Acknowledgement

I would like to express my deepest thanks and gratitude to **Professor Dr. Samia A. Nossier**, professor of Maternal and Child Health, High Institute of Public Health, Alexandria University, for her continuous guidance and support, patience and donation of time allover the period of this study. Without her assistance this work would have never been accomplished.

I owe special gratitude to **Professor Dr. Wafaa Waheeb Guirguis**, Professor of Hospital Administration, High Institute of Public Health, Alexandria University, for her continuous encouragement, support and donation.

I am grateful also to **Dr. Hany Shafeek** , lecturer of Maternal and Child Health, High Institute of Public Health, Alexandria University, for his valuable instructions and encouragement.

Special thanks to **Dr. Ashraf M. Zaghloul**, lecturer of Health Administration, High Institute of Public Health, Alexandria University, for his great help and meticulous guidance during data analysis.

Profound thanks to all **staff of MCH** in the High Institute of Public Health.

I am sincerely grateful to my husband and my children for tolerating my tension during the hard times.

List of Tables

Table	Page
I Distribution of physicians according to the date of graduation, qualification and specialty (Alexandria, 1997)	59
II Distribution of physicians according to some characteristics of the training received on ARI case management (Alexandria, 1997)	60
III Distribution of physicians according to their opinion regarding non use of stethoscope and non prescription of antibiotic in managing cases with cough (Alexandria, 1997)	61
IV-a Distribution of physicians according to their level of knowledge regarding assessment of the cases of ARI (age 2 months- 5 years) (Alexandria, 1997)	65
IV-b Distribution of physicians according to their level of knowledge regarding assessment of the cases of ARI (age < 2 months) (Alexandria, 1997)	66
V Distribution of physicians according to their level of knowledge regarding classification of cases of ARI (Alexandria, 1997)	67
VI-a Distribution of physicians according to their level of knowledge regarding treatment of ARI cases (age 2 months- 5 years) (Alexandria, 1997)	68

Table	Page
VI-b Distribution of physicians according to their level of knowledge regarding treatment of ARI cases (age < 2 months) (Alexandria, 1997)	69
VII Distribution of physicians' score on assessment, classification, treatment of ARI cases and their total score of knowledge on SCM (Alexandria, 1997)	70
VIII Relationship between the physicians' level of knowledge and some selected background characteristics (Alexandria, 1997)	71
IX Compliance of physicians with history taking questions according to ARI standard case management guidelines (Alexandria, 1997)	79
X Frequency of recording history findings items by physicians (Alexandria, 1997)	80
XI Frequency of dissimilarity between positive findings of physicians and investigator regarding items of history taking (Alexandria, 1997)	81
XII Compliance of physicians with items of examination according to ARI standard case management (Alexandria, 1997)	82
XIII Frequency of recording of examination findings by physicians (Alexandria, 1997)	83

Table	Page
XIV Frequency of dissimilarity between positive findings of physicians and investigator regarding items of examination (Alexandria, 1997)	84
XV Comparison of diagnosis of ARI cases between physicians and investigator (Alexandria, 1997)	85
XVI Compliance of physicians with ARI SCM guidelines for treatment of cough in cases diagnosed as cough by investigator, according to physicians' diagnoses (Alexandria, 1997)	86
XVII: Compliance of physicians with ARI SCM guidelines for treatment of pneumonia in cases diagnosed as pneumonia by investigator, according to physicians' diagnoses (Alexandria, 1997)	87
XVIII: Compliance of physicians with ARI SCM guidelines for treatment of severe pneumonia in cases diagnosed as severe pneumonia by investigator, according to physicians' diagnoses (Alexandria, 1997)	88
XIX: Compliance of physicians with ARI SCM guidelines for treatment of very severe disease in cases diagnosed as very severe disease by investigator, according to physicians' diagnoses (Alexandria, 1997)	89
XX: Distribution of physicians according to their performance score (Alexandria, 1997)	90
XXI: Distribution of physicians' performance score by MCH centers (Alexandria, 1997)	90

XXII: Correlation coefficient between physicians' score of knowledge
and score of performance (Alexandria, 1997)
