## APPROVAL SHEET

This is to approve that the thesis presented by **SAMYA IBRAHEM ALY HASANIN** to Zagazig University entitled "**PATHOLOGIC STUDIES ON COMMON CARP WITH REFERENCE TO SWIM BLADDER AFFECTIONS**" for the degree of master of Vet. Med. Sc. has been approved by the examining committee:

*Signature*

**Prof. Dr. Rawhea Eyssawy Doghem**  
*Professor and head dept. of Pathology,  
Faculty of Vet. Med., Cairo University*

*Rawhea Doghem*

**Prof. Dr. Magdy Hassan Hafez**  
*Professor of Pathology and Vice dean  
Faculty of Vet. Med., Zagazig University*

*Magdy H.H.*

**Prof. Dr. Anisa M.H. Moustafa**  
*Professor of Pathology, Faculty of Vet.  
Med., Zagazig University (Supervisor)*

*Anisa M.H. Moustafa*

**Prof. Dr. Abd-El-Menem A. Aly**  
*Professor of Pathology, Faculty of Vet.  
Med., Zagazig University (Supervisor)*

*Abdel-M. A. Aly*

**Prof. Dr. Zeinab M.A.E. El-Bohy**  
*Prof. of Fish Diseases and  
Management, Faculty of Vet. Medicine,  
Zagazig University (Supervisor)*

*Z. M. El Bohy*

**Dr. Salah E.M. Aly**  
*Assist. Prof. of Pathology, Faculty of  
Vet. Medicine, Suez Canal University  
(Supervisor)*

*Salah E.M. Aly*

July 22, 2001

# **PATHOLOGIC STUDIES ON COMMON CARP WITH REFERENCE TO SWIM BLADDER AFFECTIONS**

*By*

**SAMYA IBRAHEM ALY HASANIN**

B.V.Sc. Zagazig University (1985)

Diploma of Fish Diseases and Management (1995)

*Under Supervision of*

**Dr. Anisa M.H. Moustafa**  
Prof. of Pathology, Faculty of  
Vet. Medicine, Zagazig University

**Dr. Abd-El-Menem A. Aly**  
Prof. of Pathology, Faculty of  
Vet. Medicine, Zagazig University

**Dr. Zeinab M.A. El-Bouhy**  
Prof. of Fish Diseases and  
Management, Faculty of Vet.  
Medicine, Zagazig University

**Dr. Salah El-Din M. Aly**  
Assist. Prof. of Pathology,  
Faculty of Vet. Medicine,  
Suez Canal University

*Thesis*

*Submitted to Zagazig University for Degree of  
Master of Vet. Medical Sciences  
(fish Pathology)  
Pathology Department*

[2001]

## **ACKNOWLEDGMENT**

First of all the author is greatly indebted in all his work and is success to our **Merciful "GOD"**.

I wish express my sincere appreciation and gratitude to soul of the late **Prof. Dr. Mohei E. Easa** Prof. of Pathology, Fac. of Vet. Med., Cairo Univ., for his useful suggestion, continuous help and supervision on through the first part of this work.

Cordial thanks and deep gratitude are offered to **Prof. Dr. Anisa M.H. Moustafa**, Prof. of Pathology, Fac. of Vet. Med., Zagazig Univ., for her suggesting and planning this work great help, her encouragement during the work and excellent supervision.

Sincere thanks and deep gratitude are particular to **Prof. Dr. Abd-El-Menem A. Aly**, Prof. of Pathology, Fac. of Vet. Med., Zagazig Univ., for his sincere help, faithful guidance and supervision.

All thanks are due to **Prof. Dr. Zeinab M.A.E. El-Bohy** Prof. of Fish Diseases and Management, Fac. of Vet. Med., Zagazig Univ., for her great cooperation, valuable guidance and supervision.

I wish to express my highest appreciation and deep obligation to **Dr. Salah El-Din M. Aly** Assist. Prof. of Pathology, Fac. of Vet. Med., Suez Canal Univ., for continuous advices facilities, supervision and sincere efforts during preparing the thesis.

I wish to thanks **Dr. Atef E. Ibrahim**, Researcher in Central Laboratory for Aquaculture Research (CLAR) at Abbassa for offering the facilities to make this work.

I wish to thanks **Prof. Dr. Mahmod Ezzat**, Prof. and head of Bacteriology Dept., Fac. of Vet. Med., Suez Canal Univ. and **Dr. Abd-El-Pattah A. Baraka** Representative Ministry of Vet. Medicine in Sharkia Governorate for they great help and advice during this work.

