MICROBIAL TREATMENT OF LIQUID WASTES FROM SOME INDUSTRIES

THESIS

Submitted to the Faculty of Science

Alexandria University

BY

Ebaa Ebrahim Ahmad Fahmy El - Sharouny

(B. Sc. 1991)

In Partial Fulfilment of the requirements

for the Degree of Master of Science

Supervised by

Prof. Dr. Zakia A. Olama

**Assist. Prof. of Microbiology
Botany and Microbiology Department
Faculty of Science
Alexandria University**

Prof. Dr. Mohamed M. Aly El - Sayed

**Professor of Biochemistry
Head of Biochemistry Department
Faculty of Science
Alexandria University**

Dr. Azza Hassan Aly El - Sabaeny

**Lecturer of Microbiology
Botany and Microbiology Department
Faculty of Science
Alexandria University**

Botany and Microbiology Department

Faculty of Science

Alexandria University

1994

This thesis has not been previously submitted
for a degree at this or any other university and it
is the original work of the writer.

ACKNOWLEDGEMENT.

PREFACE AND OBJECTIVES.

I. INTRODUCTION.....	1
1.1. Use of water.....	1
1.2. Water Resources.....	1
1.2.1. Hydrological cycle.....	1
1.2.2. Evaporation.....	4
1.2.3. Transpiration.....	4
1.2.4. Infiltration and percolation.....	5
1.2.5. Surface runoff.....	5
1.2.6. Ground water.....	6
1.2.7. Rain water.....	6
1.2.8. Storage and distribution.....	7
1.3. Water pollution.....	7
1.3.1. Types of pollutants.....	8
1.3.1.1. Organic chemicals.....	8
1.3.1.2. Inorganic chemicals.....	9
1.3.1.3. Sediments.....	9
1.3.1.4. Radioactive substances.....	10
1.3.1.5. Heat.....	10
1.3.1.6. Plant nutrients.....	10
1.3.1.7. Waterborne disease.....	10
1.3.1.7.1. Bacteria.....	11

	<u>Page</u>
1.3.1.7.2. Algae.....	12
1.3.1.7.3. Fungi.....	12
1.3.1.7.4. Viruses.....	13
1.3.1.7.5. Protozoa.....	13
1.3.1.8. Microbial indicators of sewage pollution.....	13
1.3.1.9. Dissolved oxygen and oxygen demand...	14
1.3.1.9.1. Measurements of oxygen demand of wastewaters	16
1.3.1.9.1.1. Biochemical measurement.....	16
1.3.1.9.1.2. Chemical measurement.....	17
1.3.1.9.1.3. Instrumental measurement.....	18
1.4. Waste water and sewage treatment.....	18
1.4.1. Preliminary treatment.....	20
1.4.1.1. Screens.....	20
1.4.1.2. Grit separation.....	21
1.4.1.3. Storm water.....	22
1.4.2. Primary treatment.....	23
1.4.3. Secondary treatment.....	23
1.4.4. Tertiary treatment.....	25
1.5. Biotechnology of treated wastewater and sewage.....	25
1.5.1. Resource reuse.....	25
1.5.1.1. Fertilizer value.....	25
1.5.1.2. Reuse of effluents.....	26
1.5.1.3. Metal Recovery.....	30

	<u>Page</u>
1.5.2. Biological conversion.....	32
1.5.2.1. Bio-energy.....	32
1.5.2.1.1. Biogas.....	33
1.5.2.1.2. Fuel-alcohol.....	34
1.5.2.2. Single cell protein production and biomass.....	35
1.5.2.2.1. General outlook of microbial protein production.....	37
1.5.2.2.2. Raw materials.....	40
1.5.2.3. Lactic acid production.....	44
2. MATERIALS AND METHODS.....	46
2.1. Microorganisms and their maintainance.....	46
2.2. Waste materials.....	46
2.2.1. Sampling.....	47
2.2.2. Analysis of waste materials.....	48
2.2.3. Temperature.....	48
2.2.4. pH determination.....	48
2.2.5. Ash determination.....	48
2.2.6. Determination of turbidity.....	49
2.2.7. Residues determination.....	49
2.2.8. Hardness determination.....	50
2.2.9. Elements.....	50
2.2.10. Total nitrogen content and crude protein.....	51
2.2.11. Total reducing sugars.....	54
2.2.12. Total organic carbon.....	54
2.2.13. Determination of nitrite (NO ₂).....	54

