#### ACKNOWLEDGEMENT

My deepest appreciation and my greatest gratitude to "GOD", whose care is essential guidance in my life and in every step for accomplishment of this work.

I would like to express my deep gratitude to **Prof. Dr. Amin El-Missiri** Professor of Restorative Dentistry,

Faculty of Dentistry, Tanta University, for his kind help and good understanding.

I wish to express my deep gratitude to **Prof. Dr. Hussien Y. ElSayed** Professor of Restorative Dentistry,

Faculty of Dentistry, Tanta University, for his supervision, kind help and precious guidance during this work.

My gratitude and thanks to **Dr.** Ashraf A. Saleh Lecturer of Restorative Dentistry, Faculty of Dentistry, Tanta University for his guidance and help.

I am so greateful to staff members of Restorative Dentistry Department, Faculty of Dentistry, Tanta University.

AIMS OF THE STUDY	42
MATERIALS AND METHODS	43
RESULTS	63
DISCUSSION	90
SUMMARY AND CONCLUSIONS	102
REFERENCES	106
ARABIC SUMMARY	1

### LIST OF FIGURES

Fig.		Page
No.		
1	Sample of tooth with flat dentin surface	63
	embeded into auto polymerizing resin block	
	using specially designed copper cylinder.	
2	(A) Copper cylinder with splitted central ring.	54
	(B) Another splitted ring adapted to the top of	0.
	the first one, and could be reassembled togethe	
	with an embrassed metal circle.	
3	Scotchbond Multi-purpose plus adhesive.	55
4	All-Bond2 / universal adhesive.	56
5	Samples of Composite resin restorative	57
	material bonded to dentin surface by using	31
	either All-Bond2 or Scotchbond Multi-purpose	
	plus.	
6	Samples of amalgam restorative material	<b>7</b> 0
	bonded to dentin surface by using either All-	58
	Bond2 or Scotchbond Multi-purpose plus.	
7	Special designed metal ring for fabrication of	50
	wax pattern casted later on with chrome cobalt	59
	alloy for ceramic build up samples.	
	and the comme outly up samples.	

8	Samples of ceramic restorative material bonded	60
	to dentin surface by using either All-Bond 2 or	
	Scotchbond Multi-pupose plus adhesive.	
9	Diagram representing the loading cell for shear	61
	dynamic testing.	
10	The testing set up before and after attachement	62
	to dynamic universal testometric machine.	
11	Mean shear bond strength for different	73
	restorative materials bonded to dentin by using	,
	Scotchbond Multi-purpose plus adhesive.	
12	Mean shear bond strength for different	74
	restorative materials bonded to dentin by using	
	All-Bond 2 adhesive.	
13	Mean shear bond strength for different	75
	restorative materials bonded to dentin with two	
	adhesive systems	
14	A picture showing a cohesive failure within the	84
	adhesive itself, for composite resin / All-	
	Bond 2 group.	
15	A picture showing an adhesive failure at	85
	adhesive / dentin interface for amalgam /All-	
	Bond 2 group.

#### LIST OF TABLES

Гable		Page
No.		
1	Number of samples of different restorative	52
	materials and adhesive systems used.	
2	Mean shear bond strengths of amalgam	70
	composite resin, and ceramic restorative	
	materials by using Scotchbond Multi-purpose	
	plus adhesive.	
3	Mean shear bond strengths of amalgam,	71
	composite resin, and ceramic restorative	
	materials by using All-Bond2 adhesive.	
4	The calculated means and standard deviations	76
	of shear bond strength (Mpa) of different	
	restorative materials bonded to dentin with the	
	tested adhesive systems.	
5	Analysis of variance of the shear bond strength	77
	data for groups of various restorative materials	
	bonded with different adhesive agents.	
6	Statistical comparison between mean shear	78
	bond strength values of different restorative	
	materials bonded to dentin with All-Bond2	
	adhesive system.	

- Statistical comparison between mean shear 79 bond strength values of different restorative materials bonded to dentin with Scotchbond Multi-purpose plus.
- 8 Statistical comparison between mean shear 80 bond strength values obtained with the differently restorative materials / adhesives combinations.
