## APPROVAL SHEET

This to approve that the dissertation of the thesis presented by Aliaa Abd EL-Rahman Mohamed to Zagazig University entitled "*Some bacteriological & Mycoplasmalogical Studies on Respiratory Tract Infection in Buffaloes and Cows.*" for the degree of M.V.Sc. (Bacteriology) has been approved by the examining committee.

Signature

**1- Dr. Ali Abdou El-Ebeedy**  
Director of Animal Health Research Institute,  
Dokki, Giza

**2- Dr. EL-Sayed Youssef El-Naenaeey**  
Professor of Microbiology  
Faculty of Veterinary Medicine  
Zagazig University

**3- Dr Laila Moustafa El-Shabiny**  
Chairman of Mycoplasma Department (supervisor)  
Animal Health Research Institute, Dokki, Giza

**4- Dr. Ahmed Mohamed Ammar**  
Professor of Microbiology (supervisor)  
Faculty of Veterinary Medicine  
Zagazig University

## ACKNOWLEDGEMENT

I wish first to thank **Allah** almighty for helping me to complete this work.

No words can adequately express my sincere gratitude and great appreciation to **Prof. Dr. ahmed Mohamed. Ammar** Prof. of Microbiology ,Faculty of Veterinary Medicine Zagazig University who offered me a lot of time and who devoted his vast experience to provide me with the best possible piece of advices, suggestions and for this work.

I am deeply thankful to **Prof.. Dr. Laila Moustafa El-Shabiny** Chairman of Mycoplasma Dep. A.H.R.I. Dokki-Giza–Egypt for her keen supervision, continuous encouragement, for béarnaise and for stimulating discussion throughout the course of this work.

I wish to express my deepest gratitude to **Prof. Dr. Anisa , M. H. Moustafa** Prof. of Pathology, Faculty of Veterinary Medicine Zagazig University for her brilliant suggestions and inspirational ideas, valuable guidance and continuous help.

I would like to express my sincere gratitude and great appreciation to **Prof. Dr. Zinab El-Sayed** Prof. of Microbiology, Head of Buffalo Diseases Research Department A.H.R.I. for her great interest, valuable suggestions

Sincere thanks are due to Senior Researcher **Dr. Emad Rizkalla Zaki** Buffalo Diseases Research Department A.H.R.I for his patience and continuous support.

Many thanks to Senior Researcher *Dr. Emad Mokhtar Riad*  
Bacteriology Research Department A.H.R.I for his cooperation and support.

I am very gratitude to the member of Mycoplasma Department.  
A.H.R.I. Dokki-Giza-Egypt

# LIST OF TABLES

## List Of Tables

| No | Title  | Page |
|----|--|------|
| 1  | Prevalence of apparently healthy and diseased animals  | 49   |
| 2  | Prevalence of samples collected in summer and winter   | 51   |
| 3  | Interpretation of reaction on TSI medium.  | 56   |
| 4  | Mycoplasma type cultures and antisera  | 65   |
| 5  | Differential characteristics of Enterobacteriaceae   | 72   |
| 6  | Different characteristics of Pasteurella species   | 73   |
| 7  | Biochemical reaction of important Streptococci.  | 74   |
| 8  | Biochemical reaction of important Staphylococcus   | 75   |
| 9  | Differentiation of Corynebacterium species   | 76   |
| 10 | Biochemical patterns for bovine mycoplasma species or serogroups .                                   | 80   |
| 11 | Incidence of positive animals from diseased and apparently healthy animals                           | 85   |
| 12 | Distribution of samples collected from cow and buffaloes   | 86   |
| 13 | Prevalence of positive cases isolated from lungs of apparently healthy and diseased animals          | 87   |
| 14 | Prevalence of positive cases isolated from nasal swabs of apparently healthy and diseased animals    | 88   |
| 15 | Prevalence of positive cases isolated from tracheal swabs of apparently healthy and diseased animals | 89   |
| 16 | Prevalence of positive cases isolated from lymph nodes of apparently healthy and diseased animals    | 90   |
| 17 | Prevalence of positive cases from different samples from apparently healthy and diseased animals     | 91   |
| 18 | Prevalence of bacteria, mycoplasma and mixed infection from different samples                        | 92   |

|    |  |            |
|----|--|------------|
| 19 | Prevalence of bacteria, mycoplasma and mixed infection from apparently healthy and diseased animals regard to positive cases | 93         |
| 20 | Prevalence of positive cases isolated in winter  | 94         |
| 21 | Prevalence of positive cases isolated in summer  | 95         |
| 22 | Identification of bacteria isolated from lung, nasal swabs, tracheal swabs and lymph nodes                                   | 97         |
| 23 | Identification of mycoplasma isolated from different samples.  | 98         |
| 24 | Identification of mixed infection of mycoplasma and bacteria isolated from different samples                                 | 99         |
| 25 | Immunoperoxidase reaction of the isolated Mycoplasma and Acholeplasma  | 100<br>101 |
| 26 | Prevalence of bacteria isolated from animals in winter   | 102        |
| 27 | Prevalence of bacteria isolated from animals in summer   | 103        |
| 28 | Prevalence of mycoplasma isolated in winter  | 104        |
| 29 | Prevalence of mycoplasma isolated from different samples.  |            |
| 30 | Prevalence of mixed infection of bacteria and mycoplasma in winter   | 105        |
| 31 | Prevalence of mixed infection of bacteria and mycoplasma in summer   | 106        |
| 32 | Prevalence of isolates from apparently normal and diseased animal  | 108        |
| 33 | Prevalence of isolates from different samples from apparently normal and diseased animals                                    | 109        |
| 34 | Prevalence of all isolates from different samples collected from animals in different season                                 | 110<br>111 |
| 35 | Pathogenicity of <i>P. multocida</i> in mice   |            |
