TANTA UNIVERSITY
FACULTY OF AGRICULTURAL,
KAFR EL-SHEIKH
DEPT. OF AGRIC. MECH

"A STUDY ON MECHANIZATION OF SUNFLOWER CROP"
**Studies on mechanization of sunflower planting and
evaluation of threshing losses and drying**

BY

Mohamed Ibrahim Saad El-Meadawy

B.Sc. in Agric. Science (Agric. Mech.)

Fac. of Agric., Mansoura University, 1999.

THESIS

**Submitted in Partial Fulfillment of the
Requirements for Degree of
MASTER OF SCIENCE**

IN

AGRICULTURAL SCIENCE

(Agricultural Mechanization)

**Department of Agricultural Mechanization,
Faculty of Agriculture, Kafr El-Sheikh,
Tanta University,**

c77 24

2006

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase to 15.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office of National Statistics 2000). The increase in the number of people aged 65 and over is expected to be due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of emigration.

The increase in the number of people aged 65 and over is expected to have a significant impact on the UK's health and social care system. The number of people aged 65 and over who are in need of health and social care services is expected to increase from 1.5 million in 1990 to 2.5 million in 2020 (Office of National Statistics 2000). This increase is expected to be due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of emigration.

The increase in the number of people aged 65 and over is expected to have a significant impact on the UK's health and social care system. The number of people aged 65 and over who are in need of health and social care services is expected to increase from 1.5 million in 1990 to 2.5 million in 2020 (Office of National Statistics 2000). This increase is expected to be due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of emigration.

APPROVAL SHEET

"A STUDY ON MECHANIZATION OF SUNFLOWER CROP"

**Studies on Mechanization of Sunflower Planting and
Evaluation of Threshing Losses and Drying**

BY

Mohamed Ibrahim Saad El-Madawy

**This Thesis for M. Sc. Degree in Agricultural Science
(Agricultural Mechanization)**

Has been approved by:

