Development of analytical methods for determination and elimination of some strobilurin pesticides in environmental samples

Thesis

Presented for the partial fulfillment of the degree of

Philosophy Doctorate in Pharmaceutical Sciences

(Pharmaceutical Analytical Chemistry)

By

Ahmed Ibrahim Abdel Wanis Sheta

M.SC. Pharmaceutical Sciences 2015

Faculty of Pharmacy, Ahram Canadian University

Under the supervision of

Prof. Dr. Amira Mabrouk El-Kosasy

Professor of Pharmaceutical Analytical Chemistry,

Faculty of Pharmacy, Ain Shams University

Prof. Dr.

Shereen Moustafa Tawakkol

Professor and Head of Department

of Pharmaceutical Analytical Chemistry,

Faculty of Pharmacy, Ahram Canadian University

Prof. Dr.

Miriam Farid Ayad

Professor of Pharmaceutical Analytical Chemistry,

Faculty of Pharmacy, Ain Shams University

Assoc. Prof. Dr. Ahmed Salah Fayed

Associate professor of Analytical Chemistry,

Faculty of Pharmacy, Cairo University

Faculty of Pharmacy

Ain Shams University

2022

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَنَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ

الْحَكِيمُ ﴿٢٢﴾

سورة البقرة (٣٢)

Acknowledgment

All thanks and gratitude to Allah, who has given me the strength and will to finish this work. Words and thanks will never suffice to praise Allah for his mercy, blessing and guidance that lead me throughout the tough times.

It is an honor for me to express my sincere thanks and grateful appreciation to **Prof. Dr. Amira Mabrouk El-Kosasy**, Professor of Pharmaceutical Analytical Chemistry, Faculty of Pharmacy, Ain Shams University, for her valuable suggestions, expert supervision, constructive comments, patience, unlimited support, generous assistance, and for the extensive effort, time, energy, and guidance during the supervision of this work. I will always be proud that my thesis was under her supervision.

I also wish to express my gratitude and thanks to **Prof. Dr. Shereen Moustafa Tawakkol**, Professor of Pharmaceutical Analytical Chemistry, and head of pharmaceutical chemistry department, Faculty of Pharmacy, Ahram Canadian University, for her kind supervision and research guidance. She enriched me with spiritual power, capabilities, and enthusiasm to achieve goals I have been longing for.

Moreover, I would like to thank deeply **Prof. Dr. Miriam Farid Ayad**, Professor of Pharmaceutical Analytical Chemistry, Faculty of Pharmacy, Ain Shams University, for her fruitful help and advice, continuous support, and sincere encouragement throughout this work.

Finally, I would like to thank **Assoc. Prof. Dr. Ahmed Fayed**, Associate Professor of Analytical Chemistry, Cairo University, for his effort in practical work and revision of this thesis.

I am thankful to all my professors, lecturers, colleagues, and technicians who helped me with their support and encouragement, especially **Assoc. Prof. Dr. Ahmed Hemdan**, PhD Analytical Chemistry in Ahram Canadian Uni., **Samah Mamdouh**,

Analyst in NODCAR, and ***Dr. Hassan Medhat***, PhD Pharmaceutics in Atomic Energy Commission.

Last but not least, without the support and encouragement of my family; my father, my mother, my brother and my sisters, I would not be able to complete my work, also I could not forget my wife; ***Dr. Samar Mamdouh***, PhD of Pharmaceutics, and my sons “YOUSSEF & YAHIA” who helped me a lot, encouraged me, and without their assistance, many things would not be in its present form.

To all of you,

Thank you

Ahmed I. Sheta

2022

Approval Sheet

Title of the Philosophy Doctorate Thesis in Pharmaceutical Sciences

(Pharmaceutical Analytical Chemistry)

**Development of analytical methods for determination and elimination of
some strobilurin pesticides in environmental samples**

Name of the candidate:

Ahmed Ibrahim Abdel Wanis Sheta

Submitted to:

Department of Pharmaceutical Analytical Chemistry, Faculty of Pharmacy, Ain
Shams University, 2022

Committee in Charge:

1. Prof. Dr. Amira Mabrouk El-Kosasy

Professor of Pharmaceutical Analytical Chemistry,
Faculty of Pharmacy, Ain Shams University.

2. Prof. Dr. Mohamed Refaat Elghobashy

Professor of Analytical Chemistry,
Faculty of Pharmacy, Cairo University and
Dean of Faculty of Pharmacy, October 6 University.

3. Prof. Dr. Maha Mahmoud Abou El-alamina

Professor and Head of Department of Analytical Chemistry,
Faculty of Pharmacy, Helwan University.