Finally, I wish to express my warmest thanks to my Parents. Sisters and Brothers for their patience, continuous encouragement and assistance.

# DEDICATION

*TO MY PROF. DR. ANISA*

*TO MY HUSBAND*

*AND MY KIDS*

*OSAMA, AYA AND AHMED*

## VITA

- The author was born in May 22, 1962 in Hadaek El-Koba, Cairo Governorate.
- Her primary education was completed in Abu-Khalel Primary School, in Zagazig, Sharkia Governorate, from which she graduated in 1974.
- Her preparatory education was completed in El-Sadat Preparatory School for Girls, in Zagazig, Sharkia Governorate, from which she graduated in 1977.
- Her secondary education was completed in Zagazig Secondary School for Girls, in Zagazig, Sharkia Governorate, from which she graduated in 1980.
- Her undergraduate and professional education was completed in the Faculty of Veterinary Medicine, Zagazig University, from which she received a degree of Bachelor Veterinary Medical Sciences in 1985.
- From Faculty of Veterinary Medicine, Zagazig University, she received a Diploma of Poultry Diseases in 1987.
- From Faculty of Veterinary Medicine, Zagazig University, she received a Diploma of Fish Diseases and Management in 1995.
- The author worked in Poultry and Fish Dept. in Administration of Vet. Medicine in Sharkia Governorate from 1988.
- The author is working in Agricultural Research Center, Central Laboratory for Aquaculture Research, Abbassa, Dept. of Fish Diseases and Health from 2001.
- She has been registered for the degree of M. V. Sc. since 1996.

## LIST OF ABBREVIATIONS

A.	: Aeromonas.
Ps.	: Psedumonas.
SBI	: Swim bladder inflammation.
M.A.S	: Motile aeromonas septicemia.
I/M	: Intramuscular.
IP	: Intraperitoneal.
Spp.	: Species.
Sp.	: Species.
hrs	: Hours.
No.	: Number.
ppm	: Part per million.
PI	: Post Inoculation
H & E	: Hematoxylin and eosin.
gm	: Gram
°C	: Degree centigrade

## LIST OF TABLES

<u>Table</u>		<u>Page</u>
(1)	Showing the design of experimental infection in Common carp with the isolated bacteria.....	38
(2)	Showing the prevalence of infection among the clinically diseased Common carp.....	39
(3)	Showing the prevalence of bacterial isolates among clinically infected Common carp.....	40
(4)	Showing the distribution of the bacteria in various organs of Common carp with special reference to swim bladder.....	40
(5)	Showing fish groups, No. of fish / group, type of bacterial infection by I/P route with daily mortalities within 2 weeks PI and percentage of deaths in experimentally inoculated Common carp.....	41
(6)	Showing the prevalence of the parasitic infections among the examined Common carp.....	54
(7)	Showing the distribution of parasitic infections in various organs of Common carp.....	54
(8)	Showing the morphological and microscopical characteristic of the parasitic cysts.....	55

## LIST OF FIGURS

<u>Figure</u>		<u>Page</u>
(1)	Common carp, naturally infected by <i>A. hydrophila</i> , showing congestion <sub>1</sub> and petechial hemorrhages on the skin <sub>2</sub> . .....	57
(2)	Gills, of Common carp naturally infected by <i>A. hydrophila</i> , showing congestion and telangiectiasis of the secondary lamellae <sub>1</sub> along with epithelial hyperplasia <sub>2</sub> , desquamation and mononuclear leukocytic cells infiltration in the tips of gill filaments <sub>3</sub> . H & E X 250. ....	57
(3)	Heart, of Common carp naturally infected by <i>A. hydrophila</i> , showing thickened pericardium by congested blood vessels <sub>1</sub> , leukocytic cells infiltration beside <sub>2</sub> peri-and myocardial edema <sub>3</sub> . H & E, X 400. ....	58
(4)	Liver, of Common carp naturally infected by <i>A. hydrophila</i> , showing vacuolated hepatocytes <sub>1</sub> and focal mononuclear leukocytic cells infiltrations <sub>2</sub> as well as perivascular melanomacrophage cells aggregation <sub>3</sub> . H & E, X 250. ....	58
(5)	Spleen, of Common carp naturally infected by <i>A. hydrophila</i> , showing lymphoid depletion <sub>1</sub> with proliferation of melanomacrophage cells <sub>2</sub> . H & E, X 250. ....	59
(6)	Posterior Kidney, of Common carp naturally infected by <i>A. hydrophila</i> , showing focal infiltration of inflammatory cells <sub>1</sub> and edema <sub>2</sub> among the necrotic tubules <sub>3</sub> . H & E, X 250. ....	59
(7)	Swim bladder, of Common carp naturally infected by <i>A. hydrophila</i> , showing dilated and engorged blood vessels <sub>1</sub> as well as hemorrhage in the submucosa <sub>2</sub> . H & E, X 400. ....	60

