INTERACTION BETWEEN LOCAL AND OVERALL BUCKLING

M.Sc. Thesis

SUBMITTED IN PARTIAL FULFILMENT OF THE REQUIREMENT FOR
THE DEGREE OF MASTER OF SCIENCE IN CIVIL ENGINEERING
(Structural Engineering – Steel Structures)

BY

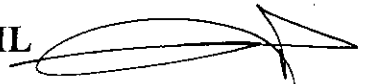

KHALED MOHEY EL-DIN ESSA ABD ELGHAFAR

B.Sc. (Honors) 1994, Civil Engineering Department
Faculty of Engineering, Minufiya University

SUPERVISORS

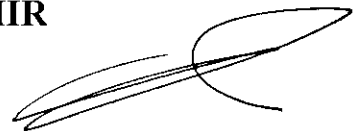

PROF. DR. KAMEL SAYED AHMED KANDIL

Professor of Steel Structures,
Civil Engineering Department
Faculty of Engineering, Minufiya University

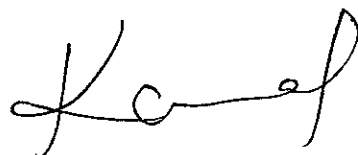

ASSOC. PROF. DR. MOHAMMED TAHER NEMIR

Civil Engineering Department
Faculty of Engineering, Minufiya University

STATEMENT

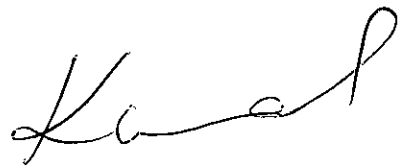

This dissertation is submitted to Minufiya University for the degree of Master of Science in Structural Engineering.

The author declares that, except for commonly understood and accepted ideas, or where specific reference is made to the research of other authors, the contents of this thesis are his own original work, and it includes nothing that is the outcome of work done in collaboration. The work has not been previously submitted, in part or in whole, to any University for any degree, qualification.

ACKNOWLEDGEMENTS

“THANKS TO MY ALMIGHTY GOD”

I would like to express my gratitude to my supervisors, Prof. Dr. Kamel Sayed Ahmed Kandil and Assoc. Prof. Dr. Mohammed Taher Nemir for their direct supervision, generous and continuous support, guidance, encouragement and invaluable advices to perform this research.

Thanks are also due to Prof. Dr. Monier Mohammed Kamal, head of the civil Eng. Dept., Faculty of Engineering, Minufiya University, for the facilities offered during the course of this research.

Grateful thanks to Eng. Maher El-Abed, for his valuable assistance during this work.

Lastly but not last, my deepest thanks to my father, my mother, my brother Mohammed and to all my family.
