Faculty of Science

Ain Shams University

Electrical and Magnetic Properties of Nickel - Cobalt Nano - Ferrite

Thesis

*Submitted to Faculty of Science-Ain Shams University in
partial fulfillment for Degree of Master of Science in
Physics*

By

**Zeyad Muhammad Abdulhamid Abdulfattah
Ahmad**

Physics Department

Faculty of Science, Ain Shams University

Egypt

Supervisors

Prof. Dr. Ahmed Abd El-Ghani

Professor of Solid State Physics
Physics Department, Ain Shams University

Prof. Dr. Adel Abd El-Sattar

Professor of Solid State Physics
Physics Department, Ain Shams University

Asso. Prof. Atef Samir Darwish

Asso. Professor in Chemistry Department
Ain Shams University

2020

Degree: Master's degree in physics

**Title: Electrical and Magnetic Properties of
Nickel - Cobalt Nano - Ferrite**

**Name: Zeyad Muhammad Abdulhamid
Abdulfattah Ahmad**

Thesis Supervisors:

Prof. Dr. Ahmed Abd El-Ghani

Professor of Solid State Physics

Acknowledgement

Acknowledgement

First, I would like to thank **Allah** for giving me the strength, knowledge, ability and opportunity to undertake this research study and to persevere and complete it satisfactorily. Without his blessings, this achievement would not have been possible. I am asking **His** support for further success in my scientific work.

It was honor for me that I could be one of the students of **Prof. Dr. Ahmed Abd El-Ghani**, Physics Department, Faculty of Science, Ain Shams University, **Prof. Dr. Adel Abd El-Sattar**, Physics Department, Faculty of Science, Ain Shams University and **Dr. Atef Samir Darwish**, Chemistry Department, Faculty of Science, Ain Shams University for proposing and planning this investigation and their continuous encouragements, valuable suggestions, capable supervision and reading throughout the manuscript that have rendered the realization of this work to be possible. The valuable discussions and continuous assistance which were so willingly during this work will never be forgotten.

Special Thanks for Prof. Dr. Adel Abd El-Sattar for his kind support and help, his office was opened whenever I ran into a trouble spot or had a question about my research or writing. He consistently allowed this research to be my own work but steered me in the right direction whenever he thought I needed it.

I would like to express my deepest thanks to **Prof. Dr. Hisham Muhammad El-Sayed** and **Assoc. Prof. Dr. Waleed Ragab Abdur Rasheed Agami**, Physics Department, Faculty of Science, Ain Shams University for their kind helpful guidance and encouragement during the work.

I would like to deep thank my colleagues in the Magnetism Lab, Physics Department, **Dr. Heba Kahil**, **Dr. Muhammad Ashmawy**, **Muhammad Adel** and **Alaa Muhammad**.

Finally, I must express my very profound gratitude to my parents and my brothers for providing me with unfailing support and continuous encouragement throughout my years of study. Special thanks to my wife for her encouragements and supports during my master study. This accomplishment would not have been possible without them. Thank you.

Contents

List of Figures.....	I
List of Tables.....	V

Abstract.....	1
English Summery.....	3

Chapter 1: Theoretical background

1.1 Types of ferrites	5
1.2 Crystal Structure of Spinel Ferrites.....	6
1.3 Factors affect the Cation Distribution in Spinel Ferrites.....	9
1.4 Magnetic Ordering in Spinel Ferrites.....	10
1.5 Neel's Theory of Ferrimagnetism.....	11
1.6 Saturation Magnetization in Spinel Ferrites.....	13
1.7 Domain Theory of Ferromagnetic Materials.....	13
1.8 Magnetic Properties of Nanomaterials	18
1.9 Mechanisms of the Electrical Conduction in Ferrimagnetic Materials.....	20
1.10.1. Resistivity.....	21
1.10.2. Thermoelectric power.....	25

Chapter 2: Literature Survey

Co-ferrites Properties	26
Ni-ferrites Properties.....	30
Ni-substituted Co-ferrites Properties.....	35
Aim of the Work.....	41

Contents

Chapter 3: Experimental Techniques

3.1 Preparation of Samples.....	42
i. Sol-gel Citrate Method	42
ii. Hydrothermal Method	44
3.2 X-ray Diffraction Measurements.....	46
3.3 Porosity Measurement.....	46
3.4 Field Emission Scanning Electron Microscopy [EESEM] Analysis.....	47
3.5 Transmission Electron Microscopy [TEM] Analysis.	47
3.6 Energy Dispersive X-ray Analyses [EDX].....	48
3.7 Magnetization Measurements.....	48
3.8 The relative permeability and Curie temperature Measurements.....	50
3.9 DC electrical resistivity Measurements.....	51
3.10 Thermoelectric power Measurements.....	52

Chapter 4: Results and Discussion

4.1 Structure analysis.....	54
4.1.1 X-ray Diffraction	54
i. Lattice parameter calculation	57
ii. Lattice Strain and crystallite size.....	61
4.1.2 Transmission Electron Microscope [TEM]	63
4.1.3 Field Emission Scanning Electron Microscope [FESEM].....	64
4.1.4 Energy Dispersive X-ray Analyses [EDX].....	67
4.2 Magnetic Properties	70
4.2.1 Vibrating Sample Magnetometer [VSM] result.....	70
4.2.2 Relative permeability and Curie temperature.....	77
4.3 Electrical Properties	86

Contents

4.3.1 DC Electrical resistivity results.....	86
4.3.2 Thermoelectric power results.....	91
Conclusion.....	99
References.....	102