- (8) Common carp, naturally infected by *A. hydrophila*, showing loss of scales<sub>1</sub>, congestion and hemorrhagic ulcer on the skin<sub>2</sub>. ..... 60
- (9) Liver, of Common carp naturally infected by *A. hydrophila*, showing advanced vacuolar degeneration and fatty changes with fat cyst formation<sub>1</sub> as well as necrosis of some hepatocytes<sub>2</sub>. H & E, X 400. .... 61
- (10) Hepatopaneas, of Common carp naturally infected by *A. hydrophila*, showing edema<sub>1</sub>, degenerated and necrosed pancreatic cells<sub>2</sub>. H & E, X 400. .... 61
- (11) Posterior kidney, of Common carp naturally infected by *A. hydrophila*, showing necrosis of renal tubule<sub>1</sub> and melanomacrophages<sub>2</sub> with leukocytes among its<sub>3</sub>. H & E, X 250. .... 62
- (12) Swim bladder, of Common carp naturally infected by *A. hydrophila*, showing edema<sub>1</sub>, necrosis and desquamation of epithelial cells<sub>2</sub> with mononuclear leukocytic cells<sub>3</sub> and melanomacrophage cells aggregations in the subepithelial tissue<sub>4</sub> as well as congestion in the submucosal blood vessels<sub>5</sub>. H & E, X 400. .... 62
- (13) Common carp, experimentally infected by *A. hydrophila*, showing severe congestion of the gills and internal organs<sub>1</sub> including the swim bladder espically its posterior chamber<sub>2</sub>. ..... 63
- (14) Swim bladder, of control<sub>1</sub>, naturally infected<sub>2</sub> and experimentally infected<sub>3</sub> Common carp with *A. hydrophila*, showing rudimentary and atrophied posterior chamber<sub>4</sub> of naturally and experimentally infected Common carp. .... 63
- (15) Common carp, experimentally infected by *A. hydrophila*, showing congestion<sub>1</sub> and focal hemorrhage on the swim bladder<sub>2</sub>, congestion of the kidneys<sub>3</sub> and hemopericardium<sub>4</sub>. .... 64

(16)	Swim bladder, of experimentally infected Common carp with <i>A. hydrophila</i> , showing caseous necrosis- <sub>1</sub> , congestion- <sub>2</sub> and mononuclear- <sub>3</sub> as well as melanomacrophage cells in mucosa and muscularis mucosa- <sub>4</sub> . H & E, X 400. ....	64
(17)	Swim bladder, of experimentally infected Common carp by <i>A. hydrophila</i> , showing marked necrosis of mucosa and submucosa- <sub>1</sub> with focal fibrous tissue proliferation in the bladder wall- <sub>2</sub> . H & E, X 250. ....	65
(18)	Swim bladder, of experimentally infected Common carp by <i>A. hydrophila</i> , showing focal fibrous tissue proliferation- <sub>1</sub> , in the bladder wall. Van Gieson's, X 250. ....	65
(19)	Swim bladder, of Common carp experimentally infected by <i>A. hydrophila</i> , showing congestion- <sub>1</sub> , edema- <sub>2</sub> and hemorrhage in mucosa and muscularis mucosa- <sub>3</sub> , which exhibited hyalinization- <sub>4</sub> . H & E, X 250. ....	66
(20)	Common carp, naturally infected by <i>Ps. fluorescens</i> , showing darkness of skin- <sub>1</sub> and abdominal distension- <sub>2</sub> . ....	66
(21)	Common carp, naturally infected by <i>Ps. fluorescens</i> , showing marked congestion in the internal organs- <sub>1</sub> , pale white foci on the liver- <sub>2</sub> . The posterior chamber of swim bladder congested- <sub>3</sub> and the anterior one white gray with hemorrhagic spots- <sub>4</sub> . ....	67
(22)	Gills, of Common carp naturally infected by <i>Ps. fluorescens</i> , showing congestion in the central venous sinus and secondary lamellae- <sub>1</sub> with epithelial hyperplasia and fusion of secondary lamellae- <sub>2</sub> . H & E, X 250. ....	67
(23)	Heart, of Common carp naturally infected by <i>Ps. fluorescens</i> , showing necrosis of myocardial muscle- <sub>1</sub> and leukocytic cells infiltration- <sub>2</sub> . H & E, X 400. ....	68
