deepest gratitude and sincere appreciation goes to **Prof. Dr. Hanan Mohamed Fathy Abd El-Wahab** Professor of Biochemistry and Nutrition, Biochemistry and Nutrition Department, Faculty of Women for Arts, Science and Education, Ain Shams University, not only for suggesting, planning the point of research and valuable supervision, but also for her great help, guidance and appropriate choice of the research topic. She has been a tremendous mentor for me.

Let me express my deepest appreciation for **Dr. Enas Ali Kamel**, Assistant Professor of Nutrition, Biochemistry and Nutrition Department, Faculty of Women for Arts, Science and Education, Ain Shams University, for her great efforts, precious comments, patience and constant encouragement during all steps of this work.

I would like to express my profound thanks and gratitude to **Dr. Eman Hassan Abdel Aziz**, lecturer of Biochemistry and Nutrition, Biochemistry and Nutrition Department, Faculty of Women for Arts, Science and Education, Ain Shams University, for her helping, supporting, encouraging, and her sincere advice during all steps of this work.

I am thankful to **Dr. Amany Abdel Hamed Mahmoud**, Assistant Professor Histology and Histochemistry, Zotology Department, Faculty of Women for Arts, Science and Education, Ain Shams University for the help that she offered in the histopathological examination carried out in this study.

With great pleasure, I would like to express my sincere gratitude to the **staff members of Biochemistry and Nutrition Department**, Women's college Ain Shams University, for their encouragement to carry out this work. Also I'd like to express my thanks with love to my friends for their help and support throughout this work.

Hager Mosaad Saad Abd-Elgwaad

2020

DEDICATION.....

*This work is dedicated for the soul of my
father, Allah bless his soul.*

*I'd like to express my love to all my family
specially; my mother, my sister and my brother
for their encouragement, support, patience and
endless love when I was hardly need of this. I
owe for them a lot.*

List of contents

Subject	Page No.
List of abbreviations	i
List of tables	vii
List of figures	viii
Abstract	xi
Introduction	1
Aim of the work	3
Review of literature:	
- Bisphenol A (BPA)	5
- Uses of BPA in manufacture	5
- Sources and routes of BPA environmental exposure	6
1.Food and drinking water	6
2. Effluents	10
3.Soil	11
4.Dust	12
5.Atmosphere	12
- Occupational exposure	14
- Bisphenol A in Egypt	15
- Bisphenol A metabolism in human and animal bodies	17
- Toxic effect of BPA and related diseases	22
1.Endocrine disruption	23
2. Obesity, diabetes, and heart diseases	24
3. Neurotoxicity	26
4.Mutagenicity, carcinogenicity and teratogenicity	28
5.Hepatotoxicity	30
5.1.Non-alcoholic fatty liver disease (NAFLD) induced by the action of BPA on Sterol regulatory element-binding transcription factor 1 (<i>SREBF1</i>) gene expression	31
6. Immunotoxicity:	32
6.1.The effect of BPA on spleen	33
6.2. The effect of BPA on interleukin-4 (IL-4) and	34

Immunoglobulins	
- Citrus fruits	36
- Orange (<i>Citrus sinensis</i>)	37
- Active component in <i>citrus sinensis</i> peels	37
- The ameliorative effects of <i>citrus sinensis</i> peels	38
1. Anti-oxidant effect	38
2. Cytotoxic and anticancer effects	41
3. Anti-hyperglycemic effect	41
4. Hypolipidemic and cardio-protective effects	42
5. Hepato and Immuno-protective effects	46
Materials and Methods:	
Materials:	
- Plant material	49
- Chemicals	49
- Animals	49
- Diet	49
Methods:	
- Preparation of orange peels powder	52
- Proximate analysis: Determination of moisture content	52
- Determination of Protein (g/100g dried weight)	53
- Determination of ash content	54
- Determination of fat content (g/100g dried weight)	55
- Determination of crude fiber	55
- Determination of total Carbohydrates (g/100g dried weight)	56
- Extraction of phenolic and flavonoid contents in orange peels powder:	56
1. Determination of total phenolic content	56
2. Determination of total flavonoids content	57
- Experimental design	57
- Samples collection	59
- Biological measurements	60
1. Food intake	60
2. Change in body weight	60
3. Feed efficiency ratio (FER)	60

4.Relative weight of liver and spleen	60
- Biochemical analyses:	
- Liver analyses:	
1. RT-qPCR for <i>SREBF1</i> gene expression	61
2. Determination of Liver Catalase (CAT) enzyme activity	68
- Serum analyses:	
1. Determination of serum nitric oxide (NO) level	70
2. Interleuken-4 (IL-4)	71
3. Determination of aspartate aminotransferase (AST) enzyme activity	77
4. Determination of alanine aminotransferase (ALT) enzyme activity	79
5. Determination of lipids profile	81
a. Determination of total cholesterol (TC)	81
b. Determination of serum high density lipoprotein cholesterol (HDL-C)	83
c. Determination of serum triacylglycerols (TAGs)	84
d. Determination of serum very low density lipoprotein cholesterol (VLDL-C) concentration	86
e. Determination of serum low density lipoprotein cholesterol (LDL-C) concentration	87
f. Risk factor ₁	87
6. Determination of serum Immunoglobulin-E (IgE)	87
7. Determination of serum Immunoglobulin-M (IgM)	90
8. Determination of Serum Iron	92
9. Determination of Serum Total Iron Binding Capacity (TIBC)	93
- Hematological measurements	94
- Histopathological Examination	94
- Statistical analysis	95

Results:	
- Proximate analysis of orange (<i>Citrus sinensis</i>) peels powder (OPP)	96
- Antioxidant activity of orange (<i>Citrus sinensis</i>) peels powder (OPP) ethanolic extract	97
- The effect of OPP supplementation against BPA administration on some biological parameters in different experimental groups	98
- The effect of OPP supplementation against BPA administration on liver Sterol regulatory element-binding transcription factor1 (<i>SREBF1</i>) gene expression, serum interleukin-4 (IL-4) (Pg/ml), serum immunoglobulins M (IgM) and E (IgE) (mg/dl) levels in different experimental groups	103
- The effect of OPP supplementation against BPA administration on serum nitric oxide level (NO) ($\mu\text{mol/L}$), alanine aminotransferase (ALT) (U/L), aspartate aminotransferase (AST) enzyme activities (U/L) and hepatic catalase enzyme activity (U/g. tissue) in different experimental groups	108
- The effect of OPP supplementation against BPA administration on serum lipids profile in different experimental groups	113
- The effect of OPP supplementation against BPA administration on serum Iron ($\mu\text{g/dl}$) and TIBC ($\mu\text{g/dl}$) in different experimental groups	119
- The effect of OPP supplementation against BPA administration on hemoglobin (Hb) concentration (g/dl), red blood cells (RBCs) ($\times 10^6$ cell/ μl) and total leucocyte counts (TLC) ($\times 10^3$ cell/ μl) in different experimental groups	121
- The effects of OPP supplementation against BPA administration on the microscopic examinations of liver tissues in all experimental rat groups	125
