Wear of Different CAD/CAM Ceramic Materials with Various Surface Finishing Protocols

(In vitro Study)

*Thesis submitted to the Faculty of Dentistry
Ainshams University*

For

*Partial Fulfillment of the Requirements of
Doctorate degree in Fixed Prosthodontics*

By:

Hesham Samir Saad Sabet

B.D.Sc, Ainshams University-2007

M.D.Sc, Ainshams University-2015

2022

Supervisors:

Prof.Dr. Tarek Salah Morsi

*Professor of Fixed Prosthodontics, Faculty of
Dentistry, Ain Shams University*

Prof.Dr. Ashraf Hussein Sherif

*Professor of Fixed Prosthodontics, Faculty of
Oral and Dental medicine, Future University in
Egypt*

Dr. Ahmed Ezzat Sabet

*Associate professor of Fixed Prosthodontics,
Faculty of Dentistry, Ain Shams University*

Faculty of Dentistry

Ainshams University

2022

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

{وَقُلْ رَبِّ زِدْنِي عِلْمًا}

صدق الله العظيم

سورة طه (آية 114)

Acknowledgement

*First of all, I'd like to thank **GOD** , for all his blessings I receive on daily basis , & for giving me the strength to keep going and never give up.*

*I would like to express my deepest gratitude to my Supervisor and Mentor **Prof. Dr.Tarek Salah Morsi** Professor of fixed Prosthodontics, Faculty of Dentistry, Ainshams University, who guided me not only throughout this research but also throughout my whole career as he has always been my role model. I would also like to thank him for his patience, sincere motivation, and his profound belief in me, & for providing me with the essential aspects of scientific thinking which played a major role in getting through this study.*

*I would like to show my true appreciation for our great professor and father figure **Prof. Dr.Ashraf Hussein Sherif** Professor of Fixed Prosthodontics and Vice dean, Faculty of Oral and Dental Medicine Future*

University in Egypt. He has always been a great support. I gratefully acknowledge his guidance, he always provided me with his insightful comments and suggestions that served as a main contributor to the completion of this research.

*I would also like to extend my sincere thanks to my thoughtful supervisor and elder brother **Assoc. Prof. Dr. Ahmed Ezzat Sabet**, Associate Professor of Fixed Prosthodontics, Faculty of Dentistry, Ainshams University. His kindness, valuable advice, help and effort, can never be underestimated. His constant belief that I would finish this work gave me unwavering support to get my task done the best way possible.*

Last but not least, deepest thanks to my dear professors, colleagues and staff members of Fixed Prosthodontics Department, Faculty of Oral and dental medicine, Future University in Egypt for their great encouragement and sincere support.

Dedication

*I would like to dedicate this
work to*

*My Beautiful Family
My Parents, My Sister
The Soul of my beloved
Grandmother*

&

My dear friends

List of Figures

Figure (1): KATANA (UTML) blanks	38
Figure (2): KATANA (ML) blanks	40
Figure (3): Celtra TM Duo Blocks.....	41
Figure (4): CERABIEN TM ZR FC Paste Stain (Clear Glaze)	42
Figure (5): DENTSPLY universal overglaze (high flu).....	42
Figure (6): DIACERA kit for polishing zirconia and alumina	43
Figure (7): DIAPRO kit for polishing lithium silicates	43
Figure (8): Low-speed cutting saw (Isomet 4000).....	46
Figure (9): Zirconia blanks sectioned using a low-speed cutting saw under water irrigation	47
Figure (10): Zirconia blank sectioned into a series of blocks	47
Figure (11): Block fixed to an attachment to be cut further into smaller blocks	48
Figure (12): Final block secured to the attachment	48
Figure (13): Zirconia block is cut into slices.....	49
Figure (14): Slices positioned into the refractory sagger tray filled with the sintering alumina beads.....	49
Figure (15): Celtra DUO block is cut into slices.....	51
Figure (16): Verification of the specimens dimensions by digital caliper	52
Figure (17): Specimens glazed with CERABIEN TM ZR FC Paste Stain.....	55
Figure (18): Specimens glazed with DENTSPLY universal overglaze	56
Figure (19): 3-shape Trios 3 Scanner.....	57
Figure (20): Angle measurement of the selected premolar cusps	58
Figure (21): Width of the selected premolar cusps.....	58
Figure (22): Premolar cut by Isomet under coolant	59
Figure (23): Premolar Sectioned longitudinally to two halves.....	59
Figure (24): Digital microscope with a built in camera	60
Figure (25): ROBOTA chewing simulator	61
Figure (26): Chuck holding the sectioned premolar.....	62
Figure (27): Teflon mold holding the ceramic specimen.....	62
Figure (28): Teflon mold holding the control enamel specimen.....	62

Figure (29): 3D diagram of the chewing simulator chamber.....	63
Figure (30): X-ray diffractometer.....	64
Figure (31): Field emission Scanning electron microscope.....	65
Figure (32): Box plot representing median and range values for volume loss in different groups.....	70
Figure (33): Box plot representing median and range values for ΔRa in different groups...	76
Figure (34): Scatter diagram representing inverse correlation between volume loss and ΔRMS	77
Figure (35): SEM micrograph of CZP at 50x magnification showing wear scar.....	79
Figure (36): SEM micrograph of CZP at 1.5kx magnification showing surface crack.....	79
Figure (37): SEM micrograph of CZP at 4kx magnification showing partial spallation of zirconia surface.....	79
Figure (38): SEM micrograph of CZG at 30x magnification showing wear scar.....	80
Figure (39): SEM micrograph of CZG at 1.0kx magnification showing alternating smooth and rough areas.....	81
Figure (40): SEM micrograph of CZG at 1.5kx magnification showing total spallation of glaze particle.....	81
Figure (41): SEM micrograph of CZG at 3kx magnification showing spallation pores.....	82
Figure (42): SEM micrograph of CZG at 4kx magnification showing surface cracks and delamination.....	82
Figure (43): SEM micrograph of CZPG at 50x magnification showing wear scar.....	83
Figure (44): SEM micrograph of CZPG at 1.0kx magnification showing rough and smooth areas.....	84
Figure (45): SEM micrograph of CZPG at 4kx magnification showing spallations and holes in surface.....	84
Figure (46): SEM micrograph of TZP at 50x magnification showing wear scar.....	85
Figure (47): SEM micrograph of TZP at 1.5kx magnification showing crack lines.....	86
Figure (48): SEM micrograph of TZP at 4kx magnification showing wear scar.....	86
Figure (49): SEM micrograph of TZG at 50x magnification showing wear scar.....	87
Figure (50): SEM micrograph of TZG at 1.0kx magnification showing smooth and rough areas.....	88
Figure (51): SEM micrograph of TZG at 3kx magnification showing spallations and crack lines.....	88
