In Vitro Study Evaluating the Effect of Proanthocyanidin Pre-treatment Protocols on resin/dentin Bond Strength and Composite Resin Color stability

Thesis

Submitted to Faculty of Dentistry,
Ain-Shams University in partial fulfilment of the requirements for
the Master's Degree in Dental Biomaterials

By

Hagar Mahmoud Abdel Latif Darwish

B.D.S (Ain-Shams University, 2010)

Instructor of Dental Biomaterials

Biomaterials Department

Faculty of Dentistry

Ain-Shams University

**Faculty of Dentistry
Ain-Shams University
2022**

Supervisors

Prof. Dr. Ghada Atef Alian

Professor of Dental Biomaterials

Biomaterials Department

Faculty of Dentistry

Ain-Shams University

Dr. Mohamed Mahmoud Kandil

Lecturer of Dental Biomaterials

Biomaterials Department

Faculty of Dentistry

Ain-Shams University

Acknowledgement

I would like to express my sincere respect, deepest thanks and highest appreciation to ***Prof. Dr. Ghada Atef Alian***, Professor of Dental Biomaterials, Faculty of dentistry, Ain-Shams University, for her guidance and precious support throughout this work. Her generosity and valuable experience will always be remembered with a lot of gratitude.

I would like to thank ***Dr. Mohamed Mahmoud Kandil***, lecturer of Dental Biomaterials, Faculty of Dentistry, Ain-Shams University, for his valuable advice and encouragement. His professionalism and experience helped me a lot. It was a great honor working under his supervision.

Dedication

To my beloved parents to whom I owe everything.

To my husband, Mohamed Magdy, for his endless support and encouragement throughout this work.

To my sweet little son Akram, the joy of my life, who gave me the strength to complete this work.

List of content

I.	Introduction	1
II.	Review of literature	4
1.	Dentin structure and morphology	4
1.1.	Type I collagen.....	6
1.2.	Proteoglycans	7
1.3.	Endogenous proteases	8
2.	Resin adhesive systems	9
2.1.	Classification of the adhesive systems	14
2.2.	Etch-and-rinse adhesives.....	14
2.3.	Self-etching adhesives.....	15
3.	Factors affecting the durability of the resin-dentin bond	16
3.1.	Hydrolytic degradation.....	16
3.2.	Enzymatic degradation.....	16
4.	Mechanisms of preventing degradation.....	17
4.1.	Collagen cross-linking.....	17
4.2.	MMPs inhibition	19
4.3.	Ethanol wet bond.....	20

5.	Composite resin restoration	20
6.	Methods of bond strength assessment	23
6.1.	Macro-bond strength tests	23
6.2.	Micro-bond strength tests.....	25
7.	Color evaluation	27
III.	Aim of the study.....	30
IV.	Material and Methods.....	31
V.	Results.....	48
1.	Micro-Tensile bond strength (MPa)	48
2.	Color change (ΔE) (A):	53
3.	Fracture mode analysis	61
VI.	Discussion	70
VII.	Summary and Conclusions.....	82
VIII.	References	85

List of tables

Table 1: The materials used in this study, their description, composition, and lot number.	31
Table 2: Effect of different variables and their interactions on Micro-Tensile bond strength (MPa).	48
Table 3: Mean $\pm$ standard deviation (SD) of Micro-Tensile bond strength (MPa) values for different groups within other variables	50
Table 4: Mean $\pm$ standard deviation (SD) of Micro-Tensile bond strength (MPa) values for different groups within other variables.	52
Table 5: Different variables' effect on color change (ΔE).	53
Table 6: Mean $\pm$ standard deviation (SD) of color change (ΔE) values for different groups	54
Table 7: Mean $\pm$ standard deviation (SD) of color change (ΔE) values for different intervals	55
Table 8: Mean $\pm$ standard deviation (SD) of color change (ΔE) values for different groups within other variables	57
Table 9: Mean $\pm$ standard deviation (SD) of color change (ΔE) values for different groups within other variables	58
Table 10: Mean $\pm$ standard deviation (SD) of color change (ΔE) values for different groups	60

Table 11: Frequencies (n) and percentages (%) of mode of failure in different groups.....	63
Table 12: Frequencies (n) and percentages (%) of mode of failure in before and after aging.....	65
Table 13: Frequencies (n) and percentages (%) of mode of failure in different pretreatments before and after aging.....	66
Table 14: Frequencies (n) and percentages (%) of mode of failure within each pretreatment.	68

List of figures

Figure 1: Materials used in the study; a: Meta Etchant (Metabiomed CO.LTD), b: Filtek Z350XT, universal A3 Body Shade, (3M ESPE, Saint Paul, Minnesota, USA, c: Adapter single bond, (3M ESPE, Saint Paul, Minnesota, USA). d: Grape seed extract 100mg (Country life,LLC, Hauppaug, USA).....	32
Figure 2: Steps of preparations; a: showing the mixing of the prepared concentration on the magnetic stirrer. b: filtration through filter paper. c: prepared 2 PA concentrations (6.5% and 10%) kept in dark containers.	33
Figure 3: A photograph showing the digital pH meter containing the prepared solution.....	33
Figure 4: A photograph showing sound clean molar with no cracks or hard deposits after ultrasasonic cleaning.	36
Figure 5: A photograph showing teeth preparation; a: (Isomet, Buhler, USA), b: removal of occlusal enamel.	36
Figure 6: Steps of Group 1 preparation; 1: etching, 2: bonding, 3: composite built up, 4: celluloid matrix placement, 5: glass slide placement, 6: Calibration of the light cure using a radiometer.	38
Figure 7: Photographs of group 2 preparation; 1: application of 6.5%PA, 2: blotting the surface with cotton pellet after washing.	38
Figure 8: A photograph showing group 3 preparation after PA application and no washing	40

Figure 9: A photograph showing group 5 preparation after PA application with no wash	40
Figure 10: Showing teeth sectioning in x axis perpendicular to their long axis.	41
Figure 11: Showing teeth sectioning in y axis perpendicular to their long axis.	42
Figure 12: Photographs Showing the dimensions of the beams.	42
Figure 13: A photograph showing testing of the specimen.	43
Figure 14: Stereomicroscope Olympus Stereozoom SZ40, Tokyo, Japan. ..	44
Figure 15: Specimens grouping for color testing.....	45
Figure 16: Spectrophotometer (Cary 5000, Agilent technologies, USA)....	45
Figure 17: Bar chart showing average Micro-Tensile bond strength (MPa) values for different groups within other variables.	51
Figure 18: Bar chart showing average Micro-Tensile bond strength (MPa) values for different groups.	53
Figure 19: Bar chart showing average color change (ΔE) values for different groups.....	55
Figure 20: Bar chart showing average color change (ΔE) values for different intervals.....	56
Figure 21: Bar chart showing average color change (ΔE) values for different groups within other variables.....	57
