## **Acknowledgment**

First, I thank "**Allah**" for granting me the power to accomplish this work.

I would like to express my sincere gratitude to my supervisor Prof. Dr. Nagwa Ali Sabri for her priceless advices and continuous support through the learning process of this master thesis.

Moreover, I would like to show appreciation to Dr. Lamiaa El Wakeel for her valuable scientific supervision, constructive advice and support.

Furthermore I would like to thank Dr. Amr Saad for introducing me to the topic and for the useful comments as well.

In addition, I like to thank the participants in my survey, who have willingly shared their precious time during the process of interviewing.

Besides, I would like to thank my dear colleagues specially Maha Mohamed and Menna El Shennawy for their help and support during this work.

Last but not the least, I would like to dedicate this work and express my deep appreciation to my parents, family, dear husband and his parents, to whom I am greatly indebted for their love and spiritual support throughout my life.

**Mai Ahmed Ahmed Faied**