LIST OF ABBREVIATIONS

ALG	Alginate
AZX	Azoxystrobin
BDD	Boron-doped diamond
BOS	Boscalid
CA	Citric acid
CDs	Carbon dots
CHS	Chitosan
CHS/ALG	Chitosan/ calcium alginate beads
CMC	Carboxymethyle cellulose
CN	Carbon nanotubes
DAD	Diode array detection
DFC	Difenoconazole
DOP	Dioctyl phthalate
d-SPE	Dispersive solid-phase extraction
ECD	Electron capture detector
FP	Fluorescence polarization
GO	Graphene oxide
GQD	Graphene quantum dots
IF	Imprinting factor
KRE	Kresoxim-methyl
LC50	Median lethal concentration
LD50	Oral median lethal dose
MA	Methacrylic acid
mAb	Monoclonal antibody
MIP	Molecularly imprinted polymer
MIR	Molecularly imprinted resin
MMFF	Minimized functional monomers

List of Abbreviations

MOL	Molybdate
MRL	Maximum residue level
MRM	Multiple reaction monitoring
NIP	Non-molecularly imprinted polymer
NIR	Non-molecularly imprinted resin
PA	Peak area
PAR	Peak area ratio
PIC	Picoxystrobin
PL	L- α -phosphatidylcholine
PSA	Primary secondary amine
PYR	Pyraclostrobin
QoI	Quinone outside inhibitor
QuEChERS	Quick, Easy, Cheap, Effective, Rugged, and Safe
REN	Ammonium renickate
SPME	Solid-phase micro-extraction
SWCNTs	Single walled carbon nanotubes
TOF MS	Time-of-flight mass spectrometer
TRE	Trehalosomes
TRI	Trifloxystrobin
TUN	Tungstate
β CD	2-hydroxypropyl- β -cyclodextrin

LIST OF TABLES.....	XV
LIST OF FIGURES.....	XVII
PREFACE.....	XIX
SUMMARY	XX
PART I: INTRODUCTION TO STROBILURIN PESTICIDES.....	1
Section A: General introduction.....	2
I.A.1.Pesticides	3
I.A.2.Strobilurins	3
I.A.2.1. Invention.....	3
I.A.2.2. Physical properties and chemical structures	4
I.A.2.3. Combinations	4
I.A.2.4. Mode of action	5
I.A.2.5. Spectrum of activity	5
I.A.3. Toxicity profile.....	5
I.A.4. Elimination from environment	8
I.A.4.1. Biological elimination	9
I.A.4.2. Physico-chemical elimination	9
I.A.4.3. Physical elimination	9
I.A.4.4. Chemical elimination	10
I.A.4.5. Non-thermal elimination	10
I.A.4.6. Pesticide transformation.....	10
Section B: Literature review.....	15
I.B.1. Chemical structures and physical properties of the studied strobilurins and their combined fungicides	16
I.B.1.1. Azoxystrobin (AZX)	16
I.B.1.2. Trifloxystrobin (TRI).....	16
I.B.1.3. Pyraclostrobin (PYR)	17
I.B.1.4. Combined fungicides.....	18
I.B.2. Methods of analysis	19
I.B.2.1. Chromatographic determination of strobilurins in environmental samples	19
I.B.2.1.1. Chromatographic determination of strobilurins in soil...19	
I.B.2.1.2. Chromatographic determination of strobilurins in atmospheric air	24

I.B.2.1.3. Chromatographic determination of strobilurins in water	25
I.B.2.1.4. Chromatographic determination of strobilurins in house dust	29
I.B.2.1.5. Chromatographic determination of strobilurins in cultivated crops.....	30
I.B.2.1.6. Chromatographic determination of strobilurins in processed food.....	34
I.B.2.2. Electrochemical determination of strobilurins in environmental samples	39
I.B.2.3. Spectrophotometric method for determination of strobilurins	42
I.B.2.4. Immunoassay methods for determination of strobilurins.....	43
I.B.2.5. Fluorimetric methods for determination of strobilurins.....	45
I.B.2.6. Other methods for determination of strobilurins.....	46
 PART II: ENHANCED POTENTIOMETRIC METHODS FOR DETERMINATION OF AZOXYSTROBIN RESIDUES IN TREATED CUCUMBER, ORANGE JUICE AND CANNED FOOD	 48
Section A: Introduction	49
II.A.1. Ion selective electrode (ISE).....	50
II.A.2. Ionophores.....	50
II.A.2.1. β -Cyclodextrin (β CD)	50
II.A.2.2. Molecularly imprinted polymers (MIP).....	51
II.A.3. Water channels	51
II.A.3.1. Carbonaceous matters	52
II.A.3.1.1. Graphene oxide (GO):	52
II.A.3.1.2. Graphene quantum dots (GQD):.....	52
II.A.3.1.3. Carbon dots (CD):.....	53
II.A.3.1.4. Carbon nanotubes (CN):	53
II.A.3.2. Trehalosomes	54
 Section B: Nano carbon dots water channels for potentiometric determination of azoxystrobin via ionophoric based sensors, and their application in treated cucumber.....	 55
II.B.1. Apparatus.....	56
II.B.2. Chemicals and reagents	56
II.B.3. Procedures	58
II.B.3.1. Synthesis of azoxystrobin molecularly imprinted polymers (MIP).....	58

