**CLINICAL DIFFERENCES OF ORAL
MANIFESTATIONS OF ACUTE LEUKEMIA IN
A GROUP OF EGYPTIAN CHILDREN.**

Thesis

**Submitted to the Faculty of Oral and Dental
Medicine Cairo University**

**in partial fulfilment of the requirements
of the Degree of Doctor in Dental surgery
(Pedodontics)**

Presented by

MOHAMED HASSAN MOSTAFA

B.D.S. (Cairo University) H.D.D. (Cairo University)

M.D.S. (Cairo University)

Assistant Lecturer in pedodontics Department

Mansoura University

**Pedodontics Department Faculty of Oral and Dental Medicine
Cairo University.**

Supervisors

Prof. Dr. Salah El Din Mostafa El-Behiry

Vice Dean For Community Services and Cultural Development

Professor of Pedodontics and Dental Public Health

Faculty of Oral and Dental Medicine

Cairo University.

Dr. Mounir El Didi

Professor of Cytology

pathology Dept., National Cancer Institute

Cairo Univesity

Dr. Omar Mohamed El Tannir

Assistant Professor of Pediatric Onocology

National Cancer Institute

Cairo Univesity.

Dr. Mohamed El Bedeini,

Assistant professor of Clinical

Pathology.

NationalCancer Institute

Cairo University.

Acknowledgment.

I would like to express my deepest gratitude and thanks to Professor Dr. Salah El Din el Behiry. Professor of Pedodontics Faculty of Oral and Dental Medicine Cairo University for his helpful advice. Kind supervision and helpful directions during this investigation

I am grateful to Dr. Mounir El Didi. Assistant Professor of Cytology. Pathology Dept., National Cancer Institute, Cairo University. for his supervision, guidance and useful discussion.

I would like to express my thanks to Dr. Omar Mohamed El Tannir Assistant Professor of Pediatric Oncology, National Cancer Institute Cairo University for his continuous encouragement and his generous supervision and support throughout this study.

I also appreciate the support of Dr. Mohamed El Bedeini. Assistant Professor of Clinical Pathology. National

Cancer Institute Cairo University for his advice on the fungal aspects of this study.

Very special thanks are due to Dr. Samia Shoman, Lecturer of Biochemistry, Cancer Biology Department, National Cancer Institute, Cairo University for her assistance and advice.

I would like to express my thanks to Dr. Omar El Hattab, Lecturer of Statistics and Computer, Department, National Cancer Institute Cairo University for his help in statistical evaluation of the results.

I also appreciate the support of Dr. Farida Gadalla Lecturer of clinical pathology, National Cancer Institute Cairo University for her advice on the fungal aspects of this study.

To the National

Cancer Institute

Cairo University

LIST OF TABLES

	Page
Subjects:	
Table (1):Number of cases of acute leukemia	39
Table (2): Treatment of acute lymphatic leukemia	41
Table (3):Treatment for acute myelogenous leukemia	42
Results:	
Table (1): Dental caries scores of permanent and deciduous dentition in gorup A and control.	57
Table (2) Dental caries scores of permanent and deciduous dentition in group B and control.	58
Table (3) Dental caries scores of permanent and deciduous dentition in group C and control.	59
Table (4) Dental caries scores of permanent and deciduous dentition in group A and B.	63
Table (5) Dental caries scores of permanent and deciduous dentition in group A and C.	64
Table (6) Dental caries scores of permanent and deciduous dentition in group B and C	66
Table (7) Dental caries scores of permanent and deciduous dentition in relation to sex in group B.	67
Table (8) Dental caries scores of permanent and deciduous dentition in relation to sex in group C.	68
Table (9): Dental caries scores of permanent and deciduous dentition in relation to disease in group A.	68

