A Comparative Analysis of Shear Bond Strength and Translucency of Two Different Lithium Disilicate Materials

Thesis

*Submitted to the Faculty of Dentistry - Ain Shams University
for Partial Fulfillment of the Requirements for Master's Degree in
Fixed Prosthodontics*

By

Gamaleldin Mohamed Elbouchy

(B.D.S., Ain Shams University - 2011)

**Faculty of Dentistry
Ain Shams University
2022**

SUPERVISORS

Prof. Dr. Tarek Salah el Din Morsi

Professor of Fixed Prosthodontics Department

Faculty of Dentistry

Ain Shams University

Dr. Ahmed Ezzat Sabet

Associate professor and Head of Fixed Prosthodontics Department

Faculty of Dentistry

British University in Egypt (BUE)

Acknowledgement

First and forever thanks to God for all his kindness and grace for granting me the patience and enthusiasm to accomplish this work,

*No words could be sufficient for expressing my supervisor **Prof. Dr. Tarek Salah**, Professor and head of Fixed Prosthodontics Department, Faculty of Dentistry, Ain-Shams University for his immense support, fruitful criticism and infinite encouragement, making it possible to carry this work forward.*

*To **Dr. Ahmed Ezzat Sabet**, Associate Professor of Fixed Prosthodontics, Faculty of Dentistry, Ain-Shams University, for his endless encouragement, patience and support during the work,*

Also, A very special gratitude goes to all the staff members of Fixed Prosthodontics, Faculty of Dentistry, Ain-Shams University.

Dedication

This work is dedicated to

My Beloved Parents

A special feeling of gratitude to my beloved parents, who have been my source of inspiration and gave me strength when I thought of giving up, who continually provide their moral, spiritual, emotional, and financial support.

My lovely wife and my beautiful son

who have supported me throughout my entire work and will always appreciate their unending inspiration.

My Friends and Colleagues

who provided me with extensive personal and professional support to finish this study.

LIST OF TABLES

Table No.	Title	Page
1	Factorial Design of Samples	42
2	Firing Program for E-max	52
3	Firing Program for Gc	53
4	Color change test results (Mean $\pm$ SDs) as function of ceramic material and thickness	66
5	Translucency parameter test results (Mean $\pm$ SDs) as function of ceramic material and thickness.....	68
6	Comparison of shear bond strength test results (Mean $\pm$ SD) between both material groups	70
7	Frequent distribution of failure modes scores (%) for both groups.....	71

LIST OF FIGURES

Figure no.	Title	Page
1	CIELAB Color Space	25
2	IPS e.max Press Ingot.....	37
3	GC Initial LiSi Press Ingot	37
4	Wax-On Wax Blank	38
5	Porcelain Etchant.....	38
6	Porcelain primer	39
7	Light Cure Self Adhesive Resin Cement	39
8	Phosphoric acid etchant.....	40
9	Prime and Bond	40
10	0.4mm Disc Shaped Model on 3D Builder Software.....	43
11	0.8mm Disc Shaped Model on 3D Builder Software.....	44
12	1.2mm Disc Shaped Model on 3D Builder Software.....	44
13	VHF CAM 5-S1 IMPRESSION Milling Machine.....	45
14	Wax Blank Mounted in the Milling Machine Chamber.....	46
15	Nesting of the Imported STL 3D Discs on the Virtual Wax Blank	46
16	Discs immediately after completion of milling.....	47
17	Finished Milled Wax Discs Representing Different Thicknesses	47
18	Verifying Disc Thickness Using Digital Caliper	48

Figure no.	Title	Page
19	Wax Discs Sprued & Secured to the Investment Ring Plastic Base.....	48
20	Pouring of Investment Material.....	49
21	Burn-out Furnace.....	50
22	Investment Ring Inside Burn-out Furnace	50
23	Ingot Placed in the Hot Investment Ring	51
24	Programat E3010 Press Furnace.....	52
25	Marking the Length of the Alox Plunger	53
26	Divesting Using Separating Disc	54
27	Removal of Investment around Discs using Glass Beads.....	54
28	Discs Sprue Separation.....	55
29	Custom made split metallic copper mold	56
30	Bond application.....	57
31	Light cure of the bond	57
32	Ceramic disc etching by hydrofluoric acid.....	58
33	Silane application to ceramic discs	58
34	Static loading device used for cementation.....	59
35	Reflective Spectrophotometer with standard black and white blocks for Color and TP measurement	60
36	Universal testing machine	62
37	Shear bond strength test specimen mounted onto testing machine	62