II.B.3.2. Synthesis of carbon dots (CD)	59
II.B.3.3. Construction of membrane sensors	59
II.B.3.4. Sensor calibration.....	60
II.B.3.5. Effect of pH.....	60
II.B.3.6. Sensor selectivity	60
II.B.3.7. Determination of azoxystrobin in treated cucumber.....	61
II.B.4. Results and discussion.....	61
II.B.4.1. Azoxystrobin molecularly imprinted polymers (MIP)	61
II.B.4.2. Carbon dots (CD)	63
II.B.4.3. Sensor calibration.....	64
II.B.4.4. Choosing optimal ion exchanger.....	65
II.B.4.5. Effect of pH.....	66
II.B.4.6. Sensor selectivity	66
II.B.4.7. Determination of AZX in treated cucumber	66
Section C: Potentiometric determination of azoxystrobin in orange juice, via trehalosomes-based sensor.....	82
II.C.1. Apparatus.....	83
II.C.2. Chemicals and reagents	83
II.C.3. Procedures	83
II.C.3.1. Green synthesis of Trehalosomes (TRE)	83
II.C.3.2. Construction of membrane sensor.....	83
II.C.3.3. Sensor calibration.....	84
II.C.3.4. Effect of pH.....	84
II.C.3.5. Sensor selectivity	84
II.C.3.6. Determination of azoxystrobin in orange juice.....	84
II.C.4. Results and discussion.....	85
II.C.4.1. Trehalosomes (TRE)	85
II.C.4.2. Sensor calibration.....	86
II.C.4.3. Effect of pH.....	86
II.C.4.4. Sensor selectivity	87
II.C.4.5. Determination of AZX in orange juice	87
Section D: Potentiometric determination of azoxystrobin in canned food via carbonaceous water channels.....	93
II.D.1. Apparatus	94
II.D.2. Chemicals and reagents.....	94
II.D.3. Procedures	94
II.D.3.1. Synthesis of graphene oxide (GO).....	94
II.D.3.2. Synthesis of graphene quantum dots (GQD)	95
II.D.3.3. Construction of membrane sensors.....	95
II.D.3.4. Sensor calibration.....	95
II.D.3.5. Effect of pH.....	95

II.D.3.6. Sensor selectivity	96
II.D.3.7. Determination of AZX in canned marketed vegetable product (tomato paste)	96
II.D.4. Results and discussion	96
II.D.4.1. Synthesized carbonaceous materials (GO, GQD)	96
II.D.4.2. Sensors calibration	97
II.D.4.3. Effect of pH.....	98
II.D.4.4. Sensor selectivity	98
II.D.4.5. Determination of AZX in tomato paste	99
Section E: Appendix	113
II.E.1. Membrane sensors	114
II.E.1.1. Ionophores	114
II.E.1.2. Water channels	114
II.E.2. Sensors membrane morphology	115
II.E.3. Effect of pH	116
II.E.4. Sensor selectivity	116
II.E.5. Determination of AZX in environmental samples	117
II.E.6. Statistical analysis	117
 PART III: LIQUID CHROMATOGRAPHY/ MASS SPECTROMETRY (LC/MS) FOR DETERMINATION OF CERTAIN STROBILURIN PESTICIDES IN SOIL	 125
Section A: Introduction	126
III.A.1. Residual pesticide analysis	127
III.A.2. Soil sample preparation	127
III.A.3. QuEChERS extraction method	128
Section B: Liquid chromatography/ mass spectrometric determination of pyraclostrobin and boscalid in soil	130
III.B.1. Chemicals and reagents.....	131
III.B.2. Apparatus	131
III.B.3. Chromatographic conditions.....	131
III.B.4. Procedures	132
III.B.4.1. Standard solutions and method development	132
III.B.4.2. QuEChERS extraction method	132
III.B.4.3. Assay method validation.....	133
III.B.4.4. Application on real soil sample	135
III.B.5. Results and discussion	135
III.B.5.1. Standard solutions and method development	135
III.B.5.2. QuEChERS extraction method	135