	Page
Table (10): Dental caries scores of permanent and deciduous dentition in relation to disease in group B.	69
Table (11): Dental caries scores of permanent and deciduous dentition in relation to disease in group C.	70
Table (12): Gingival assessment among groups A, B, C and Control groups	71
Table (13): Gingival assessment among groups A and B.	71
Table (14): Gingival assessment among groups A and C.	74
Table (15): Gingival assessment among groups B and C.	74
Table (16): Gingival assessment in relation to sex in the studies groups.	75
Table (17): Gingival assessment in relation to disease in the studied groups.	75
Table (18): OHIs among groups A, B, C and control groups.	78
Table (19): OHIs among groups A and B.	79
Table (20): OHIs among groups A and C.	82
Table (21): OHIs among groups B and C.	82
Table (22): OHIs in relation to sex in the studied groups.	83
Table (23): OHIs in relation to disease in the studied groups.	83
Table (24): Vitamin C level in plasma among the studied groups and control.	84

	Page
Table (25): Vitamin C level in plasma in relation to disease -- in the studied groups.	86
Table (26): Vitamin C level in plasma in relation to sex in the studied groups.	86
Table (27): Fungal infection among the studied groups.	87
Table (28): Degree of fungal infection among the studied groups.	92
Table (29): Shows the number of cases with altered radiological findings in each group.	93
Table (30): Cytologic Findings in oral smears in 88 cases with acute leukemia.	98

LIST OF FIGURES

	Page
Fig. (1) : Equipment needed for cytological scrapes	50
Figs.(2),(3) : Methods of obtaining right and left mucosal scraps for cytology	51
Figs : (4),(5) : Sterile swabs obtained by firmly scrapping a cotton swab over the right and left buccal mucosa opposite the posterior upper teeth.	54
Fig.(6): Shows a bar diagram for the dental caries scores in permanent teeth for all groups and control group.	61
Fig.(7): Shows a bar diagram for the dental caries scores in the deciduous teeth for all groups and control group.	62
Figs. (8), (9) : Show caries condition of a pediatric acute leukemic cases after administration of chemo and radiotherapy.	65
Fig.(10): Shows a bar diagram representing the mean gingival scores for all groups and control group.	72
Fig. (11) : Shows gingival condition of a pediatric acute leukemia case before administration of treatment.	73
Figs : (12),(13) : Show gingival condition of a pediatric acute leukemia cases during administration of treatment.	76
Figs. (14), (15) : Show gingival Condition of a pediatric acute leukemia cases after administration of treatment.	77
Fig.(16): Shows a bar diagram representing the mean oral Hygiene scores in all groups and control group.	80

	Page
Figs. (17), (18) : Show the oral hygiene status of a pediatric acute leukemia cases received both chemo and radiotherapy	81
Fig. (19): Shows a bar diagram representing the mean vitamin C values in all groups and control group.	81
Figs. (20), (21) : Show a pediatric acute leukemia cases infected with acute candidiasis	88
Figs. (22), (23) : Show photomicrograph of smear from infected patient showing candida albicans -x 400-	89
Figs. (24), (25) : Show candidal clusters microscopically examined in oral swabs. -x 400-	90
Fig. (26) : Oral smear of a child with acute leukemia. Smear exhibited branching monilial hyphae. -x 200-.	91
Figs. (27), (28) : Show panoramic x-ray films for pediatric acute Leukemia cases before administration of treatment.	94
Figs. (29), (30) : Show panoramic view of pediatric acute leukemia cases after administriation of treatment.	95
Fig. (31) : Shows a panoramic view of a pediatric acute leukemia case befor administration of treatment.	96
Fig. (32) : Shows a panoramic view of a pediatric acute leukemia case after administration of treatment.	96
Fig. (33) : Oral smear of a child with acute leukemia. Smear exhibited moderate chronic inflammatory cell exudate with frequent squamous metaplastic epithelial cells . -x 400.	99

	Page
Fig. (34) : Oral smear of a child with acute leukemia. Smear exhibited frequent anucleated squamous cells derived from hyperkeratosis together with miniature keratotic cells derived from parakeratosis. -x 200.	100
Fig. (35) : Oral smear of a child with acute leukemia. Smear exhibit group of blast cells in a case of acute lymphoid leukemia- x 400.	101
