A PROBABILISTIC MULTI-PARAMETRIC BID EVALUATION SYSTEM FOR CONSTRUCTION PROJECTS USING BELIEF NETWORKS TECHNIQUE

By

Badr Mohammed Naji Ghaleb

M.Sc in Structural Engineering 1992

A Thesis Submitted to the Faculty of Engineering at Cairo University in
Partial Fulfillment of the Requirements for the Degree of

DOCTOR OF PHILOSOPHY

in

Structural Engineering

**FACULTY OF ENGINEERING, CAIRO UNIVERSITY,
GIZA, EGYPT.**

June 2004

A PROBABILISTIC MULTI-PARAMETRIC BID EVALUATION SYSTEM FOR CONSTRUCTION PROJECTS USING BELIEF NETWORKS TECHNIQUE

By

Badr Mohammed Naji Ghaleb

M.Sc in Structural Engineering, King Fahd University for Petroleum and
Minerals, Dhahran, Saudi Arabia 1992

A Thesis Submitted to the Faculty of Engineering at Cairo University in
Partial Fulfillment of the Requirements for the Degree of

DOCTOR OF PHILOSOPHY

in

Structural Engineering

Approved by the Examining Committee

Prof. Dr. Moheeb El-Said Ibrahim, Thesis Main advisor

Professor of Construction Engineering and Management,
Structural Engineering Department, Faculty of Engineering, Cairo University

Prof. Dr. Adel Abul-Yazeed El-Samadony, Member

Professor of Construction Management,
Civil Engineering Department, Faculty of Engineering at Mataria, Helwan University

Prof. Dr. Refaat Hassan Abdel-Razek, Member

Professor of Construction Management,
Construction Engineering Department, Faculty of Engineering, Zagazig University

**FACULTY OF ENGINEERING, CAIRO UNIVERSITY,
GIZA, EGYPT.**

June 2004

ACKNOWLEDGEMENTS

First, and foremost I thank **GOD**, Beneficent, and most Merciful.

This thesis owes an enormous debt to my main advisor Professor moheeb El-Said Ibrahim and my co-advisor Dr. Maged Ezzat Georgy. I would like to express my deepest thanks, extreme gratitude and sincere appreciation to them for always finding time to answer my endless questions, for their long-range insight in guiding my research, for their kindness and unwavering support. It goes without saying that this thesis would have not reached this level if it were not for their immense effort and time spent throughout the course of this research.

I am profoundly in debt to Dr. Hesham Abdel-Aziz, Director of Engineering Projects at the American University in Cairo, for his generous help and willingness to spending a lot of his precious time to help during the course of the field surveys.

Special thanks are also due to Engineer Amgad Abdul-Aleem Vice Director of the Technical Affairs, Ministry of Housing, Utilities, and Urban Communities for his limitless help and valuable support.

This thesis owes a lot to my wife who sacrificed with her time. Previously and throughout the course of my research she has tolerated and encouraged me in every means possible. She has always given my research such great priority over her own interests. I may never be able to repay her, but fortunately, I have a lifetime to try.

Last but by no means the least, I wish to thank my beloved family, my sons and my daughters, especially Dr. Reem for their love, understanding, encouragement, and patience during my study at Cairo University, in Egypt.

Badr Mohammed Nagi Al-Aghbari

TABLE OF CONTENTS

	Page
ACKNOWLEDGEMENTS	iv
LIST OF FIGURES	x
LIST OF TABLES	xiii
ABSTRACT.....	xviii
CHAPTER 1. INTRODUCTION.....	1
1.1. Background.....	1
1.2. Problem Definition	2
1.3. Research Objective.....	3
1.4. Research Methodology.....	4
1.5. Dissertation Organization	5
 CHAPTER 2. LITERATURE REVIEW	 7
2.1. Bidding and Bidding Systems/Procedures	7
2.2. Bid Evaluation Systems	8
2.3. Traditional Bid Evaluation Systems	9
2.3.1. Low-Bid System.....	9
2.3.2. Non-Low Bid System	11
2.4. Recent Development in Bid Evaluation.....	12
2.4.1. Multi-Criterion Bid Evaluation Systems	13
2.4.1.1 Simple Weighting Method.....	14
2.4.1.2 Probabilistic Method	17
2.4.1.3 Decision-Making Methods.....	18
2.4.1.4 Artificial Intelligence Techniques.....	19
2.4.2. Multi-Parameteric Bid Evaluation Systems.....	21
2.4.2.1 Bidding on Cost/Time (A+B) Method	22
2.4.2.2 Bidding on Cost/Time (A+B) Plus Incentive/Disincentive Method.....	23
2.4.2.3 Lane Rental Method.....	23
2.4.2.4 Modified A+B Method.....	24
2.5. Chapter Summary.....	26

CHAPTER 3. CURRENT PRACTICES IN EGYPT	28
3.1. Egyptian Legislation in the Field of Bid Evaluation	28
3.1.1. Law No.9 for the Year 1983	28
3.1.2. Law No.89 for the Year 1998	29
3.1.2.1 Two Envelopes System.....	31
3.1.2.2 Points System System	31
3.2. Bid Evaluation Procedures	32
3.3. Field Survey	32
3.3.1. Survey Sample and Response.....	33
3.4. Data Analysis	34
3.4.1. Importance of Various Evaluation Parameters.....	38
3.5. Chapter Summary.....	41
 CHAPTER 4. RESEARCH APPROACH AND METHODOLOGY	 43
4.1. Research Approach	43
4.1.1. Belief Networks and Bid Evaluation.....	45
4.1.2 Suitability of Belief Networks Versus Other AI Tchniques	46
4.1.3. Integration of Evaluation Parameters	47
4.2. Research Methodology.....	48
4.2.1. Problem Exploration	48
4.2.2. Data Collection.....	48
4.2.3. System Design and Development	49
4.2.4. System Testing and Validation	49
4.3. Bayesian' Belief Networks	51
4.3.1. Conditional Probabilities and Bayes' Theorem.....	52
4.3.2. Development of Belief Networks	54
4.3.3. Illustrative Example of the Belief Network Application	55
4.4. Analytical Hierarchy Process (AHP).....	63
4.4.1. Basic Steps of the Analytical Hierarchy Processs (AHP).....	64
4.4.2. Advantages and Limitations of the AHP	67
4.4.3. Illustrative Example of the AHP Application.....	67
4.5. Chapter Summary.....	70
