ACKNOWLEDGMENT

First and foremost, I feel always indebted to **ALLAH**, the kind and merciful.

I turn with a grateful heart to Dr. Harisa EL Shimy, Assistant Professor of Nursing Administration, Faculty of Nursing, Ain Shams University. I am indebted to her meticulous supervision, constructive criticism, expertise, and continuous unlimited help. Without her enthusiasm and motherly attitude that has made the easiest out of most difficult, I would not have been able to start and complete this work. It has always been and will continue to be a great personal pleasure being a student of her.

I wish to express my appreciation to Dr. Samia Adam, Lecturer of Nursing Administration, Faculty of Nursing, Ain Shams University, for her meticulous supervision, fruitful guidance, valuable support and instructions throughout this thesis. All are deeply and cordially appreciated.

Last but not least, my deepest appreciation goes to all persons who helped me during the accomplishment of this work, and my friends for their continuous enthusiasm and support.