	<u>Page</u>
2.2.14. Determination of nitrate (NO_3)	55
2.2.15. Chloride determination.....	56
2.2.16. Determination of sulfate.....	56
2.3. Preparation of seed culture.....	56
2.4. Media.....	57
2.4.1. For stock cultures.....	57
2.4.2. Fermentation media.....	57
2.4.2.1. For measureing BOD and COD.....	57
2.4.2.2. For measuring single cell protein and lactic acid	57
2.4.2.3. Cultivation.....	58
2.4.2.3.1. Using Erlenmeyer flasks.....	58
2.4.2.3.2. Using BOD bottles.....	58
2.5. Analysis of biomass.....	58
2.5.1. Biomass yield (Dry weight).....	58
2.5.2. Single cell protein determination.....	59
2.6. Analysis of culture filtrate.....	59
2.6.1. pH value.....	59
2.6.2. Total nitrogen content.....	59
2.6.3. BOD determination.....	59
2.6.4. Iodometric method (Azide modification).....	63
2.6.5. Determination of COD.....	67
2.6.6. Estimation of lactic acid.....	71
2.7. Quantitative determination of amino acids..	71

	<u>Page</u>
3. EXPERIMENTAL AND RESULTS.....	72
3.1. Analysis of liquid waste samples.....	72
3.2. Biological treatment of liquid waste materials.....	74
3.2.1. Screening experiment.....	74
3.2.2. Dilution rate test.....	79
3.2.3. Time course degradation of BOD.....	83
3.2.4. pH relations.....	86
3.2.5. Age of seed culture.....	89
3.2.6. Size of microbial inoculum.....	90
3.2.7. Volume of the culture medium.....	96
3.3. Chemical composition of the fermented liquid waste effluents (after treatment)..<	97
3.4. The irrigation quality of the fermented (treated) liquid waste effluents under investigation.....	102
3.5. Physiological factors affecting single cell protein and lactic acid production by the liquid waste effluents under test..	107
3.5.1. Effect of carbon source.....	107
3.5.2. Effect of natural nitrogen source.....	111
3.5.3. Effect of inorganic nitrogen source and amino acids.....	115
3.5.4. Response of some trace elements and vitamins.....	119
3.5.5. Time course fermentation.....	123
3.5.6. Effect of pH.....	127
3.5.7. Effect of culture volume.....	128

3.6. Statistical analysis.....	134
3.7. Amino acids content of the SCP formed by the tested bacterium and yeast strains grown on the modified liquid waste effluents under investigation.....	134
4. DISCUSSION.....	137
5. SUMMARY.....	179

ARABIC SUMMARY.	

ACKNOWLEDGEMENT

I owe a great dept of gratitude and very special thanks to professor Dr. Mohamed M. El-Sayed, Head of Biochemistry Department, Faculty of Science, Alexandria University, for his kindness, suggestions, criticism and continuous sincere guidance throughout the course of this work. I owe much to him, for his generous support, supervision and for assisting me greatly in the revision of this disseration.

My deep appreciation and gratitude are due to prof. Dr. Zakia A. Olama, Ass. prof. of Microbiology, Botany & Microbiology Department, Faculty of Science, Alexandria University, for her suggestion of the topic of this thesis and for revising the manuscript Also for her ideals, untiring effort, unlimited moral support, fraternal encouragement and fruitful help throughout the preparation of this thesis.

I wish to express my great appreciation and sincere thanks to Dr. Azza H.A. El-Sabaeny, Lecturer of Microbiology, Botany & Microbiology Department, Faculty of Science, Alexandria University, for her support, continuous assistance and her help during the revision of this thesis.