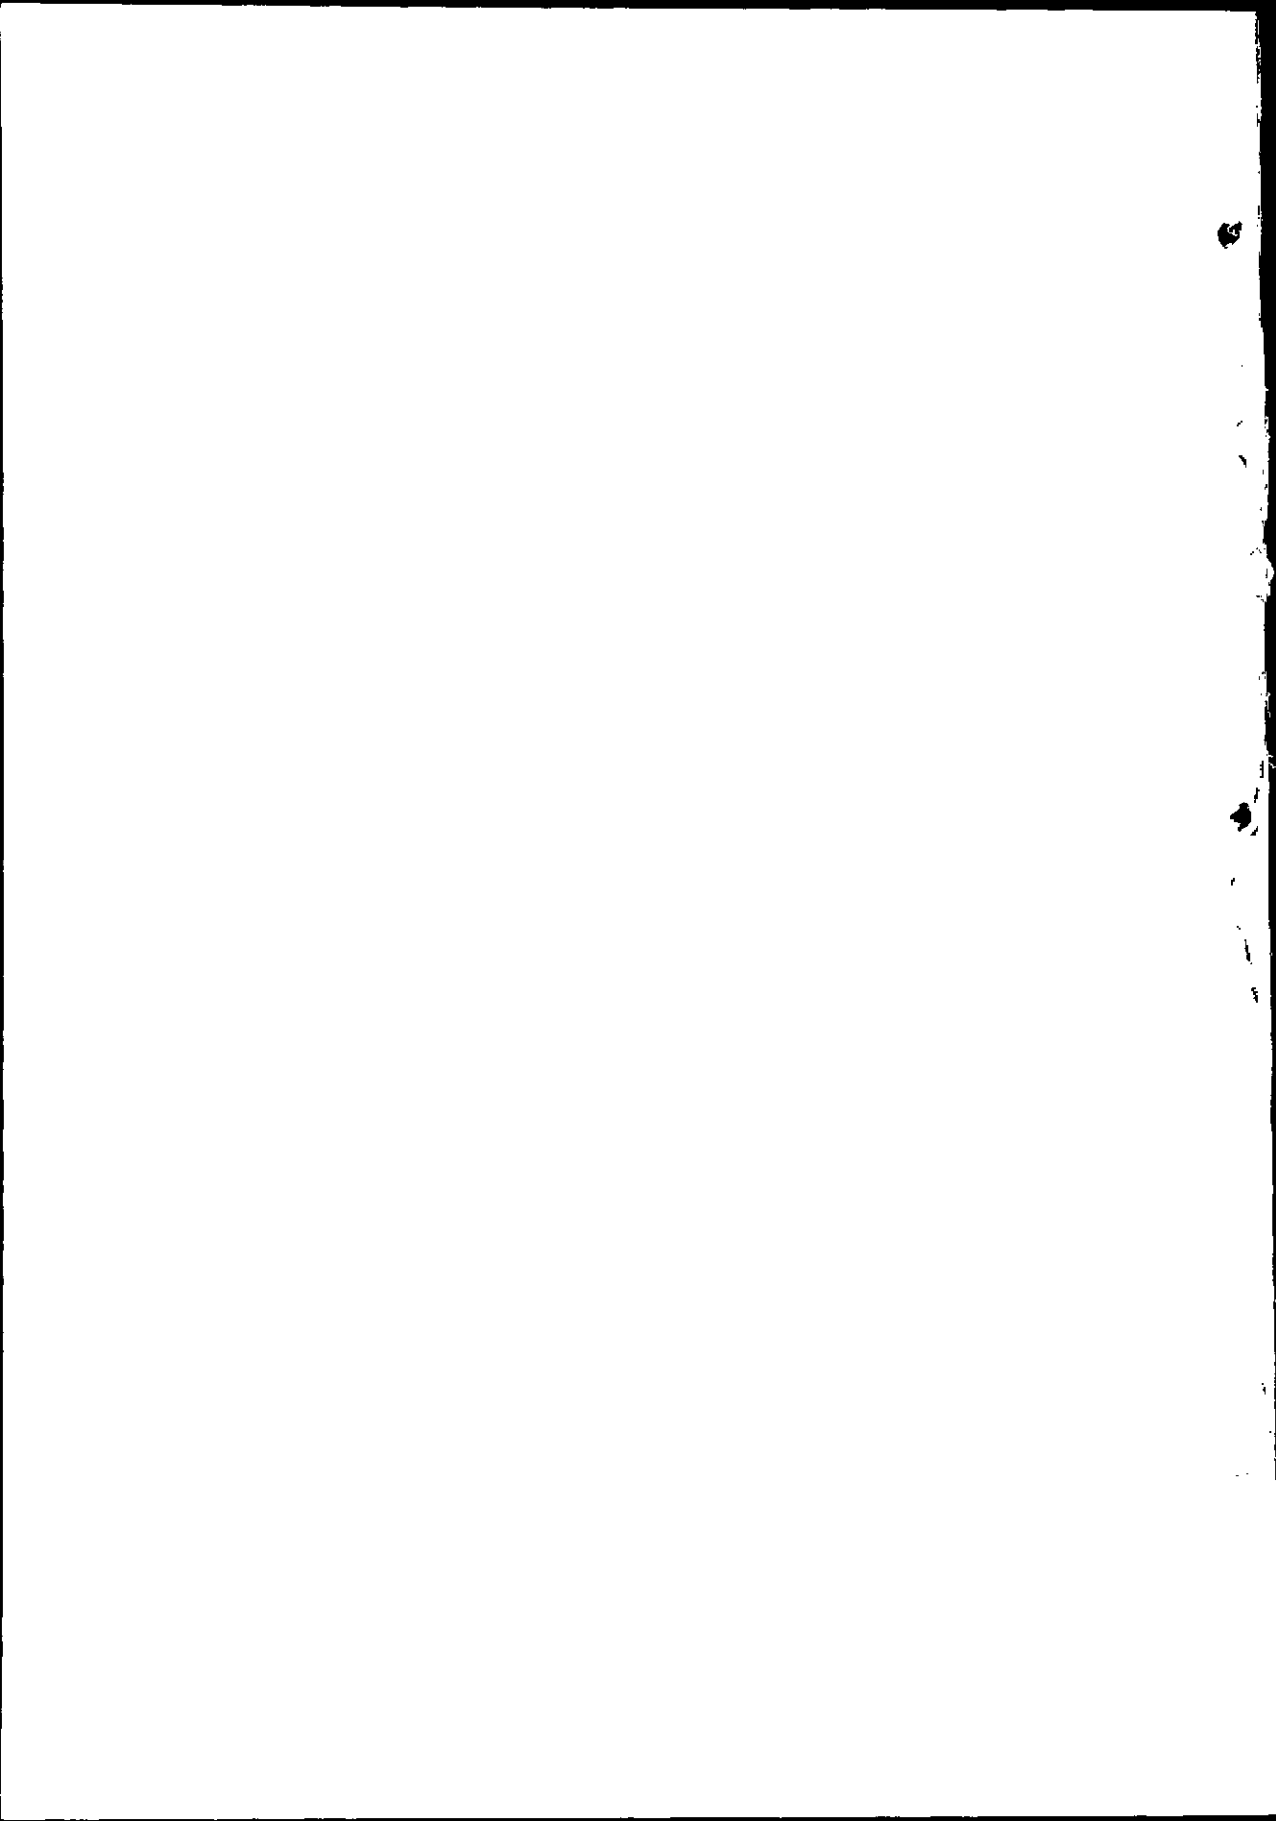

Prof. Dr./ Hesham N. Abdel-Mageed
Professor of Agricultural Engineering, and
Vice Dean for Community and Environmental Development
Mansoura University.

Prof. Dr. Mamdouh A. Helmy
Professor of Agricultural Engineering, and
Head of Agricultural Mechanization Department,
Faculty of Agriculture, Kafr El-Sheikh,
Tanta University.

Hussain Mohamed Sorour
Associate Professor of Agricultural Engineering,
Agricultural Mechanization Department,
Faculty of Agriculture, Kafr El-Sheikh,
Tanta University

Committee in Charge

Date: / / 2006

SUPERVISION COMMITTEE

The late Dr.

Fathey Ibrahim Hindey

Associate Professor of Agricultural Engineering,
Agricultural Mechanization Department,
Faculty of Agriculture, Kafr El-Sheikh,
Tanta University.

Dr.

Hussain Mohamed Hussain Sorour

Associate Professor of Agricultural Engineering,
Agricultural Mechanization Department,
Faculty of Agriculture, Kafr El-Sheikh,
Tanta University.

Dr.

Hamada Aly El- Khatib

Senior Researcher
Agricultural Engineering Research Institute ,
Agric. Res. Center; El-Dokki, Giza, Egypt

