كلية العلوم – قسم الكيمياء

Solvent effects on radiative and nonradiative processes for the charge-transfer states of donor-acceptor compounds and its use in water purification

Thesis Submitted by

Maha Abdel-Bary Taha Saeed

B.Sc.(Chemistry) 2009

For the requirement of M.Sc. Degree of Science in Chemistry

Prof. Dr. Ayman Ayoub Abdel-Shafi

Professor of Inorganic and photochemistry Chemistry, Faculty of Science, Ain Shams University

Prof. Dr. Ayman Helmy Kamel

Professor of Analytical Chemistry, Faculty of Science, Ain Shams University

Prof. Dr. Mohamed Ismail Abo-Eleneen

Professor of Organic Chemistry, Faculty of Science, ElMansoura University

To

Department of Chemistry

Faculty of Science, Ain Shams University

2022

Prof. Dr Mohamed Ismail Abo-Eleneen

Professor of Organic Chemistry, Faculty of Science, ElMansoura University

Head of Chemistry Department

Prof. Dr. Ayman Ayoub Abdel-Shafi

Acknowledgment

First and last thanks to Allah who gave me the power to go forward in a way illuminated with his merciful guidance.

I would like to express my thanks to **Prof. Dr. Ayman Ayoub Abdel-Shafi**, Professor of Inorganic Chemistry, Faculty of Science, Ain Shams University, for giving me the chance to be one of his students and for his generous advices, valuable discussions, useful guidance effective contributions, that helped me greatly, and gave me the confidence to express my ideas freely.

Prof. Dr. Ayman Helmy Kamel, Professor of Analytical Chemistry, Faculty of Science, Ain Shams University.

Prof. Dr. Mohamed Ismail Abo-Eleneen, Professor of Organic Chemistry, Faculty of Science, ElMansoura University, for giving me the chance to be one of his students and for his generous advices.

Maha Abd Elbary

كلية العلوم – قسم الكيمياء

Student Name : Maha Abdel-Bary Taha Saeed

Sientific Degree : M.Sc.

Faculty Name : Faculty of Science–Ain Shams University

Graduation Year: 2009

Granting Year : 2022

Contents

List of the figures.....	v
List of the tables.....	xi
List of the symbols.....	xii
List of the abbreviations.....	xv
Aim of the work.....	xvii
The Summary.....	xviii
Chapter I : Introdtion	1
1. 1.Introduction	1
1.1.1. Fluorescence	1
1.1.2. JABLONSKI DIAGRAM.....	1
1.1.3. The Stokes Shift.....	5
1.1.4. Fluorescence emission quantum yield.....	5
1.1.5. Time- resolved fluorescence lifetime measurements	6
1.1.6. The fluorescence decay.....	6
1.2. Intramolecular Charge Transfer Phenomenon (ICT)....	7

1.2.1. Twisted Intramolecular Charge Transfer (TICT).....	11
1.2.2. Planarized Intramolecular Charge Transfer (PICT).....	17
1.2.3. Rehybridized Intramolecular Charge Transfer (RICT) ..	18
1.2.4. Wagging Intramolecular Charge Transfer (WICT).....	19
1.3. Thiophene-based systems.....	20
1.4. Photophysical properties and solvent parameters.....	26
1.4.1. Lippert–Mataga equation	26
1.4.2. Solvent polarity parameter, E_T^N	27
1.4.3. Kamlet and Taft Model.....	28
1.4.4. Catalán Model.....	29
1.4.5. Laurence Model.....	29
Chapter II : Instrumentation and Methods.....	32
2.1 UV-visible spectroscopy.....	32
2.2 fluorescence emission.....	32
2.3 fluorescence lifetime	32
2.4 chemicals.....	32

Chapter III: Results and Discussion.....	34
3.1. Solvent effect on the photophysical properties.....	34
3.2. Photophysical properties and solvent parameters.....	42
3.3. Linear solvation energy relationships.....	47
3.3.1 Kamlet-Taft Model	47
3.3.2. Catalán Model.....	57
3.3.3. Laurence Model.....	66
3.4. Photophysical Properties.....	76
3.5. Conclusion.....	77
Chapter IV : Role of bithiophene compounds in water treatment.....	79
4.1. Global need of water.....	79
4.2. Singlet oxygen role in water treatment.....	80
4.3. Singlet oxygen photosensitizing materials.....	81
4.4. Thiophene as photosensitizing material.....	82
4.5. Experimental work.....	87
References.....	96

List of the Figures

Figure 1.1. : Jablonski diagram.....	4
Figure 1.2: potential energy surfaces for the ICT reaction versus donor twist co-ordinate in gas and solution phases.....	10
Figure 1.3: representation of TICT and the twisted CT state of the standard compound exhibiting TICT: N,NDimethylaminobenzonitrile (DMABN).....	13
Figure 1.4: conformational changes involved during ICT reaction in the proposed models: TICT, WICT, RICT and PICT.....	16
Figure 1.5: Aromatic vs. quinoid resonance forms of oligo- and polythiophenes.....	21
Figure 1.6: Chemical structure of bithiophene compounds studied...	25
Fig. 3.1: Normalized absorption and fluorescence emission spectra of MBTCH in different solvents.....	37
Fig. 3.2: Normalized absorption and fluorescence emission spectra of DMBTCH in different solvents.....	38
Fig. 3.3: Plot of the emission energy, ν_f , versus the solvent polarity parameter E_T^N	45

Fig. 3.4: Plot of the Stokes shift, $\Delta\nu$, versus the solvent polarity parameter E_T^N.....	46
Fig. 3.5: Calculated values according to Kamlet-Taft's linear solvation energy relationship for the emission energy, ν_f, versus their corresponding experimentally obtained data for MBTCH and DMBTCH.....	50
Fig. 3.6: Calculated values according to Kamlet-Taft's linear solvation energy relationship for of the Stokes's shift, $\Delta\nu$, versus their corresponding experimentally obtained data for MBTCH and DMBTCH.....	51
Fig. 3.7: Calculated values according to Kamlet-Taft's linear solvation energy relationship for the quantum yield, Φ_f, versus their corresponding experimentally obtained data for MBTCH and DMBTCH.....	52
Fig. 3.8: Calculated values according to Kamlet-Taft's linear solvation energy relationship for the fluorescence time, τ, versus their corresponding experimentally obtained data for MBTCH.....	53
Fig. 3.9: Calculated values according to Kamlet-Taft's linear solvation energy relationship for the fluorescence time, τ, versus their corresponding experimentally obtained data for DMBTCH.....	54
