“Clinical and Radiographic Evaluation of Turmeric, Thymus Vulgaris, Nigella Sativa and Aloe Vera as Pulpotomy Medicaments in Primary Teeth”

A Randomized Controlled Study

Thesis

Submitted in partial fulfillment of the requirements of
Doctorate Degree in Pediatric Dentistry and Dental Public
Health

Presented by:

Rana Mohamed Abd El Raouf Sami Sharaf

M.Sc., Faculty of Dentistry, Ain Shams University, 2017

B.D.S., Faculty of Dentistry, Ain Shams University, 2010

Assistant Lecturer at the Department of Pediatric Dentistry
and Dental Public Health, Faculty of Dentistry, Ain Shams
University

E-mail: ranasharaf@hotmail.com

Faculty of Dentistry
Ain Shams University

Supervisors

Professor Dr. Noha Samir Kabil

Professor of Pediatric Dentistry and Dental
Public

Health Department, Faculty of Dentistry
Ain Shams University and British University

Dr. Basma Gamal Awad

Lecturer, Pediatric Dentistry and Dental
Public Health Department, Faculty of
Dentistry

Ain Shams University

Professor Dr. Marwa Saad Fathi

Professor of Medical Microbiology and
Immunology, Faculty of Medicine, Ain
Shams University

2022

Dedicated to

My Mother

*Who always inspires me with her love, care and
prayers.*

My Father

*Who taught me that dedication and hard work are
the essentials for a successful life.*

My dear Husband

*For his love, patience, tremendous support, and
help. Without him this thesis wouldn't have been
possible.*

And My sister

*Who was always there for me through good and
hard times.*

My daughter and son

Who are the key to my heart

Acknowledgement

Above all, my greatest praises and thanks is to GOD almighty, for the blessings, kindness, strength, and courage needed to pursue and accomplish this work. Nevertheless, completing this thesis required the unceasing support and motivation of many whom I would like to personally acknowledge.

I extend my deepest gratitude to my supervisors:

Professor Dr. Noha Kabil for her countless advice, support, and unlimited encouragement throughout my professional career.

Dr. Basma Gamal for her endless support who added a lot to me not only from a professional level but also from a personal one. And also, for the comprehensive advice that made this work come to existence.

Professor Dr. Marwa Fathi for her valuable time, and effort.

I would like to thank my dear professors, colleagues and staff members of Pediatric Dentistry and Dental Public Health Department, Faculty of Dentistry, Ain Shams University, for their great support, encouragement, and cooperation. Also, I would like to express my appreciation to the children who participated in this study and their parents.

Last, but certainly not least, to all my friends and family who contributed in one-way or another to this study. To all of them, please accept my sincere and profound gratitude

List of Contents

Dedication

Acknowledgment

List of Tables	I
-----------------------------	----------

List of Figures	II
------------------------------	-----------

List of Abbreviations	VI
------------------------------------	-----------

Introduction	1
---------------------------	----------

Review of Literature	3
-----------------------------------	----------

1. Dental Caries

1.1 Epidemiology of Dental Caries

1.2 Mechanism of Dental Caries

2. Pulpotomy

2.1 Pulpotomy Procedure

2.2 Restoration after Pulpotomy

3. Pulp Medications

3.1 Formocresol

3.2 Ferric sulfate, Mineral trioxide aggregate and calcium hydroxide

3.3 Natural Materials

3.3.1 Turmeric

3.3.2 Thymus Vulgaris

3.3.3 Nigella Sativa

3.3.4 Aloe Vera

4. Follow up

Aim of the Study	33
-------------------------------	-----------

Materials and Methods	34
------------------------------------	-----------

I. Phase One (In-Vitro study)

1. Materials Used

2. Methodology

2.1 Ethical Approval

2.2 Preparation of the Plant Extracts

2.3 Preparation of Stock Solutions from the Plant Extracts

2.4 Bacterial Strains and Culturing Condition

2.5 Determine the Minimum Inhibitory Concentration of the Extracts

II. Phase Two (In-Vivo study)

1. Materials Used

2. Methodology

2.1 Study Design

2.2 Sample Size Calculation

2.3 Ethical Approval

2.4 Informed Consent and Assent

2.5 Randomization

2.6 Blinding

2.7 Study Setting

2.8 Study Population

3. Clinical Procedure

4. Follow Up

5. Statistical Analysis

Results..... 79

I. In-Vitro Results

1. Determination of the MIC

II. In-Vivo Results

1. Demographic Data

2. Clinical Evaluation
 - 2.1) Intergroup Comparisons
 - 2.2) Intragroup Comparisons
 - 2.3) Clinical Outcome
3. Radiographic Evaluation
 - 3.1) Intergroup Comparisons
 - 3.2) Intragroup Comparisons
 - 3.3) Radiographic Outcome