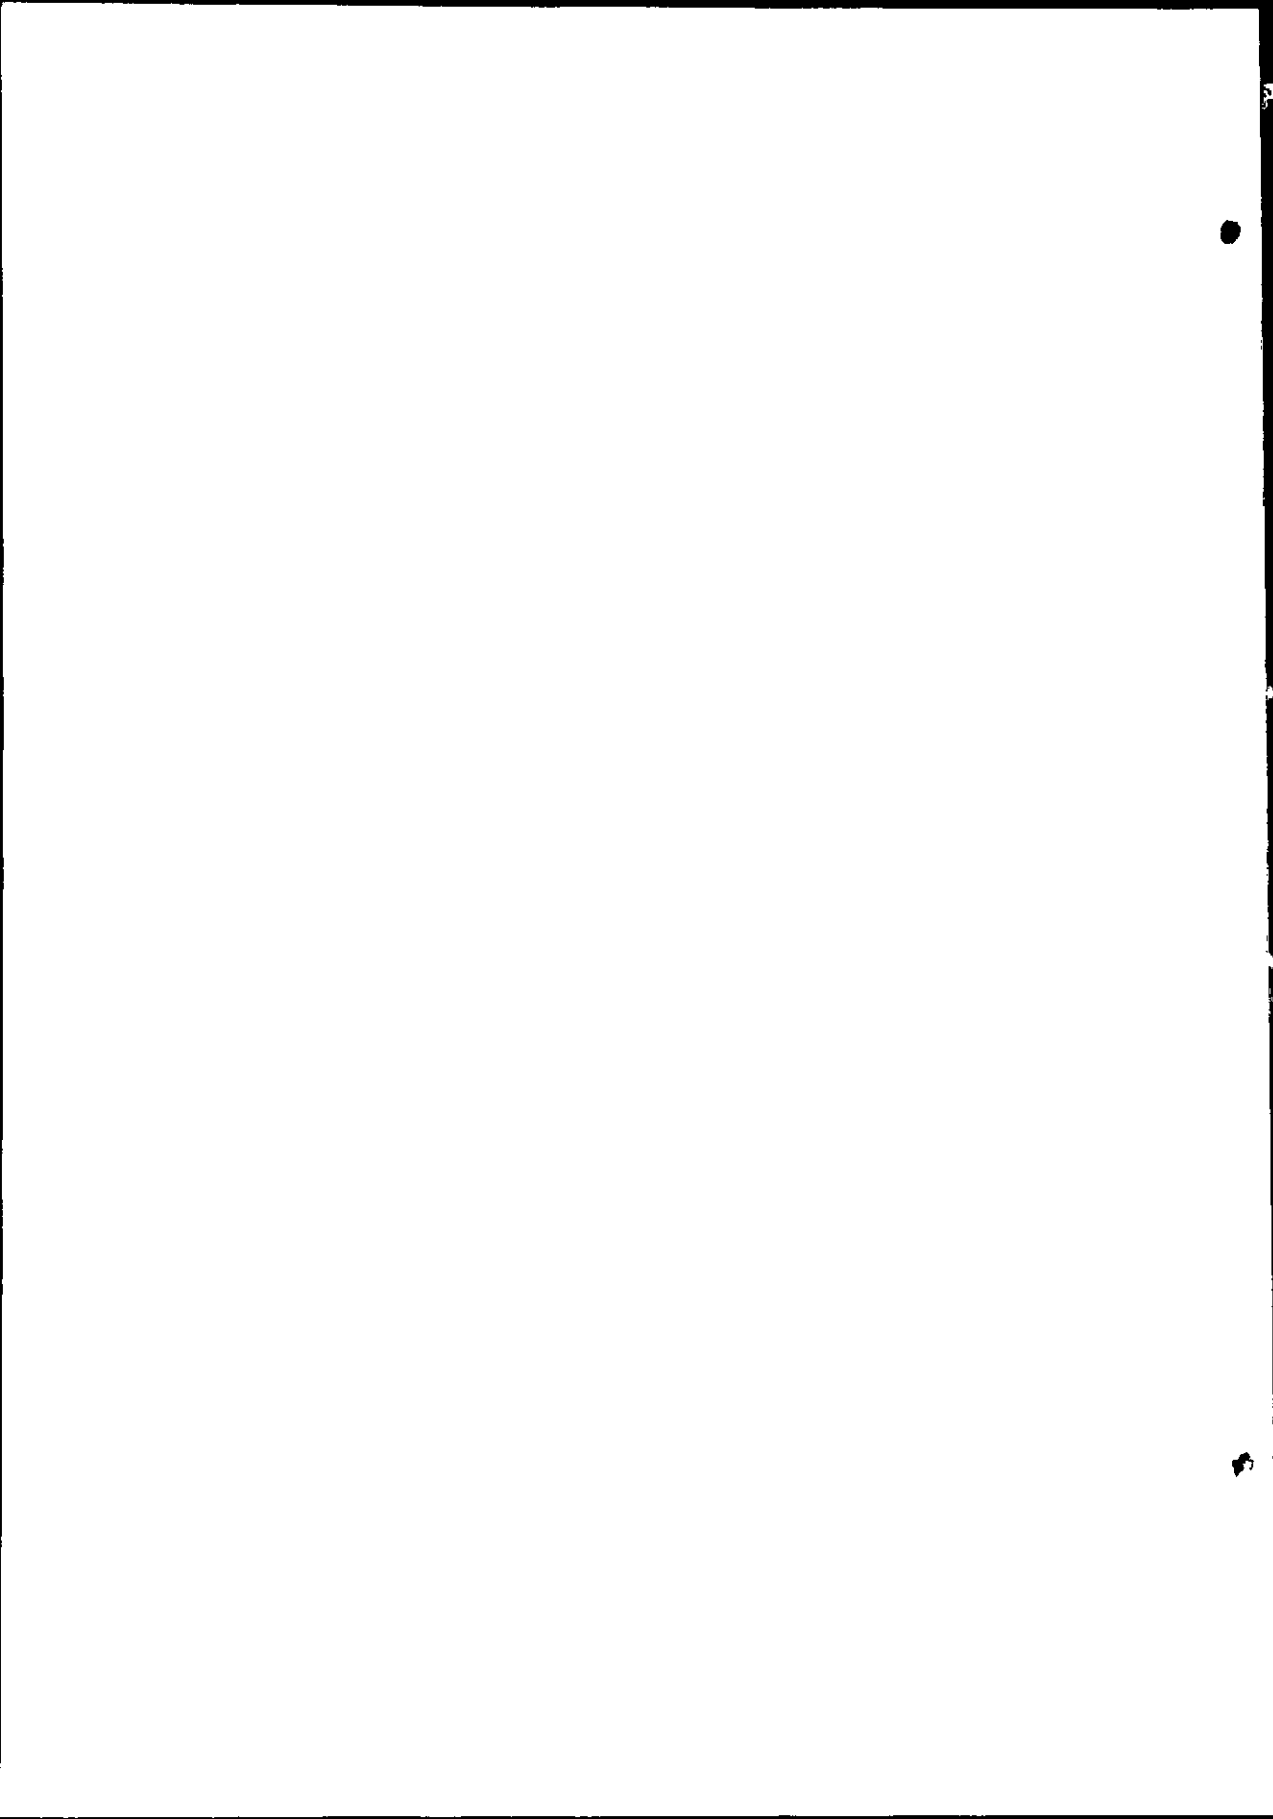

قالوا سبحانك لا علم لنا إلا ما

علمتنا إنك أنت العليم الحكيم

صدق الله العظيم

الآية (٣٢) سورة البقرة

ACKNOWLEDGEMENT

Thanks to Allah for his gracious kindness in all the endeavors the author has taken up in his life.

The author wishes to express his deepest gratitude to the late Dr. Fathy I. Hindey, Associate Prof. of Agricultural Engineering, Agricultural Mechanization Department, Faculty of Agricultural, Kafr El-Sheikh, Tanta University for his valuable advice, scientific help and encouragement.

The author also wishes to express profound gratitude and most appreciate to his advisor. Dr. Hussain Mohamed Hussain Sorour Associate prof. of Agricultural Engineering, Agricultural Mechanization Department, Faculty of Agricultural, Kafr El-Sheikh, Tanta University for his constant guidance, valuable comments, encouragement, reviewing manuscript and moral support during the course of the study.

The author wishes to express his deep sincere thanks and gratitude to Dr. Hamada Ali El-Khateb, for his valuable advice, rapid help and scientific help.

The author also wishes to express his deep sincere thanks and gratitude to Dr. mahmoud El-Iraqi, for his valuable advice, rapid help, scientific help and constant cooperation.

Thanks are due to all the staff of Agricultural mechanization Dep. Fac. of Agric., Kafr El-Sheikh, Tanta Univ. and all the staff of Rice Mechanization Center (R.M.C.), Meet El-Dyba Kafr El-Sheikh Governorate for their continuous help, support, and assistance in the preparation of the instrumentation used during the experimental work.

Many thanks to my parents, my brothers, my sister, my wife and my friends for continuous encouragement and their help during my study.

