***Aqueous extract of irradiated khella***

***Study on inhibition of Nanobacteria forming kidney stones by  
antibiotics, medicinal plants and gamma radiation***

***A Thesis***

***“Submitted for Degree of  
Doctor Philosophy of Science in  
Microbiology”***

***By***

***Nora Fayez Hassan Soliman Othman***

***M.Sc. Microbiology***

***Faculty of Science – Helwan University (2016)***

**Supervisors**

**Prof. Dr. Mohamed Khaled Ibrahim**

Professor of Bacteriology, Faculty of Science, Ain Shams University

**Prof. Dr. Hala Abd Allah Farrag**

Professor of Medical Microbiology, Drug Radiation Research Department, National Center for Radiation Research and Technology (NCCRT), Atomic Energy Authority, Egypt

**Prof. Dr. Seham Yousef EL-Tablawy**

Professor of Microbiology, Drug Radiation Research Department, National Center for Radiation Research and Technology (NCCRT), Atomic Energy Authority, Egypt

***Microbiology Department***

***Faculty of Science***

***Ain Shams University***

2022

# **Acknowledgement**

*First and foremost I owe my deepest gratitude to ALLAH whose great help was the only reason in accomplishing my thesis.*

*I would like to express my sincere thanks and my gratefulness to **Prof. Dr. Mohamed Khaled Ibrahim**, Professor of Bacteriology, Microbiology Department, Faculty of Sciences, Ain Shams University, for his keen supervision and continuous encouragement throughout this work.*

*I deeply appreciate the effort of **Prof. Dr. Hala Abd Allah Farrag**, Professor of Medical Microbiology, Drug Radiation Research Department, National Center for Radiation Research and Technology (NCCRT), Egyptian Atomic Energy Authority for her valuable time in the supervision during all stages of this work, suggestions, criticism, advice and helpful discussion in preparing this thesis.*

*My deepest thanks and gratitude for **Prof. Dr. Seham Yousef El Tablawy**, Professor of Microbiology, Drug Radiation Research Department, National Center for Radiation Research and Technology (NCCRT), Egyptian Atomic Energy Authority who had supported me throughout the preparation of this thesis with patience and her encouragement , for his keen supervision, continuous cooperation ,support to achieve this work.*

*My sincere thanks extend to **assistant prof. Marwa Abd el Hameed**, assistant professor of biochemistry, Drug Radiation Research Department, National Center for Radiation Research and Technology (NCCRT), Egyptian Atomic Energy Authority for her help in dealing with rats and cooperation in this work.*

*My sincere thanks extend to all staff and members of the drug Microbiology laboratory, Drug Radiation Research Department at (NCCRT) for their sincere cooperation.*

**Nora Fayez Hassan**

# ***Dedication***

***To***

My sincere thanks to my lovely mother, father and only sister Yasmina for their continuous support and encouragement.

Thanks and gratitude from my heart for my husband Mohamed El Gazzar, for his encouragement, tolerance and support.

To my life, my heart and the light of my eyes, to my lovely daughters Malak and Kenzy.

***Thank you very much***

***Nora***