III.B.5.3. Method validation	136
III.B.5.4. Application on real soil sample	138
Section C: Liquid chromatography/ mass spectrometric determination of trifloxystrobin in soil.....	147
III.C.1. Chemicals and reagents.....	148
III.C.2. Apparatus	148
III.C.3. Chromatographic conditions.....	148
III.C.4. Procedures.....	148
III.C.4.1. Standard solutions and method development	148
III.C.4.2. QuEChERS extraction method	148
III.C.4.3. Method validation	149
III.C.4.4. Application on real soil samples.....	149
III.C.5. Results and discussion	150
III.C.5.1. Standard solutions and method development	150
III.C.5.2. QuEChERS extraction method	150
III.C.5.3. Method validation	150
III.C.5.4. Application on real soil samples.....	151
Section D: Appendix	156
PART IV: SPECTROPHOTOMETRIC PROCEDURE FOR MEASURING ELIMINATION EFFICIENCY OF STROBILURINS FROM WASTEWATER.....	160
Section A: Introduction.....	161
IV.A.1. Elimination of strobilurins.....	162
IV.A.1.1. Biological elimination of strobilurins	162
IV.A.1.2. Physical elimination of strobilurins	162
IV.A.1.3. Chemical elimination of strobilurins.....	163
IV.A.2. Spectrophotometric determination of strobilurins.....	163
Section B: Spectrophotometric determination of azoxystrobin, pyraclostrobin and trifloxystrobin.....	164
IV.B.1. Chemicals and reagents	165
IV.B.2. Apparatus	165
IV.B.3. Procedure	165
IV.B.4. Method validation.....	165
IV.B.4.1. Linearity and range	165
IV.B.4.2. Accuracy	166
IV.B.4.3. Precision	166

IV.B.4.4. Limit of detection (LOD) and limit of quantitation (LOQ)	166
IV.B.5. Results and discussion	166
IV.B.5.1. Linearity and range	166
IV.B.5.2. Accuracy	167
IV.B.5.3. Precision	167
IV.B.5.4. LOQ and LOD	167
IV.B.5.5. Discussion	167
Section C: Spectrophotometric evaluation of azoxystrobin and pyraclostrobin physical elimination from wastewater	170
IV.C.1. Chemicals and reagents	171
IV.C.2. Apparatus	171
IV.C.3. Procedures	171
IV.C.3.1. Preparation of calcium alginate beads (ALG)	171
IV.C.3.2. Preparation of chitosan/ calcium alginate beads (CHS/ALG)	171
IV.C.3.3. Synthesis of molecularly imprinted polymers (MIPs)	172
IV.C.3.4. Synthesis of molecularly imprinted resin (MIR)	172
IV.C.3.5. Elimination procedures	172
IV.C.3.6. Application on real wastewater samples	174
IV.C.4. Results and discussion	175
IV.C.4.1. Characterization of adsorbents	175
IV.C.4.2. Optimization of elimination conditions	176
IV.C.4.3. Evaluation procedures	177
IV.C.4.4. Application on real samples	178
IV.C.4.5. Discussion	178
IV.C.5. Conclusion	180
Section D: Spectrophotometric determination of trifloxystrobin to follow up its photodegradation, in wastewater, catalyzed by molecularly imprinted resin	187
IV.D.1. Chemicals and reagents	188
IV.D.2. Apparatus	188
IV.D.3. Procedures	188
IV.D.3.1. Synthesis of molecularly imprinted resin (MIR)	188
IV.D.3.2. Synthesis of graphene oxide (GO)	188
IV.D.3.3. Elimination procedures	188
IV.D.3.4. Evaluation procedures	189
IV.D.3.5. Application on real wastewater samples	189
IV.D.4. Results and discussion	189
IV.D.4.1. Characterization of MIR and GO	189
IV.D.4.2. Evaluation procedures	190

IV.D.4.3. Application on real samples	190
IV.D.4.4. Discussion	190
IV.D.5. Conclusion	190
Section E: Appendix	192
IV.E.1. Spectrophotometric method of analysis.....	193
IV.E.2. Natural adsorbents	193
IV.E.3. Synthetic adsorbents	194
IV.E.3.1. Molecularly imprinted polymers	194
IV.E.3.2. Molecularly imprinted resins	194
IV.E.4. Graphene oxide	195
PART V: GENERAL DISCUSSION	197
V.1. Analytical methods for determination of azoxystrobin.....	198
V.2. Analytical methods for determination of pyraclostrobin	199
V.3. Analytical methods for determination of trifloxystrobin.....	200
V.4. Analytical methods for determination of boscalid.....	200
