Relationship Between Follow-Up Care and Quality of Life among Renal Transplant Recipients, Urology and Nephrology Center at Mansoura

THESIS

Submitted in Partial fulfillment of the
Master Degree in Nursing Sciences
(Medical-Surgical Nursing)

By

Hanan Ali Ibrahim El-Manzlawy
(B.Sc. Nursing)

Supervisors

Dr. Warda Youssef Mohamed

Assistant Professor,
Medical Surgical Nursing,
Faculty of Nursing, Cairo University

Dr. Mohamed Adel Bakr

Consultant of Nephrology,
Nephrology and Urology center
Mansoura University

Dr. Manal Sayed Ismail

Lecturer, Medical Surgical Nursing,
Faculty of Nursing, Cairo University

Faculty of Nursing – Cairo University
2001

ARABIC SUMMARY	

ACKNOWLEDGEMENTS

Praise be to *Allah*, the Merciful, the Compassionate for all the countless gifts I have been offered. One of these gifts, is accomplishing this research work.

I wish to express my deepest gratitude and sincere appreciation toward *Dr. Warda Youssef Mohamed*, Assistant professor of Medical-Surgical Nursing, Cairo university, who devoted much of her time, effort generous advice for the completion of this work. Many thanks to her valuable advice, experienced guidance and encouragement.

I am so grateful to *Dr. Mohamed Adel Barkr*, Nephrology Consultant, Urology and Nephrology Center, Mansoura University, for his valuable suggestions and close supervision. He generously offered his valuable time to guide me and answer all my questions.

I am indebted with respect toward *Dr. Manal Sayed Ismail*, Lecturer, Medical-Surgical Nursing, Faculty of Nursing, Cairo University, for her supervision understanding and friendly encouragement.

I absolutely appreciate with great sense of gratitude to *Prof. Dr. Mohamed Ghoniem*, Director of the Urology and Nephrology Center, Mansoura University, and the staff members of this highly specialized center, who offered the opportunity to accomplish this work and gave me the necessary help and support throughout the conduction of this study.

I thank the efforts of *Dr. Ossama A. Mostafa*, Lecturer of Public Health, Beni Suef Faculty of Medicine, Cairo University for his professional editing of this work.

LIST OF ABBREVIATIONS

ANOVA	Analysis of variance
ATG	Anti-thymocyte globulin
BUN	Blood urea nitrogen
CBC	Complete blood count
CMV	Cytomegalovirus
CRF	Chronic renal failure
CsA	Cyclosporine
EBV	Epstein-Barr virus
ESRD	End-stage renal disease
FSGS	Focal and segmental glomerulosclerosis
GFR	Glomerular filtration rate
HBV	Herpes simplex virus
HBV	Hepatitis B virus
HCV	Hepatitis C virus
HLA	Human leukocyte antigen
HRQOL	Health-related quality of life
PKD	Polycystic kidney disease
PTDM	Post-transplant diabetes mellitus
QOL	Quality of life
SIP	Sickness Impact Profile

LIST OF TABLES

No.		Page
1	Distribution of Sociodemographic Variables Before and After Transplantation	64
2	Distribution of Some Selected Medical Variables of the Study Subjects	65
3	Follow-Up Assessment Variables Done in Relation to Body Routine Check up and Monitoring Drug Side Effects	67
4	Blood and Urine Analysis Performed During the Follow up Period ..	68
5	Instructions Given for Renal Transplant Recipients Before Discharge as Reported By Respondents	69
6	Frequency Distribution for Sources of Given Instruction as Reported by Study Subjects	70
7	Repeated Measures ANOVA Test and 2 By 2 t-Test for the Total and Subtotal Mean Scores of the SIP Obtained by Respondents During the Study Period	71
8	Correlation Coefficient Between Selected Sociodemographic and Medical Variables with SIP Scores of the Subjects Allover the 3 Follow Up Visits (Baseline, 2 nd Month and 4 th Month)	74
9	Relationship Between Categorical Sociodemographic Variables and the Physical Dimensions of SIP Allover the 3 Follow Up Visits	75
10	Relationship Between Categorical Sociodemographic Variables and the Psychosocial Dimensions of SIP Allover the 3 Follow up Visits .	76
11	Relationship Between Categorical Sociodemographic Variables and the Total SIP Dimensions Allover the 3 Follow up Visits	77
12	Relationship Between Categorical Medical Variables and the Physical SIP Dimensions Allover the 3 Follow up Visits	78
13	Relationship Between Categorical Medical Variables and The Psychosocial SIP Dimensions Allover the 3 Follow up Visits	79

14	Relationship Between Categorical Medical Variables and the Total SIP Dimensions Allover the 3 Follow up Visits	80
15	Relationship Between Immunosuppressive Side Effects and SIP Dimensions in the Baseline Visit	81
16	Relationship Between Immunosuppressive Side Effects and SIP Dimensions in the 2 nd Month Visit	82
17	Relationship Between Immunosuppressive Side Effects and SIP Dimensions in the 4 th Month Visit	83

LIST OF FIGURES

No.		Page
1	Effects of Uremia on Body Systems	10
2	Site of the Transplanted Kidney	19
3	Age Distribution Among Study Subjects	62
4	Sex Distribution Among Study Subjects	62