LIST OF CONTENTS

CONTENTS	Page No.
ACKNOWLEDGMNT -----	
I- INTRODUCTION -----	1
II- REVIEW OF LITERATUTRE -----	4
2.1 Planting stage -----	4
2.1.1 Importance of mechanical planting -----	4
2.1.2 Planting accuracy -----	5
2.1.2.a Germination percentage -----	7
2.1.2.b Seed scattering -----	8
2.1.2.c Planting depth -----	11
2.1.3 Effctive field capacity and field efficiency -----	12
2.1.4 Planting cost -----	14
2.2 Threshing stage -----	16
2.2.1 Drum (Cylinder) speed -----	16
2.2.2 Crop moisture content -----	24
2.2.3 Feeding rate -----	29
2.2.4 Power requirement -----	30
2.3 Drying stage -----	31
2.3.1 Importance of the drying process -----	31
2.3.2 Factors affecting the drying efficiency -----	33
III - MATERIALS AND METHODS -----	36
3.1 Planting stage -----	36
3.1.1 Planting variables -----	37
3.1.2 planting machine -----	37
3.1.2.1 Tractor -----	43

CONTENTS	Page No.
3.1.3 Measurements -----	42
3.1.3.1 Germination ratio -----	42
3.1.3.2 Planting uniformity and accuracy -----	42
3.1.3.3 Field capacity and efficiency -----	43
3.1.3.4 Power consumption and energy requirements -----	44
3.1.3.5 Planting cost -----	44
3.1.3.6 Statistical analysis -----	45
3.2 Threshing stage -----	46
3.2.1 Threshing variables -----	46
3.2.2 Machinery used -----	46
3.2.2.1 El-Shams threshing machine -----	47
3.2.2.2 Corn Sheller -----	49
3.2.3 Measurements -----	52
3.2.3.1 Sunflower heads and seeds physical properties ---	52
3.2.3.2 Threshing efficiency -----	53
3.2.3.3 Cleaning efficiency -----	54
3.2.3.4 Seed losses -----	54
3.2.3.5 Seed damage -----	55
3.2.3.6 Power consumption and energy requirements -----	55
3.2.3.7 Threshing cost -----	56
3.3 Drying stage -----	57
3.3.1 Experimental test apparatus -----	57
3.3.2 Drying variables -----	58
3.3.3 Measurements and instrumentation -----	59
3.3.3.1 Airflow measurement -----	59
3.3.3.2 Mass measurement -----	59

CONTENTS

Page No.

3.3.3.3 Bulk dinesity measurements -----	59
3.3.3.4 Moisture content determinations -----	60
3.3.3.5 Temperature measurement -----	60
3.3.3.6 Seed viability -----	60
3.3.3.7 drying losses measurements -----	63
IV- RESULTS AND DISCUSSION -----	66
4.1 Planting Stage-----	64
4.1.1 Germination ratio -----	64
4.1.2 Seed scattering -----	66
4.1.2.1 Lateral scattering -----	66
4.1.2.2 longitudinal scattering -----	70
4.1.3 Actual planting depth -----	70
4.1.4 Field capacity and efficiency -----	73
4.1.5 Power consumption and energy requierment -----	74
4.1.6 Planting cost -----	76
4.2 Threshing stage -----	78
4.2.1 Threshinng efficiency -----	78
4.2.1.1 Effect of feeding rate -----	78
4.2.1.2 Effecct of threshing drum speed -----	80
4.2.1.3 Effecct of moisture content -----	82
4.2.2 Cleaning efficiency -----	84
4.2.2.1 Effect of feeding rate -----	84
4.2.2.2 Effecct of threshing drum speed -----	86
4.2.2.3 Effecct of moisture content -----	88
4.2.3 Seed losses -----	90
4.2.3.1 Effect of feeding rate -----	90

CONTENTS**Page No.**

4.2.3.2 Effect of drum speed -----	92
4.2.3.3 Effect of moisture content -----	94
4.2.4 Seed damage -----	96
4.2.4.1 Effect of feeding rate -----	96
4.2.4.2 Effect of threshing drum speed -----	97
4.2.4.3 Effect of moisture content -----	100
4.2.5 Power consumption and energy requirement -----	102
4.2.6 Threshing cost -----	103
4.3 Drying process -----	107
V- SUMMARY AND CONCLUSION -----	110
VI- REFERENCES -----	117
APPENDIX -----	129
ARABIC SUMMARY -----
